Quanto, Cax., October 13. Early yesterday afternoon an explosion Semarkable Eshibition of Enthusiasm occurred at the Parliament building, destroying a considerable portion of the mayonry and windows of the new building, which is just being roofed in. The explosion at first was supposed to have been the belier of the engine used for holsting material, but this was found not to be the case. Neither can it be attributed to gas. The general impression appears to be that the explosion was caused by dynamite, but as none of this ingredient is used on the works, the mystery is h w A: near'y every place they it came there. The workmen all being were compelled to personally receive Moran, the ball entering the man's back away at dinner, nonody but one man was their admirers and indulge in handinjured and he escaped with a slight cut shaking civilities. Mertel, a workman, and Charlebuls, contractor, were the only persons injured, and those but slightly. The damage by the first explosion was a coasiderable hole of about twoive feet by five wide, blown out of the wall on the third story, and directly over the right hand entrance to the assembly chamber, and near the place where the speaker's chair is situated. The second explosion occurred in the northeast corner. Tae stone forming he support of the building is badly buiged, and it is doubtful if it can be repaired without letting down the whole wall. Whatever reason there may be for wishing the destruction of the building, there is no room to doubt that dynamite was used. A searching investigation into the cause of the expression is now in progress. Everything is quiet in the neighborhood, and a section of the battery is patrolling the grounds about the building. The Government was walting the completion of the building to call the house together for the dispatch of business. The building had been so far advanced that only part of the roof remained unfin-

Regarding the cause of the explosion the French employes state that the work was done by Irish dynamiters. While some Irish citizens think, and the opinion is shared by a great many, that the French workmen did the deed with a view of injuring the contractor, but for what reason is not apparent, as it is said the contractor and the men are on the best terms. Serious trouble is feared between the French and Irish should the accusations be ca ried much further.
