

Some Outbreaks of Trichinosis.

Approx. of the recent alarming outbreak of trichinosis at Aurora, Ind., the Cincinnati Commercial gives the following facts relating to previous cases: It may not be uninteresting to the general reader to trace the progress of the human body than has generally been supposed. They were first observed by Fiedemann in 1822, but first fully described by Prof. Owen in 1835, who supposed they were a harmless parasite; and for a long time were considered simply as a dissecting-room curiosity. But in 1860 a young girl died in the Dresden hospital from the effects of trichinosis, as was afterward fully proved by Prof. Zenker. Her flesh was found after death to be full of trichinae. They were alive, some coiled up and others lying straight; and they appeared to be in all stages of development, and in every part of the body, not even excepting the heart itself. At the same time Prof. Zenker learned that, soon after the girl had been taken ill, the housekeeper became unwell with similar symptoms, and all the family were taken sick about the same time. The butcher who killed the pigs was also found to be ill. He had been three weeks in bed, suffering from rheumatic pains in the limbs, and had been as if paralyzed over his body—unable to move his arms, legs, or neck. He had always been a strong man. He thought he had taken cold the day he killed the pigs; but when it is known to be a habit of German butchers to taste the meat they kill, in the raw condition, the history of these cases to Prof. Zenker became a history of trichinosis.

Smiley's Tribulations.

When Smiley, of Pittsburgh, started for Philadelphia the other day a woman occupied the seat in front of him with two infants. Just before the train moved off the woman asked Smiley to hold her baby for a moment while she went to the drug store across the street after a new bottle top. He took the little ones and before the woman returned the train started. Smiley was to try to go to Philadelphia, but he was in a quandary. He had no money to pay for the passage, and then as the conductor refused to have anything to do with the infants, poor old Smiley put them into his own arms and tried to soothe them. But the more he tried the more they howled, and he set up alongside of them the whole trip wailing wretchedly, while the other passengers were at him and their throats at his head, and called him hard names because he wouldn't keep the youngsters quiet. By the time morning came Smiley was pretty near crazy, and the twins were almost starved to death. He had nothing to give them to eat, and he was so tired that he carried for his hair, and he knew those were not healthy. The first time the train stopped he bolted out and got a pie. When he returned one of the twins had tumbled off the seat and had a broken nose; but he stuffed them both with the pie until they were deathly sick, and began to disgorge. Then Smiley was in a worse case than ever. When he reached Philadelphia he was on the verge of insanity, and his reason was all but debauched when a policeman entered the car and seized him on the authority of a telegram from Pittsburgh, on a charge of kidnapping. He spent the night in jail, and was then released on bail. He wants to find the father of those twins. He yearns to tell him something, and to fumble among his hair.—Max Adler.

Chief-Justices.

The following is a list of the Chief-Justices of the United States Supreme Court, as appointed between 1789 and 1874: John Jay, New York, Sept. 26, 1789. John Rutledge, South Carolina, July 1, 1795. Ratification refused by the Senate. Wm. Cushing, Massachusetts, Jan. 27, 1796. Appointment declined. John Jay, New York, Dec. 19, 1800. Appointment declined. John Marshall, Virginia, Jan. 31, 1801. Roger B. Taney, Maryland, Dec. 28, 1834. Salmon P. Chase, Ohio, Dec. 6, 1864. George H. Williams, Oregon, Dec. 28, 1873. Nomination withdrawn. Caleb Cushing, Massachusetts, January, 1874. Nomination withdrawn. Morrison R. Waite, Ohio, January, 1874.

Dr. Wilcox's Anti-Periodic or Fever and Ache Tonic.

Dr. Wilcox's Anti-Periodic or Fever and Ache Tonic is a valuable medicine for the relief of all febrile affections, and is especially adapted to the treatment of the following diseases: Malaria, Intermittent Fever, Biliousness, Headache, Neuralgia, Rheumatism, Gout, Gravel, Dropsy, and all other diseases arising from a disordered state of the system. It is a powerful tonic, and restores the system to its normal state. It is sold by all druggists.

Splendid & Unparalleled Triumphs of the Wheeler & Wilson Sewing Machine Co.

NEW YORK. Over Eighty-one Competitors, AT THE WORLD'S EXPOSITION, VIENNA, 1873. The Wheeler & Wilson Sewing Machine Co. has secured the highest honors at the Vienna Exposition. Their machines were awarded the Grand Medal for Merit, the highest award made at the Exposition. The machines were also awarded the Grand Medal for Merit, the highest award made at the Exposition. The machines were also awarded the Grand Medal for Merit, the highest award made at the Exposition.

TO CARPENTERS! HOW TO MAKE MONEY!

Read! Believe! And Act! The above engraving represents our ANTI-BURNING THERMIDOL (broken at one end). It is the only thing in the world that will positively exclude rain, dust, and snow from coming under the door. The parts marked A are made of lead, and are united by a strip of heavy pure rubber. It is the only thing in the world that will positively exclude rain, dust, and snow from coming under the door. The parts marked A are made of lead, and are united by a strip of heavy pure rubber. A Scene in the Women's War.

Among the many heart-touching incidents of the women's temperance movement, there is one which has attracted the attention of the public. It is a scene in the women's war, and is a true and touching story. It is a scene in the women's war, and is a true and touching story. It is a scene in the women's war, and is a true and touching story.

Poison in the Fire—An Exceedingly Curious Case.

One of the most remarkable cases of poisoning, and one of the most curious accidents on record, occurred at the house of a farmer named Merritt, four miles northwest of the city, near W. G. Stewart's place, a few days since. A young man named William Haley had been drinking poison, which he had carried to every heart within their reach. Passers-by uncovered their heads for the place whereon they trod was holy ground. They eyes of hardened men filled with tears, and many turned away, saying they could not bear to look on such a sight. Then the voice of prayer was hushed, the women began to weep, and the men began to weep.

It is Healthy to Marry!

The statistics of all countries show that marriage is promotive of longevity. Married people of both sexes live longer, because they are ordinarily more happy and prudently behaved than even bachelors and spinners. Moral and sanitary science concur in demanding that wedlock shall be encouraged. It happens, however, that in all old settled communities there is a large preponderance of women. The female sex is less able than the male, to fight unaided the battle of life, and its miseries, in the event of failure are greater. The excess of unmarried females should be diminished, if philanthropy and sound political economy are capable of grappling with the evil. There are two ways of solving the difficulty. One is an equalization of the sexes by means of the said emigration of surplus women to new settlements. Governor Sill's down cast schoolmistresses married rapidly after going West that their successors were put under \$2,000 bonds to remain single for three years. In many cases this proved no obstacle to impatient women, who paid the pecuniary forfeit that they might be married to the objects of their affection. The same thing is going on every day in New Zealand.—Hearth and Home.

THE MARKETS.

Table listing market prices for various commodities such as Flour, Wheat, Corn, and other goods. Includes columns for item name and price.

THE GRAND MEDAL OF HONOR.

As being a decided improvement over all other sewing machines, the Wheeler & Wilson Sewing Machine Co. has secured the Grand Medal of Honor at the Vienna Exposition. The machines were awarded the Grand Medal of Honor, the highest award made at the Exposition.

BUY J. P. COATS' BLACK THREAD FOR YOUR MACHINE.

AYER'S CATHARTIC PILLS. For all the purposes of a Family Physic. PURELY VEGETABLE. FREE FROM DRUGS. Dr. J. C. Ayer & Co., Lowell, Mass.

Rothschild's Career on the Turf.

A London paper says that if the example of the late Baron Rothschild's career on the turf could be more generally followed this national sport might yet be saved from the degradation which threatens it. The professed object of racing is to improve the breed of horses, and, no doubt, if rich men pursued it with this single object they would do what cannot otherwise be done. To Baron Rothschild, accordingly, a fine race-horse was an animal worth producing for its own sake, and he applied himself systematically to breeding and improving, and it was by the qualities of his horses that he became so rich.

The Pronouncing Hand Book of Words often Mispronounced, as given by Dr. J. C. Ayer & Co. It is a valuable work for all who wish to improve their pronunciation. It is sold by all druggists.

THE NECTAR.

Dr. J. C. Ayer & Co. The Nectar is a powerful tonic, and restores the system to its normal state. It is sold by all druggists.

Expert Divers.

The savages of the South Sea and other islands, are remarkable for the expertness which they acquire by habit, in diving and moving about in the water; being accustomed to it from their infancy, the element becomes so natural to them that they seem to have the use of their faculties in the water, as on dry land. According to voyagers, they are such expert divers, that when a nail or other piece of iron was thrown overboard, they instantly jumped into
