CERTAIN GAS COUPONS INVALID MARCH 31

B-5, C-5, E-1 and R-1 gasoline ration coupons, and all D coupons not serially numbered, will be invalid for consumer use after March 31, M. E. Rawlings, Sioux City District Office of Price Administration Director, announced this week.

At the same time, first quarter 1945 "T" coupons will expire for use by commercial motor vehicle operators.

Service station operators will have 10 days, or through April 10, to turn in these coupons to their gasoline suppliers, or to exchange them at their war price and rationing boards for ration checks. Distributors have until April 20 to deposit these coupons in their ration bank accounts.

Most of these coupons have already been used, Mr. Rawlings said, and it is now desired to remove the few remaining ones from circulation. However, holders of invalidated coupons that represent an unexpired ration may exchange them for valid coupons at their boards, he said.

"B" and "C" coupons are rations for occupational driving. "D" coupons are issued to motorcycle operators, "E" and "R" coupons to owners of equipment not operated on highways and "T" coupons to operators of commercial motor vehicles.

State, individual and E bond goals for Nebraska's Seventh War Loan drive have been announced. Scheduled for May 14 to June 30, with a Payroll Savings, "Advance Drive" starting April 9, Nebraskans are asked to raise in individual purchases a state goal of 65 million dollars, of which 43 million must be Series E war bonds.

Individual and E bond quotas in the approaching drive are up substantially above the Sixth War Loan Drive, Mr. Clark disclosed. Compared with the last drive the E bond quota is 38 percent higher and the quota for individual sales is up 25 percent.

Securities to be offered to individuals in addition to E, F and G savings bonds include the marketable interest-bearing 7 percent, 1 1/2 percent, 2 1/4 percent and 2 1/2 percent government securities.

KATE SMITH asked to write this message on Saving Used Fats!

"The help of every woman is needed in saving used fats for hundreds of battlefields and home-front essentials. But some of us don't know all the ways we can do it. Here are a few points I've found helpful."—Kate Smith

MANY WOMEN SAY: "But I never have fats left over." Certainly it's good economy to re-use your fats...but there's always some left over even after that...and that little is more important than you can imagine. Only one tablespoonful of used fat will help make 5 machine-gun bullets. So there just can't ever be too little to save! Come on, everybody, scrape your broiling pan, your roaster, skillet. Save meat trimmings and scraps of fat left on plates.

OTHERS TELL ME: "But my fats are often too dark to turn in." It doesn't make a mite of difference how dark or blackened...or what smelly things like onion or fish you've cooked in your fat. Every drop of it will help make parachutes, synthetic rubber, soaps for the fighting and war fronts. Don't feel ashamed to hand it in to your butcher. If you save every bit of fat you possibly can, you're doing a job to be proud of!

THEN YOU HEAR: "But what sort of container will I use?" Any kind of tin can will do. The next time you open a can of fruit or juice or soup or vegetables, save it. But please don't use glass...it almost always breaks and makes the fat difficult to salvage. When the can is full, take it to your butcher. For every pound, you'll get 2 red points. If you have any difficulty disposing of your fats, call your Home Demonstration or County Agent.
