course of justice, to a reporter while fanning the blue cloud away, "I've known personally nearly all the criminals that have amounted to anything in the last twenty-live years. Men of brains? Well, I should say so. If the cause of education had such men of heroism and genius enlisted on its side how much better the world might be today, and how much poorer I might be! ness there is in the world, and yet I long ago made up my mind that we tian fortitude. This is really a very pleasant cigar."

Here the lawyer crossed his legs and sighed with an air of delicious contenttwinkled as he gently rubbed his chubmore cozily in the chair.

DIFFERENT KINDS OF BURGLARS.

"I long ago learned to distinguish between criminals in a way that the ordinary public seldom understands. Now, take the burglar, for instance. He is a fine, romantic figure, and yet burglars differ in their spheres as Prof. Vir how, the great anatomist, differs from an ordinary coroner's assistant. In the lower walks of life we have the common burglar, the tramping vagabond who breaks into a house upon the asleep, and that he may find something worth stealing. Such men seldom rise in life and are mere drags upon modern civilization. I always think of their poor lawyers with a feeling of prodrunken burglar comes next in the scale. He loafs around bar-rooms all day, swigs beer and whisky until his brains are all fuddled, and at night he breaks into some unprotected grocery store. Now I come to a very interesting class of people, who are generally chaperoned by persons like a certain dear old lady now in Canada who shall be nameless. These burglars send young women-in most cases their own sweethearts - to intelligence offices in order to get situations as servants to wealthy families. These servants learn where the family valuables are kept. study the habits of their employers, and then, at the right hour, leave the ored criminals use this scheme very a few months ago that Gertrude Ash. in the house where she was employed, waited upon as it he was a Prince.
