There are now eighty-one boarding schools, seventy-six day schools, and six industrial or labor schools under Government control. Fourteen boarding and four day schools are supplied with teachers and other employes, by some one of the various religfous denominations, the Government paying a stipulated price for the care and education of the children therein. This course has my direction, it has been necessitated by lack of sufficient appropriations to provide for all the children willing to receive an education. The amount paid is somewhat less than the average cost per capita of children maintained in Government schools. There are also twenty-three schools maintained by churches and associations without expense to the Government, and to the support of which the Govern-ment contributes nothing. Three new industrial schools have been completed and put into successful operation during the last year. One at Chilocco, Indian Territory, with a capacity for over 150 children; one at Law-tence, Kansas, with a capacity for 300 children; and come before the Judge of the come before the last of the dren; and one at Genoa, Nebraska, with a capacity for 150. The Cholocco school was opened January last, and although its capacity was only rated at 150 children, its average attendance has been 168. The Genoa school stockmen with their is situated on the old Pawnee reservation in is situated on the old Pawnee reservation in Nebraska, was opened in February last with an attendance of 140 Sioux. The boys have the part of the india. cultivated six acres of potatoes, several as licences out e part neres of garden truck, 140 acres of corn, and nized by section 2117 of sixty acres of oats, and assisted in making brick and other work about the place. The completion of the buildings at Lawrence, Kan., was delayed by the cold weather as well as delay in the payment of the contractor; the First Comptroller holding that the the money intended for that purpose was not available. Congress authorized the use of the . Congress authorized the use of the appropriation as first intended, and the work was resumed. The buildings, however, were not completed until in July, too late to commence school for the season. Seven boys, gard the license so give transferred from Chilocco to Lawrence, and question that not not under direction of the Superintendent of Parming, and one white laborer, cuitivated about one hundred and twenty acres of corn, cats and millet, several acres of potatoes, etc., and have helped erect a barn and other buildings. The school was open for the fall term with an attendance of one hundred, which will be increased to three hundred. A new school building has been erected at Albuquerque, N. M., intended to accommodate about one hundred and fifty children. Under the provisions for the placing of In-dian children in industrial schools in States, some training in manual labor schools, have been placed in private families, mainly from Carlisle and Hampton. It is believed that bereafter quite a number may be placed in private families from Genoa and Lawrence.

tory of a few manual-labor schools estab-lished for the education of Indian children has demonstrated their great value, and that it is only necessary to multiply their number, so as to include all the Indian children of school age, to forever set at rest the question in honest compliance on the part of the ies with the various tribes concerning schools will substantially provide all the schools required for the education of all the children of school age whose attendance we can hope to secure. The amount due under the various treaties to the several tribes berein named, I gave last year as amounting to the total sum of \$3,759,400. The amount...now due after deducting all appropriations for school purposes part of the money so agreed to be paid was in consideration of land ceded to the Govrnment by the Indians. It is not a gratuity, but a debt due the Indians, incurred by the Government on its own motion, and not at the request of the Indians. It is true that the debt is due to dependent and weak peo-ple who have but little disposion to complain of the neglect of the Government to fulfill its pobligation and are wanting in ability to com-pel the performance thereof; yet their weak-ness and lack of disposition to complain ought to stimulate the Government to sa-

ought to stimulate the Government to sacredly perform all the provisions of treatles providing for the education and advancement of these people. Not only a direct regard for our plighted faith demands this, but our interest also demands it.

In my last annual report I called attention to the various treaties providing for the education of Indian children. I submitted a statement for the sum required to fulfill such treaties. It appears that there was due at the close of the fiscal year 1884 the sum of \$2,759,400. I again submit the statement showing the amout due at the close of the fiscal year 1885. Statements showing amounts which should have been appropriated up to January 30, 1886, to fulfill educational provisions of the treaties of various Indian 2ribes:
