It has been stated that owing to the fact that the county changed to the commissioner system to that of board of supervisors that the officers elected last fall would have to be re-elected this fall. This is a mistake, as the officers elected last fall will hold their offices until the next term expires.

THE Chicago, Nebraska, Kansas & South-western Railway should begin to materialize soon if they come up to their part of the contract. We hope soon to be able to report work on the road. According to the terms of the proposition the work must begin by May 1, 1886, or the bonds will be null and void.

KANSAS papers think that the Rock Island railway will cross the river at Superior and from there pass through Jewel and Smith counties west. THE CHIEF does not believe that the Rock Island can afford to do such a thing when for the same expense could tap a country surrounding Red Cloud that would be much more remunerative to the company. Red Cloud wants the Rock Island road and we believe the Rock Island wants to and will come to Red Cloud, and will do so on any terms.

THERE was quite a lengthy remonstrance presented to the council Tuesday night praying that the saloons should not receive license.

Mrs. KING, State Installing Officer for the W. R. C. of Nebraska, gave a very pleasant address to Garfield Post No. 80, G. A. R. last Monday night.

W. N. KING, the editor of the *Helmet*, has leased his office to Grant Ludlow, who will run it in the future. Grant has the ability to make a first-class paper out of the *Helmet*, and we wish him success.

It is hoped that some of our interested capitalists will make an effort to establish a canning factory in Red Cloud. It could be gotten up on a very small capital to start with, and would at least make a good market for canning goods.

A. A. POPE, our live and wideawake agricultural implement dealer sold in three days last week nearly \$5000 worth of agricultural implements. This is an immense sale and Mr. Pope is to be congratulated on his success. He has purchased thirteen car loads of implements so far this season for his trade. Read what is said about it in another column.

THE people of this and adjacent counties should be very careful how they purchase from traveling agents, who just come into the state to beat and defraud the people. Foreign lightning rod peddlers, foreign implement agents, etc., are very numerous in the county. THE CHIEF would advise the farmers to purchase from home agents who are trustworthy and honest. By so doing you will leave your money at home and will not pay yourself open to being swindled.

WE hope the voters of Red Cloud will use due caution on election day, and elect only the best men to city offices. The coming year is an important one for Red Cloud, and due consideration in the selection of city officers should be made. A good board of alderman and an enterprising thorough business man for mayor are necessary adjuncts to every well regulated city. The local option question will enter into the subject, but in the turmoil the voters should not lose sight of the fact that there are many questions that will come up during the next year that will need decisive action on the part of the council, and therefore the fitness of the men should be an important factor.

MR. R. L. TINKER, who for many years has been closely identified with the business interests of Red Cloud, has disposed of his stock of furniture to Mr. Frank Taylor, of Clinton, Illinois. Mr. Tinker has been a generous and enterprising citizen, and at all times has been interested in the welfare and growth of the city from its first inception, years ago, when it was but a speck upon a vast prairie with only a settler here and there, and at that time many miles apart. Mr. Tinker will certainly be missed from among our active business men, but we understand will make Red Cloud his home as of now. THE CHIEF is sorry to lose him from the business circles, but in whatever corner of the world he may roam in the future we shall wish him success and prosperity.

THE Red Cloud and Amboy flouring mills are considered two of the most complete mills in the state of Nebraska. The capacity of both mills is in the neighborhood of 200 barrels per day, and the flour therefrom is the equal of any made in the state. Such institutions as these are a credit to Red Cloud and Webster county and the projectors should receive the encomiums of the people for their enterprise in maintaining and operating the mills so satisfactorily. The cost of both mills as they now stand is from seventy-five to one hundred thousand dollars. THE CHIEF hopes the incorporators will make a mint of money out of the enterprises.
