FIFTY YEARS APART.

They sit in the winter gloaming. And the fire burns bright between; One has passed seventy summers. And the other just seventeen.

They rest in a happy stience One lives in a coming future, And one in a long, long past, Each dreams of a rush of music,

And a question whispered low: One will hear it this evening. Each dreams of a loving hus sand,

Whose brave heart is hers alone; For one the joy is coming. For one the joy has flown. Each dreams of a life of gladness

Spent under the sunny skies: And both the hope and the mem'ry Shine in the happy eyes. Who knows which dream is the brightest! And who knows which is the best? The sorrow and joy are mingled,

---"OUR" MR. JENKINS.

But only the end is rest.

I was fortunate in my uncle. So everybody thought, for Uncle Braithwaite was as wealthy and thriving a manufacturer as any in Lambeth, and I, his dead sister's son, Cyril Vaughan by name, was not merely drawing a fair salary, with the prospect of a partnership, but was actually engaged to be married to my second cousin, reputed a great heiress de r. sweet Lucy Braithwaite-the old man's only child. A se ere, just man was John Fraithwaite. He had won his own way in life by rigid self-denial and unwearying industry during a joyless youth, and I doubt it he ever thoroughly enjoyed the fruits of his well-earned prosperity. It was only when his eye rested on his daughter's pretty face that his stern look relaxed. Lucy reminded him, doubtless, of her gentle mother. But he was a good master to a good servant, notably where he, who was by nature and habit suspicious, could repose full trust. He did so in his confident al clerk, Jacob Jenkins. That head clerk was one out of a thousand. " Respectable Jenkins" was the nickname by which irreverent youngsters in the counting house spoke with bales breath of that pearl of clerks: but even those pert office lads had a be-Lef in the man be was so respectable. with his lean, well-shaven face, his neatly-brushed suit of formal black, and his square-tood boots. Never, as I have toll h d honest lenkins been known to ask for a holiday, to shirk extra work, a thing of moment with a firm like ours,

poor merits, if I had any, were quite eclipsed by these of that commercial comet, Jenkins. Indeed, I know of no reason, except my blood relationship to our principal, head of the house of Braithwaite, Perry & Co., for any comparison between that veteran of the

desk and my inexperienced self. Put my uncle often said, in his gruff way: Take Jenkins for your model" or "Cyr.l, lnd, it will be one while before you fill Jenkins' shoes' see how neatly he settled that business with Chanvin et Fils of Bordeaux, and how eleverly he avoided the heavy loss of that 'ast shipment when Krakow and Kindergarten, of Hamburg, were going to

Yet I stuck to my work young as I was, and did my best not to be undeserving of the prospective partnership, and somehow I got a ag e impression in my head that instead of my being jealo s of

I e than a scientific and practical renovation. The country road-maker comon to the side of the road, retaining the smaller ones, when by thoroughly "bedding" the big stones the best and in a military un form, with a possible foundation is had and with a covering of small stones mixed with gravel, or even with good loam carefully harrowed and scraped, a roadbed is formed which will defy both rains and heavy teams. Generally the tyro devotes his time to heaping the maas often to interfere with locomotion. and which heap the first heavy team resolves nto deep ruts, vitiating its usefulness for any but a similarly heavy team and for it only with constantly increasing strain on the horses. Yankee ingenuity has invented capital road-making tools which need but intelligent anplication to develop such thoroughfares as would make them admired in place of being a reproach and shame. Our country is rich enough to place the roads in the hands of such government as will insure their perfection instead of leaving them to town officials without the education or experience necessary to an accomplishment of the object. - Hartford

The Water Supply.

Pure water for household use is of the should be had that it is pure, because none other is fit for domestic use. Everything impure should be kept at a distance from the well, and it should be so constructed that no surface water can get into it. Where a well can be driven it is undoubtedly the best, because nothing can get into it without filtering through the ground; it is considerably cheaper, too, than a dug well. In digging a well peop'e very often make a mistake in not going deep enough. It is apt to be the case that soon as a vein of water is reached, it is supposed to be sufficient, even if it is small, and so after going down far enough to make a little reservor it is stoped up and the result is that the next summer, perhaps, the well is dry. This is very annoying, besides being an expensive jo . I speak from experience. By not digging deep enough the well fails occasionally, and contemplate dr ving one near by so as to have, I hore, a never-alling sup-ply. Water is needed in abundance at ply. Water is needed in abundance at the farm buildings, and it shou'd e provided somehow, either by springs, well, a cistern, or else brought from a distan e in a pipe. The best time to d'g a well is during a severe drought; and if a good vein is then reached, but little cles of the Athanasian creed?" was fear need be entertained that the supasked an old lady.
