**Trunks & Valises.**

(Continued from last week.)  
**How Watch Cases are Made.**  
In 1875, thirteen men comprised the entire working force used in the manufacture of the James Bosse's Gold Watch Case. Now over five hundred are employed, and the number is constantly increasing. The reason of this increase is this: In the James Bosse's Gold Watch Case all the metal in sight and subject to wear is solid gold, while the remainder, which only lends strength to the case, is of stronger metal than gold, giving gold where gold is needed, and strong, elastic metal where strength and elasticity are needed, a combination producing a watch case better than solid gold and at ONE-HALF the cost.  
Over 200,000 of these cases have been sold, and every jeweler in the country can testify to their quality and merit.  
L. W. HARRIS, of the Bessemer, bought a James Bosse's Gold Watch Case 18 years ago, and carried it until a short time ago, when it was sold to a customer. The case showed no signs of wear, except that natural to any case, and I am satisfied can be safely guaranteed for at least ten years more. I have sold the James Bosse's Gold Watch Case for many years, and the parties who bought the first ones are still wearing them to-day, as well satisfied as though they had bought a solid gold case costing twice the money. I regard them as the only cases of this kind a jeweler should sell who desires to give his customers the worth of their money or value his reputation.  
Wm. J. CURSWAY, Jeweler.  
Send 5 cent stamp to Keystone Watch Case Factory, Philadelphia, Pa., for handsome Illustrated Prospect showing how James Bosse's and Keystone Watch Cases are made.  
(To be Continued.)

  
When you come to think of it, it is not odd that literary people prefer a pipe to a cigar. It is handier to smoke when they are writing, and ever so much cleaner. And then it gives them the true essence and flavor of the tobacco.  
The most fastidious smokers among all nations and all classes of men agree that the tobacco grown on the Golden Tobacco Belt of North Carolina is the most delicious and refined in the world. Lighter than Turkish, more fragrant than Havana, freer from nicotine and nicotine than any other, it is just what the connoisseur requires and the habitual smoker demands.  
The very choicest tobacco grown on this Belt is bought by Blackwell's Durham Tobacco Co., and appears in their celebrated Bull Durham Smoking Tobacco. It is known the world over. Get the genuine, with Bull trade-mark, then you will be sure of having absolutely pure tobacco.

For sale by Henry Cook.

**THE RED CLOUD CHIEF.**  
A. C. HOSMER, Proprietor  
FRIDAY, MARCH 21, 1884.  
Gowns for Judges.  
David Dudley Field, a famous New York lawyer, in behalf of the New York Bar Association, has asked the judges of the Court of Appeals of that State to wear gowns hereafter, similar to those in use among Episcopal clergymen, and which indeed is the uniform of all English judges as well as the justices of the Supreme Court of the United States.  
It has also been proposed that when judges enter a court room the lawyers and all others within its walls shall rise and stand uncovered until they are seated. It is thought that the greater respect thus shown to judges, and the sense of sacredness which will thus attach to the office, would raise the tone of our judiciary and improve the morals of the bench.

**Solid Facts and Logic.**  
The Bessemer steel rail manufacturers of the United States have already closed contracts for from five to six hundred thousand tons of rails to be delivered within six months at an average price of thirty-five dollars per ton. While in 1870 and prior to that time railroad builders were compelled to pay English manufacturers from \$110 to \$116 per ton for the same kind of rails. Thus, has the high protective tariff on steel saved this country millions of dollars besides fostering and building up an industry in which millions of money is invested and employment furnished to thousands of laborers whose daily bread must come from the fertile farms of the west. Will Dr. Miller or the Free Trader please demonstrate where in this has been a robbery upon the American people and draw free trade logic therefrom?—Wahoo Tribune.

**Glass Houses.**  
It is now said that the house of the future will be of glass. The manufacture of that transparent material has reached such perfection, that it is claimed a glass house would be superior in every respect to one of wood, brick, or stone. Glass can be cast in any shape and in blocks of any size. It is quite as hard and durable and would not be more costly than granite. It will take any color and be made to imitate very perfectly any known precious stone. The proverb about the danger of throwing stones in glass houses is a mistaken one, for huge cobbles stones would not hurt the material under consideration. What a splendid sight would be a city of glass! How it would sparkle in the sunlight and reflect all the colors of the rainbow! Some of our young readers may live to see not one but many cities of which the houses will be mainly of glass.
