The New Orleans Grand Jury Virtually Sustains the Recent Lynching—The Hou-seasy Jury Bribed By the Mails and the Course of Justice Perverted. NEW OBLEANS, May 6.-After six weeks, investigation the grand jury completed its labor in the Hennessy case and the killing of the Italians at the parish prison by presenting a velaminous report virtually exoperating the lynchers on the ground that it was

The extended range of our researches ha Seveloped the existence of the secret organion styled "Maffa." The officers of the Mafia and many of is members are now known. Among them are men born in this city of Italian origin using their power for the

The larger number of the society is composed of Italians and Sicilians, who left their native land in most instances, under assumed names, to avoid conviction and pun ishment for crimes there committed, and outlawed in their own land, seeking the city of New Orleans for the congenial companlonship of their own class. These men know the swift retribution of the law in Italy, for hundreds have been shot down at sight by the military in the mountains of Sicily with out second thought. To day there is recorded in the office of the Italian consul in this city the names of some 1,100 Italians and Sicilians landed here defing several years past, showing the official record of their criminality in Italy and Sicily. Hundreds of them are among us to-day. We doubt not the Italian government would rather be rid of them than be charged with their custody and punishment.

such is the well known character of a part of the Italian colony, as it is called, who are domiciled in this city and vicinity. It can not be questioned that secret organizations whose teachings are hos lie to the fundamental principles of the government of the United States must be a continual menace to name of Mafia, Socialist, Nationalist, or whatever it may be, whether located in New Orleans, Chicago or New York, the meetings of their members create and disseminate se toward overt acts whose commission par takes of the rankest treason.

The necessity for restrictions in in migration from Italy especially is pointcongress to quickly enact such vigorous henceforth against these evils.

At the same time we shall plainly from our own experience that a large part of the Italian colony in this city is recog the truit and oyster business has drifted into the hands of the Italians, the volume try on this earth would extend to any newcomers such privileges, and what do others of foreign birth, should conform to existing laws by which their persons and property are protected; to assimilate in thought and deed with our people in denouncing the wrong and upholding the right; to rise above the fears and persua sions of secret societies, helping to crust their power; and above all else showing an illegiance to the principles of the national and state governments with no doubtful fidelity, realizing that the one flig, as the emblem of freedom, is not less the index of a nation's power, is the stars and stripes,

The United States marshal arrived at this port about midnight last night with the news that the schooner had eluded him. One of the deputy marshals who was stationed at the mouth of the harbor in a small boat to keep a look-out says that when the Etata passed out the pilot was standing between two armed Chilians while four cannon guarded bow, boat and stern.
