Pasture Plans

The 1945 Nebraska Pasture Forage Livestock Production Program is of special interest to the ranchers and farmers of Holt County and many are interested in the information that is available on the following subjects: Seeding and Management of Grasses and Legumes; Making Hay with Less Labor; Producing Meat on Grass; Labor Saving Devices and Production of Milk from Grass. Fifty have enrolled in the program.

In seeding grasses it is very important that they are the ones which will grow and do well on given soil. There is considerable interest in Brome and Crested Wheat grass planting. These grasses require rather productive soil with plenty of organic matter. Crested wheat grass seems to stand sandier soil than Bromegrass. In most cases these grasses are on lower, heavier soils. A mixture of native grasses such as Big Bluestem, Grama Grass, Buffalo and Drop Seed, should be sown in sandy soil. These should be seeded about the 25th of April to May 8th.

Sol Conservationist L. F. Bredemeier states that best results have been obtained by fall seeding of crested wheat and bromegrass. The seed in sandy soil may be covered deeper than in the heavier soil. The depth of planting is from 1/4 to 1 inch in sand and just barely covered in heavy soils. For more information on any of these subjects please return your pasture forage livestock card to your county agent and contact the office.

The Good Old Days

An Oregon compatriot thinks the wearisome, endless controversy over prices and wages under our new regulated way of living, invites the question, What was wrong with the "good old days" which modern radical idealists heap high with scorn? The current argument over meat is typical. There are quite a few farmers who would quickly return, if they could, to the good old days of free markets, regulated only by supply and demand. Then they were not considered bad citizens and accused of being lobbyists if they tried to adjust prices to cost of production. It was a matter solely between themselves and the American consumer. Usually a fair bargain was struck with the consumer getting his money's worth—and meat.

After recovering from shrapnel wounds, Marine PFC Russell Halsey, 21, Roselle Park, N. J., returned to action in the Tinian Islands, shot a Jap sniper but sustained a broken hip in the action. Twice War Bond funds have helped restore him to health, and Bonds bought and held are healing hundreds of other service men's wounds. Marine Sgt. Don Baird, Monmouth, Ill., smiles because War Bonds bought and held at home speeded his recovery from arm wounds suffered in an attack across a dummy flight strip at Saipan. An enemy 77 field piece hit him.

During beaching operations on a Pacific island, an LST struck a mine and Milton H. Fox, Mo. M. M., 1/C, 22, Sandusky, Ohio, sustained multiple fracture of both legs. War Bonds invested in and held by folks at home have helped provide treatments that encourage him to look to the day when he will walk normally again. More invasions are being added almost daily in that area with more and more casualties, men who need all the treatment Bonds can supply.

A RAILROAD? WHY, IT CAN'T BE DONE! Some of Chicago's elite laughed at William B. Ogden when, in the late 1840s, he asked their support in building a railroad from Chicago to the West. They knew that the charter, granted in 1836, had been gathering dust for years. But Ogden, man of vision, was a determined soul, and by the end of 1848 the first ten miles of railroad were completed. The Des Plaines river, near Maywood, Illinois, was the "end of the line," and on this 10-mile right-of-way chugged and swayed the first trains to operate west of Chicago. That same stretch is one of the busiest in the West today. "North Western" story has been one of steady progress during the past 97 years. Today, over its 10,000 miles of railway, has moved, and is moving, much of America's mighty war machine. Out of "North Western's" wealth of experience will come many new improvements and a finer transportation service—both freight and passenger—in America's postwar years. SERVING AMERICA IN WAR AND PEACE FOR ALMOST A CENTURY CHICAGO and NORTH WESTERN SYSTEM
