C. Craw has succeeded in producing

An Opera House and Skating Rink in Red Cloud.

During this week plans have been formulated for the building of an opera house and skating Rink in Red Cloud. This has been a long needed institution in this city, and at last some of our enterprising and public spirited young men have taken the matter into their hands and will commence the erection of a building 40x100 feet on the lots just north of L. Baum's residence or Webster street. We do not see how : a more beneficial enterprise could have been started in Red Cloud, one too, that will return the stockholders big money on their investment. The company will be known as the Red Cloud Building Association, and the stockholders and incorporaters are John Shirey, L. H. Wallace, G. S. Albright, Dave Kaley, and Charley Platt. The boys propose to make a fine hal with twenty feet ceilings, and put in a good stage and scenery so that the citizens of Red Cloud will have a place to go and hear ent attimpents with some degree of comfort. This will give Red Cloud a chance to secure some fine shows. Aside from this the boys propose to fit up the floor so that it can be used as a roller skating rink. This will be a means of furnishing our fun loving people with a host of amusements, The enterprise is a worthy one and THE CHIEF hopes that the stockholders was largely attended, there being a will make a mint of money out of their scheme, and we heartily join in with the balance of the citizens in wishing Mr. Tobin's death, were very impresthem all the success possible and a liberal return from their investment. The building will cost in the neighborhood of \$4,000 and will be a credit to
