En. CHIEF :- Allow me to congratthate you upon your accession to the sole proprietorship of the paper. work until the afternoon. The grain have read your first editorial, and as I in general is well filled and that that have generally found you a man of is being threshed is turning out a fair | your word, I have faith that the paper will be hereafter published and managed in a business manner as far as your industry and energy can accomplieb it. I have the faith also that the people of this county will take a more thorough interest in the paper

> than was formerly the case. I like your idea of appropriating a portion of your paper to the use of the farmers. We need a medium of communication. In no other business of occupation are men so divided in opinion about matters which would seem to be easily ascertained. On methods of farming and the crops which will best grow in this soil we some of us think alike. By the way, Mr. Editor, as you have requested us to ask ques as you have requested us to ask questions, will you please answer this question. Is this soil and climate adapted to the successful raising of oats? I have heard considerable discussion about this, and would like to have the opinion of the Chitr on the subject. But I believe you said communications must be short. If you publish this, please don't nublish my name as this please don't publish my name as this is my first attempt at writing for the FARMER.

Webster County Condensed. Webster Co., Neb., lies in the Valley of the Republican, is 150 miles west of the Missouri River and touches the State line on the South. Winters are mild and dry: very little rain or snow falls in that season so littie in fact that cattle live all winter with no hay or grain. Plenty of rain falls in the spring and summer. The summers are not disagfecably warm, as there is always a cool breeze especially in the evenings. The county first began to settle in 1870. In 1871 the county was organized with a population of 45. Its population is now between 2500 and 3000 and is rapidly increasing. There are at pressent 38 organised school districts within its boundries and school facilities are therefore ample-better than these in some teachers' wages, Farmers can buy R. R. land from \$1.50 to \$6 per acre with ten years time. There is yet a considerable amount of government lands for homesteads and preemptions. As a stock raising country it is hard 'o excel. Cat'le do well, and for sheep it cannot be beaten. It is just suited to that. Fortunes can be easily made by raising sheep as the expense of feeding is very small. That corn, oats, barley, potatoes, buck wheat, and all kinds of roots and vegetables, are grown here with little labor. 35 bushels of sod corn to the acre is nothing new. Wheat averages about 25 bushels to the acre. Fruit does extremely well. Every farmer has his orchard growing. Forest trees grow rapidly. Cottonwood, boxalder, whitewood, soft maple, and many other kinds of trees grow into timber large enough for fuel in about three years. Osag orange plants do nicely, and in a few years your live fences can be made. Mechanics find employment and fair wages. The very best and purest water is obtained by going from 5 to 100 feet. The cost is very small when the well is bored.-These wells never go d.y. The streams of this county are the Republican and its tributaries, which are

as follows on the south side of the river. Walnut, Dry, Buffalo, State Persy, Cedar, Hicks, Ash, and Guide Hock creeks. On the north side are Willow, Elm. Cottonwood, Crooked, Indian, and Farmers creeks. In the north part of the county is the Blue river and its tributaries.

The soil of Webster county is a dark, rich regetable loam. The wild grames are nutritious and abundant, and make most excellent hay. Timothy, clover, Hungarian and millet will undoubtedly prove a profitable production. Those who have tried them so decide at least. Our railroad prospects are good, and we will have a road as soon as we really need

one. But the farmers for years will find ready

sale for surplus productions in the newer counties west and to new settler. By the time these markets are closed roads for cheaper transportation east will be opened. Our climate is healthful, the air pure and bracing, and sickness of any kind is almost a stranger to the people here. The county reat, RED CLOUD on the Republican river, near the center east and west and a little south of the center north and south. In it are chances for business men of every branch of trade. The country around

Bock are the only two laid out towns. Fur ther information can be obtained from any land agent who advertises in this paper, or at this office.
