Just as I took the reins in my hand an old woman halled me. I recognized her as the mother of one of our factory hands-an Italian, who had "I beg pardon, miss," she said, with her peculiar accent, which I should find it impossible to imitate; "but will my son get his pay to-day? They told me the hands would not be paid, and I am anxious."

"Yes, yes," I answered. "Don't be afraid. They will be paid. Mr. Pellico is sick, but I have come to get the money myself. It is all right.' "Thank Heaven!" said the old womand "we are so very poor at home,

Her cook never knows how many people are to be present at breakfast or dinner. for Sarah thinks nothing of inviting in an extra dozen or so of guests. She

She has made and squandered three fortunes, is always dying and never dies, is as fragile as a reed, yet tires out the strongest men of her troups when she goes upon a professional tour. This latter peculiarity is owing to her exceptional power of sleeping whenever she chooses. She always travels in a sleeping-car, and once ensconced therein, she will draw she. And if miss would but let me down the blinds and betake herself to ride with her to my house. It is on the slumber. there runs a river with gold-bearing sand, once a very Pactolus for wealth to its owners. It lies on the southern coast of the desolate rainy sea, which was the terror and despair of primitive navigators. The country of old was subject to depredations of covetous princes and barbarian hordes, and the famous water-course, glowing with grains of gold, was guarded well for its estimable treasure. So rich a mine, not in narrow fissures, but a sparkling flood, naturally became the resort of speculators by land and sea. Its value "I cannot stay," I said. Anciently, and even in historic times, the unskilled miners of Colchis, shepherds through many generations, used to lay a sheepskin in the bed of the shallow stream, which we would hardly call a river. The wool caught and held the shining sand in its thick mat; it was then hung upon a tree, and, when dried, the particles of precious dust were shaken out; and lo! you have the whole fable of the Golden

How Watch Cases are Made.

(Continued from last week.)

Imitation always follows a successful article, and imitation is one of the best proofs of real honest merit; and thus it is that the James Bose Gold Watch Case has its imitators. Buyers can always tell the genuine by the trade-mark of a crown, from which is suspended a pair of more wax scales. Be sure north crown and to a scales are stamped in the cap of the watch case. Jewelers are very cautious about endorsing an article unless they not only know that it is good, but that the character of the manufacturers is such that the quality of the goods will be kept fully up to standard.
