Let us hope that the magnetic ourrent through which the fusion was accomplished prefigured a sympathetic intercourse between the parties as lively, but not quite as evanescent, as the lightning's flash. A MEXICAN STORY.

How the Wise Town Councilors of Lages Discovered Their Own Legs. Once, upon a great festival, the town council of Lagos went to the parish church to hear the mass. And all the members of the council were dressed in seemly state, in black coats and tight black trousers and flowing cloaks, and each wore a wide-brimmed hat of black felt, over which a feather gallantly curled. For their comfort a leather-covered bench was placed before the chancel rail. And when they came to sit each man in the order of his dignity sat down upon the beach and placed beside him his hat. But when six of the twelve councilors thus were seated the beach was full. Then a whispered conference was held, and it was decided that the bench must be stretched. So six of them took hold of one end and the other six took hold of the other end and they pulled hard. Then they came to sit again. And the first councilor put his hat beneath any thing between breakfast and dis- the bench, and the second did likewise, and so did they all. And they in all in comfort sat down, by which they stretched the beach.

Being thus seated the first councilor crossed his right leg over his left leg. and so did the second councilor, and so did they all. But when came the time in the mass when all must rise black trousers, and were crossed. And each man looked at the many legs, among which were his own, and sorrowfully wondered if he ever should know his own legs among so many. and so be able to arise and walk.
