Acme Pulverizer

How rarely does a farmer contemplate a

newly harrowed field with satisfaction? He

walks over it and sees how, and there seed un-

der the soil is still scattered because

the surface was not quite level, and then

a bunch of stubble drawn into a heap having

dragged across the field, and then the harrow

that would do the work perfectly, leveling

the rough places, breaking up the clods, and

so forth, has been used, so that it over-

the seed so that this is all covered, an

even depth, and without waste. But the farmer

who uses the Pulverizer, Harrow, God-

crusher and lever has none of the

disappointment, for his fields are leveled

and smoothed, and the property

is plowed and ready for the next

crop.

examines all

themselves as

non schools

and examinations

Acme Pulverizer

How rarely does a farmer contemplate a newly harrowed field with satisfaction? He walks over it and sees how, and there seed under the soil is still scattered because the surface was not quite level, and then a bunch of stubble drawn into a heap having dragged across the field, and then the harrow that would do the work perfectly, leveling the rough places, breaking up the clods, and so forth, has been used, so that it over-the seed so that this is all covered, an even depth, and without waste. But the farmer who uses the Pulverizer, Harrow, God-crusher and lever has none of the disappointment, for his fields are leveled and smoothed, and the property is plowed and ready for the next crop.

The original letter from which the above is extracted, was written by a man who had

been a harrow manufacturer, in easily strong terms, and the author of the letter will be shown to any one calling at our office.

It is the opinion of the author that the Pulverizer is the best and most economical device to guard against imposition.
