The question is often asked in a case of poisoning as to the simplest way to provoke vomiting. Lukewarm water in quantity is good, "but it is better to add a teaspoonful of ground mustard, or a teaspoonful of ipecac, or a tablespoonful of the sirup of ipecac. Further, let it be remembered that there is water will do. Water in which hands, or dishes, for that matter, have been washed acts more quickly than anything else, and if soap has been used it will be all the better for that, as soap is an antidote for acid poisons.
