AN UNFINISHED POEM BY BRY. cab ANT.

The reader of Mr. Bryant's poems will readiis remember the many verses addressed to his such as "On Fairest of the Rora. written about the time of the r u risge; "The Future Life," speculating as to the union of their sp rits in the works to come; the "Sick-Bed," describing an illuess; "The the "Sick-Eed," describing an illuess; "The Life That is," rejoic ng in recovery; "The Twenty-seventh of March," the brithday of Mrs. Bryant: "October, 186," descriptive of ber death aud bur al; and "May I vening." a gentie reference to her loss. But in add tion to these, as we learn from Mr. Godwin's torthout ng biography of the post a fragment was ound am ng his papers, which recalls her memory in a very tender way, seven years after her doath. The lines we e unfinished and uncorrected; but we cannot refrain from giving them as they were written-dated "Ros-

The Needs o' Farmers' Sons,

At the recent meeting of the New England Agricultural Society, Boston, the late I resident Chadbo rne, of the Massachusetts Agricultural College, spoke upon the education of farmers' sons. He advised the establishment of such societies as were useful, insomuch that they bring the larmers together to eschange views. Nowadays farmers have become a le to hold their own with other people in discussion, and knew what was re mired. He had himself inherited a arm which his grand ather had before him That gentleman planted large orchards of ap les to make eider, which had been a curse, but peop c now were learning lessons from the past. As a consequence, farme s were making their homes what they ought to be, more agreeable, so that their boy- would become fond of the work before them. For forty years he had found that a farmer who would not

give a cent to educate a son on the farm, would even go so far as to mortgage his property to give him a skilled trade or a p ofession. One hall the money spent on farms he considered was wasted for want of useful knowledge, and the sons ought to be taught that a riculture was e ual to the professions in the thought required to carry it on. If farming was to be so conducted that a man without thought could arry it on, then good men would be driven away. To be a successful farmer there was nothing which rewere driving the children away from
