

THE CHIEF.

LOCAL MATTERS.

—1880 is Leap year.

—Whizing cold but not much snow.

—Mosher has put a new glass front in his Meat Market.

—Salem Pratt of Hastings, called at these headquarters last week.

—The select school opened last Monday with seventeen scholars.

—Last Saturday the town was full of farmers and business was flush.

—Our thanks are due to a multitude of friends for their promptness in setting up.

—Mr. Chas. Buschow of Blue Hill gave the CHIEF a pleasant call on Monday last.

—J. D. Bonine skipped the country leaving a bill of \$4.00 at this office, unpaid.

—We have received since the last publication day, more than a dozen new subscribers to the CHIEF.

—Mr. Sherwood has filled his store room on the corner, with goods, and will soon be ready for business.

—Prof. Tice said that last Friday would be one of the coldest days in this month. He was little off in his guess.

—Social at Rev. G. O. Bent's next Tuesday evening Refreshments at 8 past 8 o'clock. All are most cordially invited.

—Miser Bros. have received a large lot of ladies cloaks of all sizes, patterns, and prices. Call and you will be sure to be suited.

—We could now be happy—the *Sedalia Register* of Missouri has informed us that we will receive that paper for the year 1880 free.

—Mrs. E. H. Jones is sick with the diphtheria and E. H. our efficient County Treas. has been obliged to remain at home for several days.

—Prof. Funk has kindly furnished us a report of the Red Cloud Public Schools, but it came in too late for this issue. It will appear next week.

—All who wish to settle their indebtedness to the CHIEF with wood are requested to bring it along, we burn lots of wood during the winter.

—The cry of "copy" coming from a healthy "devil" with well developed lungs, is enough to unsettle the nerves of any overworked editor in the land.

—A pleasant social gathering at the residence of Rev. Geo. O. Yeiser last Tuesday evening. We regret that circumstances prevented our being present.

—The editor of the CHIEF goes next day to purchase the largest stock of paper, envelopes and printers Holiday goods ever brought to this town. Come in early for your cards &c. for the Holiday days.

—Chas. E. Putnam who keeps the Flour & Feed store has also a full line of Groceries, canned fruits, frozen and dried fruits of all kinds constantly on hand at prices that are bound to suit his numerous customers.

—We would like to employ some one to saw up cord or saw wood. It may be with regret that we make this announcement, as we dearly love to saw wood, but really we have not got time to do it, so we reluctantly conclude to let the job go to some one else.

—It having come to my knowledge that a certain party or parties are in the habit of cutting, without permission, timber from my farm—the S.E. 1/4 sec. 33 T. 3 R. 10—situated on Elm Creek, near the town of Cowles, I therefore offer a standing reward of \$10.00 for evidence sufficient to convict any one guilty of said offense. M. L. THOMAS.

—Mosher has refitted his meat market and now has one of the best stands in the valley. He always keeps on hand a supply of the choicest meats to be had. Game and poultry, sausages &c., always on hand and dish up to suit purchasers, give him a call and be convinced of the excellence of his meats and sausages &c.

—Last week Rev. Geo. Bent was so unfortunate as to lose one of his horses which died from over work. It appears that a son of Mr. Bent drove the team to Blue Hill, and returned without feeding or watering the animals, making the trip in a short time, and the following night the horse died. The loss of the horse falls heavily upon Mr. Bent as his salary is said to be small and not very promptly paid.

—This country seems to be cursed with a superabundance of traveling frauds of various kinds. A short time ago the Parley company humbugged the citizens of Red Cloud, and last week the "Davison's Joyful Minstrels" gave the people, or rather the few who went out to the so called "entertainment," another dose of humbug that will certainly last them a while. Let us pray to be delivered from such frauds in the future.

—If Mr. Platt would place a sofa or other convenience in his lumber yard for the benefit of loving couples who from time to time seek privacy from the gaze upon the stony heavens, exchange vows of eternal fidelity and amaze themselves in various ways too tedious to mention, he would earn the loving gratitude of said young couples, and at the same time prevent the spoiling of many dollars worth of lumber.

—The Presbyterian Church of Red Cloud will hold their next regular administration of the Sacraments on next Saturday and Sunday, Dec. 13th and 14th 1879.

—On Saturday, at 7 o'clock P. M. meeting of the session and of the church. Those who wish to unite with the church, at this communion will please attend on Sabbath, at 11 o'clock A. M. Preaching immediately after Baptism and the Lords Supper administered. All believers in Christ are welcome to our table. Preaching also at 7 o'clock P. M.

—How prone is human nature to judge mankind by the clothes that are worn, and in too many instances without taking into consideration the circumstances that surround the individual. For instance, the farmer, the man who tills the soil, the very nature of the work he does prohibits him from wearing costly clothes. It demands that he wear something substantial, something adapted to his business. A farmer would look as much out of place with a suit of broad cloth, as the city man with a flannel shirt and overalls, standing in the presence of his congregation delivering a sermon. The coarsest and most uncultured being may wear broad cloth, and the smartest and best educated be seen in homespun garb, and yet how often do we hear brainless fellows who manage to make out an existence, the Lord knows how, criticize and try to make sport of the honest farmer because he happens to live in the country and wear clothes that are adapted to and intended for the work he has to do. The man with coarse clothes may, and nine times in ten does, possess more brains, more learning, and in fact more of everything that constitutes true manhood than a regiment of the soft patel idlers who dabble away their time in idleness and imagine that because they can wear a white shirt and collar, they are to use a homely expression, "Some pumpkins."

Among Our Neighbors.

ED. CHIEF.—I will now make an attempt to give you a promise, and send you a few thoughts suggested by my visits and interviews among the various districts. There are seventy-two districts in this county and at present about fifty of them are having a winter term of school.

A few weeks since we visited Dist. No. 28, where we found Mr. H. Hampton leading the educational strifes in the neighborhood, and we think him capable of doing it. Mr. H. is a young man of superior talent, and having the happy faculty of getting down to the level of the child's understanding he brings it up with him to a higher plane. We saw a novelty in this school, and since we think that the teacher has an open right for the device, we take the liberty to write you of it. We wish to teach a class in Primary Geography, and having no map in the school, the teacher took a citron and marked parallel lines around it, then he cut out the ring in proper places to represent the continents and larger islands, leaving the remainder to represent the water surface. With this he taught and interested his scholars through a recitation and at the same time laid the foundation for many other lessons like it. This shows what may be done, when a desire to interest the pupils, leads us to activity. Mr. Hampton, with if he continues the profession, becomes one of its highest lights.

The Farmers in this neighborhood are picking corn, and getting ready for winter.

Several days ago we took buggy to the north west corner of our harmonious precinct and here we remained over night, and made a visit to the school in Dist. No. 24.

This district has a good school house, and some apparatus, if we may name it such, for arithmetical charts about the room, contain some good things not found in an elementary arithmetic.

This has been one of the most quiet schools in the county, but Mrs. Russ mest look sharply to her business, or some of those bright eyed, gray checked girls and boys will be teaching (?)

Messrs. Rinker and Walker are teaching in a singing school here, and when it closes, it is thought that another will be organized immediately.

Most of the can in the crib and farmers are plowing, and getting wood.

Mr. E. S. Dyle who came here the same season that Red Cloud was settled, and who has borne the brunt of pioneer life, is now comfortably situated on a fine farm near the Blue, and his horses, cattle, and poultry, show prosperity as the reward of his toil.

Our old acquaintances, B. W. Rash has moved to Rawlins County Kansas.

This is said to be a democratic precinct, but the voters consider themselves "bound on the goods" in regard to the fall election.

New frame houses are going up all over the prairie, and our carpenter, Mr. Day, is busy contrasting and overseeing the work upon them.

After a cold drive, we reached Mr. Hornbeck's where a splendid dinner made us forget cold and hunger. During the afternoon we visited Miss Nettie Steer's school. This is a model school, quiet studios, and polite, the pupils are advancing steadily. But this sheet is full, and if accepted, next week we will tell what else we saw.

—"Old Gov't Java" at Roby's

—Moon & Callender of Cowles Neb. have just received a large stock of Dry Goods and solicit the patronage of the people of their vicinity. We guarantee as low prices as elsewhere in the county. Call, and be convinced. Respectfully, Moon & Callender.

ESTRAY NOTICE.

Taken up by the subscriber on his enclosed land in the southwest 1/4, section 21, town 2, range 11, Red Cloud precinct, Webster county, Nebraska, on the 1st day of November, A. D. 1879, one yearling heifer, white in color with tips of ears red.

November 6th, 1879. 14-18

Brick!! Brick!! Brick!!!

Brick's have just burned a kiln of about 100,000 bricks at their yard on the creek just northeast of town. These bricks are of the best quality and will be sold at the lowest market price. Call at their yard when you are in need of brick and be convinced that it will be to your interest to deal with them. 9-21

—For Pitted Plums, and Cherries, Allen Apples, J. P. Feaches, Seedling and new Box Raisins, and every thing else that goes to W. B. Roby's. If

—Hair Switches for sale at Mrs. Lutz.

Maple Grove Farm.

WESTER Co. Neb. }
Nov. 28th, 1879. }

Mr. Ed.—After several weeks gathering even we have come to the conclusion that the early corn is not so good as our late planting, our early corn was planted May 31, and the late, was planted May 15th, 17th, and I think the early was just eading during the hot winds in August and this accounts for it not being any better, although it scarcely averages 25 bushel on high land, and the late 50 to 60 bushel per acre on bottom land, the ears on the late are a great deal larger and sounder, and I have become satisfied that manure is a great help to corn on high land, and I think if the manure was hauled out on the fields in place of leaving it lay and move the stubbles I have seen done it would pay very well for hauling and another thing, I have discovered, that we can not raise corn without more cultivation, the more work put on a field the more corn we get, and I believe the most of our farmers have become satisfied on this subject and in a few years we can show as good corn crops as in any other state. Fall wheat looks fine, and is looking very well, and no doubt will stand the winter very well and from present prospects we may expect a good crop. Although times are hard and money scarce, and every body is grumbling about hard times, improvements still go on, John Ashburn has remodelled his stone house by taking off the dirt roof and building it a foot or two higher and put a shingle roof with a sleeping chamber on second floor &c.

Andrew Bure is contemplating the building of a stone house, this looks like biz, in our neighborhood. Yours truly, D. S. HELVERST.

STATE CLIPPING.

At Grand Island houses are going up at the rate of thirty-five a month.

Wayne county's population has increased 45 per cent in the last six months.

Gov. Furnas has sent 60,000 coins of fruit trees to be grafted in York county.

Lancaster county has a woman who claims to be a blood relation of Queen Victoria.

Owing to the great increase of traffic on its line the A. & N. railroad have ordered 100 new freight cars.

A 700 pound hog two and a half years old, is challenging the admiration of Cuming County farmers.

It is thought that the work on the O. & R. V. Railroad will be completed to Spring valley by Jan. 1st.

A convict in the State penitentiary was killed last week by the caving in of clay bank in which he was working.

Ten thousand California salmon and fifty thousand bass will be transplanted in the Cedar river early in January.

Clifton, in Nemaha county, has a library of 400 volumes and the farmers expend \$80 a year for new books.

COMMISSIONERS PROCEEDINGS.

Dec. 31 1879.

Met pursuant to adjournment.

Full board present. Minutes of last two meetings read and approved.

Warrants issued to King Bridge Co. to the amount of \$1813.00.

The following official bonds were approved:

John Pabinsky, J. P. Bata Prox. \$1,000.00
I. L. Frame, " " " " " " " " \$1,000.00
S. S. Wells, " " " " " " " " \$1,000.00
John May, " " " " " " " " \$1,000.00
D. M. Francis, " " " " " " " " \$1,000.00
E. C. Bashaw, " " " " " " " " \$1,000.00
Isaac May, " " " " " " " " \$1,000.00
W. W. Bunnell, " " " " " " " " \$1,000.00
A. McMillan, " " " " " " " " \$1,000.00
J. M. Lellian, " " " " " " " " \$1,000.00
Chas. Buschow, Assessor \$10,000.00
W. B. Creamer, " Baili " " " " " " " " \$1,000.00
J. M. McCallan, Jr. " " " " " " " " \$1,000.00
A. M. Johns, Constable \$250.00
C. H. A. Martin, " " " " " " " " \$1,000.00
G. A. Hart, " " " " " " " " \$1,000.00
J. S. Sorenson, O. of H. R. D. no. 11 \$1,000.00
D. S. Helverst, " " " " " " " " \$1,000.00
B. Kahn, " " " " " " " " \$1,000.00

ACCOMTS ALLOWED.

Donald McCallum Supt. Construction of Bridge \$12.00
R. R. Sherer, Contractors fees \$11.40
J. L. Miller, Road Sawyer \$5.50
Geo. Heston appointed to move the bodies of Wm. H. Bliss and wife to the new Cemetery for the sum of \$12.00 cash.

Adjourned to Dec. 10th at 9 A. M.
Geo. Ball, J. A. Tulley, Chairman. Clerk.

LEGAL NOTICE.

County Court, Webster county, Nebraska, do hereby certify that J. S. Mitchell, of said county, is the owner and proprietor of the following named premises, to-wit: The premises situated in the southwest 1/4 of section 21, town 2, range 11, Red Cloud precinct, Webster county, Nebraska, containing about 100 acres of land, more or less, and known as the "Maple Grove Farm".

And that said premises are subject to a mortgage in favor of the said J. S. Mitchell, in the sum of \$1,000.00, with interest at the rate of 10 per cent per annum, payable in installments of \$20.00 per month, beginning on the 1st day of January, 1880, and continuing until the said sum of \$1,000.00, with interest, is paid.

Witness my hand and the seal of said court, this 10th day of December, 1879.

J. S. Mitchell, Clerk of Court.

Red Cloud CHIEF for 1880.

OUR NEW DEPARTURE:

\$1.00 per Year!

—How prone is human nature to judge mankind by the clothes that are worn, and in too many instances without taking into consideration the circumstances that surround the individual. For instance, the farmer, the man who tills the soil, the very nature of the work he does prohibits him from wearing costly clothes. It demands that he wear something substantial, something adapted to his business. A farmer would look as much out of place with a suit of broad cloth, as the city man with a flannel shirt and overalls, standing in the presence of his congregation delivering a sermon. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive, mechanical device, thoroughly tested, and used in the most successful manner. It will sew any kind of fabric, and is especially adapted for the family use. It is simple, durable, and easy to operate. It is the most reliable and satisfactory machine ever invented for all kinds of family work. It is an economical, unexpensive,
