Is this the spot? they tell me so,
Where my home stood a week ago,
One little week ago, ah me!
My weary gaze can only see
An orehard of uprooted trees,
A garden swept away, and these
Great hesps of logs and clay that press
The earth with their unsightliness.
They made the cottage low, where we,
Myself and John and baby, three,
At least, of all earth's children were
Most glad of life, most free from care.

And more—my baby on my knee— Why God had been so good to me.

Then John came whistling from the fieldJohn was my life, my sun, my shield—
And as he came, my heart, so biest
With olden memories tenderest,
Seemed overburdened just to see
Him come, and see the baby's giee.
He talked with me a little while,
Frank from the well, then with a smile
Lifted the baby up, and said:
"Good-bye;" and laid upon my head
His hand with tender touch, and then
Said: "We will not come back again,
My work is done, and now, you see,
The baby goes along with me."

Than my own baby's carele-sness. Under the trees, and through the gate Went man and ch ld with joy clate: The father with such fond, fond pride That it was but a week ago.

Then I was young, now I am old, As though my threescore years were told: My memory tries in va n to go Through what befel, but this I know: An awful sound from everywhere And sudden horror filled the air. Swaying and sweeping overhead
A spectra: cloud so dark and dread
Came through the sky, and Heaven felt,
And earth sank down, and up rose Hell,
And I was lost, and called on John
To bring our child, but died mone.

And that one hour eternity.

And now, God pity me, I stand
Upon this desolated land;
Home, garden, flower and tree are gone, The neighbors tell me God knows best, To comfort me; they are at rest, They say, and buried tenderly When I was all too ill to see. It must be so, it must be so, But was it but a week ago?

To John and baby in their dreams. For well I know they dream of me, Who loved them, oh, so utterly! Ah! they have much to tell, how they Cried out for me in death that day. He cannot be at home, and b Will grieve because he said to me They would not come again, then make More of the baby for my sake,

To tel' the living; but the dead We long to tell; they heed us not. Oh. John and baby, unforgot I stand an effigy of woe Where our home stood a week ago.

-Louise V. Boyd, in Indianapoles Journal.

#### A CONJURER'S FEAT.

The signor was giving a series of highly-successful performances in the city of Mobile; where (as he tells us in his auto-biography) people came to consult him priva ely about love affairs, matters of business and future even's, thinking that one who could guilt. do such wonders must be able to unra el all the mysteries of life.

minded community in those days. In vain he disclaimed the fortune-te:ling Do you discover anything more?" believed that he could give the required once. If your son should set about it, ing that if he should explain his tricks information if he would. He was one day in the hall, prepar-

ing for the evening's performance, when an elderly gentleman called upon him, and with profound respect asked the honor of taking him by the hand. "I saw your doings here last night," said the visitor, "and let me tell ye, twas the most wonderfulest thing I ever did see! I never laughed so in all my born days."

Lam glad you were pleased." re

going out to the field he saw him swinging his scythe with great energy. and this time singing to fast time. "Ham and eggs; take care of yur legs." And this represents pretty fairly to the worker the difference in the two classes of diet. The horseman who demands the

longest drives and the heaviest work from his teams feeds them on cure I hav and old oats. The groom never feeds the racer or trotter on new oats, no matter how fine they are, till they have been threshed for weeks and be ome well dried and hard.

But the question may be fairly asked What shall the farmer eat? We will answer this for ourselves, practically, not, perhaps, scientifically, or with aux theory as to the probable effect of this or that on the system.

The farmer does his hardest work it the summer months. In the very heat of dog days he works hardest, and for that very reason needs good substantial food. He cannot afford to waste any strength in digesting a large quantity to get a little nutriment; nor is it conducive to health. Most hard-working people need meat; well fattened, nicely cooked fat perk in moderate quantities will not be hurtful. Mutton hould be used more extensively by the farmer. With the ice box which many now have, a carcass can be easily kept till it can be consumed, or neighbors can exchange with each other and divide into smaller portions. We'll cured ham-boiled is the best-with

## A Word to Thinkers

The perfection of a strengthening medicine consists in its leaving no unpleasant after effects. Whisky, ale, beer and other alcoholic beverages excite the brain and blood resucts to unnatural activity and while the whirtpool of excitement lasts, all feeling of languor and distress is banished, but when the reaction comes, "the last state of that man is worse than the first." Invalids should trust more to nature for their recovery and avoid the use to nature for their recovery and avoid the use of stimulants as altogether injurious. Be partial to a fruit and regetable diet and choose such medicines as are strengthening to the whole general system. To this end no better remedies can be used than Yellow Dock, Sarsaparilla, Juniper, Iron, Buchu, Celery and Cailsaya, each of which have separate and distinct virtue, but when blended in a single compound excel all other remedies in giving health, strength and vigot to every part of the body. Such a compound is Dr. Guysett's Yellow Dock and Sarsaparilla; its harmonious action on the blood, lungs, liver, kidneys and action on the blood, lungs, liver, kidneys and

muscular system is astonishing.

Well Am

The morning, oh, it was so bright!
And clover blossems red and white
Made the air heavy with perfume,
And early roses were in bloom;
The climbing peas in bud, and beets
In red-lined leaves teiling their sweets,
The beans grew fast, the cabbage, too,
Its sea-green leaves empearled with dow,
Stood sturdily; and from my door
I saw it all and wondered more
And more—my baby on by base—

Then John came whistling from the field-

I laughed aloud, with scarcely less To give the little one a ride
On horseback there: I looked that way
And waved my hands as glad as they;
And this, and this; who tells me so,

I died, for it was death to me,

Would I coul! know how long it seems

Oh, there be secrets dread and deep The dead must know, the dead must keep; And there be sorrows all too dread

It was a rather primitive, simple-

plied the signor, politely.
"How you could take so many eggs out of a bag that had been thrashed on the stage and trampled on, upset all my calc'iations! And how could you know that a stranger in the middle of the hall had a chicken under his coat? I couldn't see a feather of it till you

The signor silently listened to a good deal more talk of this sort, until the speaker came to the object of his visit. They do say, signor, that there's nothing you don't know, or can't find out if you try. And I've come to con-sult you"—the old gentleman looked cautiously about the hall, and lowered "You know

reward you well for it," said the visitor.

only two servants with us; and they are old family servants, that I can't "You have been robbed?" suggested the signor. "Now how did you ever find that

sigacious shake of the head. "I hadn't come to that part of my story. But I
