Scott, together with copy of his reply to you, reached me at this point on my arrival from Dodge City vesterday P M. I find here such a mass of correspondence which requires immediate attention that I am com pelled to be quite brief in reply to your request for points. The corporation is formed under Kansas laws and composed of Kansas men, some of whom (notably so J O Hill) are thorough busness men and practical railroad men of great experience in the construction of Kansas railroads. The purpose of the corporation is to connect by a short and direct line the railway system of Nebraska with that of Texas by a line of road from somewhere about your point in Nebraska in a southwesterly direction through Kansas, Other property..... crossing the Arkansas river at Dodge Railroad property..... City, thence in a general southerly course to south state line west of the 100th meridian, across the 35 mile etrip of the Indian Territory, and into and through the Texas Pan Handle to connections with the Texas roads that are already pointing northward with their extensions. For the last week I have, together with our chief engineer, been investigating the country lying between here and Dodge City and find an entirely practicable route, and the sentiment of the people entirely in its favor, and the character of the country all that could be desired only that it is undeveloped by a railroad. I have had papers giving notice of our actions so far sent to your mayor and postmaster. I will be bere till sometime next week, probably about the middle, and then will go north through Rooks and Smith counties. Kansas, and to your town. I sent the engineer back to Dodge City yester-THE editors family are temporarily eay to join his corps, and he will commence to lay in the line from Dodge north, probably about next Monday. would like very much to know what, interest your people feel in this enterprise and what assistance I might reasonably expect from them in aiding them in the preliminary work.
