

GOSPEL WITNESSES.

Dr. Talmage Talks to a Large Audience in Kentucky.

Speaks Answered by Modern Wonders—Living Witnesses to the Truth of the Bible—Value of Faith—Power of Religion.

T. De Witt Talmage preached to a large concourse of people recently at the historic camp ground at High Bridge, Ky. His text was from Acts 11: 15: "We are witnesses."

Standing amid the hills and groves of Kentucky, and before this great multitude that no man can number, most of whom I never saw before and never will see again in this life, I am preaching a very practical theme. In the days of George Stephenson, the inventor of the locomotive engine, the scientists proved conclusively that a railroad train could never be driven successfully without fuel; but the great success of the locomotive was not in the fact that it could run on fuel, but in the fact that it could run on coal.

Now, let me play the skeptic for a moment. "There is no God," says the skeptic, "for I have never seen him with my physical eyesight. Your Bible is a pack of contradictions. There never was a miracle. Lazarus was not raised from the dead, and the water was never turned into wine. Your religion is an imposition on the credulity of the people."

The fact is that if this world is ever brought to God it will never be through argument, but through testimony. You might cover the earth with apologies for Christianity and learned treatises in defense of religion—you would not convert a soul. Lectures on the harmony between science and religion are beautiful mental disciplines, but have never saved a soul and never will save a soul.

I want just now to put before you three propositions which I think will attest with overwhelming unanimity. The first proposition is: We are witnesses that the religion of Christ is able to convert a soul. The Gospel is a power that has done more for the world than any other subject as on this. People laughed at the missionaries in Madagascar because they preached ten years without a convert; but there are many thousands of converts to-day.

There is a man who for ten years has had a hard drinker. The dreadful appetite had sent down its roots around the palate and the tongue, and on down until they were interlinked with the vitals of body, mind and soul; but he has not taken any stimulant for two years. What did that? Not temperance societies. Not prohibition laws. Not moral suasion. Conversion did it. "Why," said one upon whom the great change had come, "I feel just as though I were somebody else. There are thousands of people here to-day who are no more what they once were than a water lily is a night-bloom, or a morning lark is a vulture or day is night."

AGRICULTURAL HINTS.

PRODUCING PORK.

Quick Money in Live-Stock Growing is Usually Found in Hog.

Spring pigs during the first three or four months of their existence may be grown and developed in frame by constant pasturing, and feeding twice daily on slops made of bran and shorts, mixed with a small amount of rye, corn or barley, peas may be substituted. Constant access to wood ashes and salt is desirable. The best plan is to provide a V-shaped hopper about 5 feet deep, 4 by 6 feet on top and 6 by 1 foot at bottom, opening into the trough about 7 by 2 feet, with edges of trough 2 inches higher than bottom of hopper, thus guarding the mixture of ashes and salt from waste.

It is a mistake to think that a pig is a simple animal. It is a very intelligent creature, and it is capable of learning a great deal. It is a very curious animal, and it is very inquisitive. It is a very stubborn animal, and it is very obstinate. It is a very greedy animal, and it is very voracious. It is a very dirty animal, and it is very filthy. It is a very noisy animal, and it is very quarrelsome.

A PERILOUS CALLING.

The "Steeple-Jack" and His Method of Proceeding.

In the great cities of England and in several of those of America a small number of men follow the trade of climbing steeples, great chimneys, monuments and other lofty structures, to make repairs, put up lightning rods, apply paint and do other things which are needed. The men who follow this perilous occupation are frequently called "steeple-jacks," and they are, as a rule, proud of their occupation, and not in the least ashamed of it.

It is a very dangerous occupation, and it is very hazardous. It is a very difficult occupation, and it is very arduous. It is a very risky occupation, and it is very uncertain. It is a very lonely occupation, and it is very solitary. It is a very quiet occupation, and it is very unassuming.

MANGER-EATING HORSES.

How to Keep Them from Destroying the Work of the Stable.

Nearly all horses get the habit of biting the post, rail, fence or tree to which they are tied, and such habits are so indubitably practiced in the stable that the manger and woodwork are sooner or later demolished. Mr. J. A. Gillen.

CHINESE SUPERSTITIONS.

Some Strange Observances Concerning the Living and Dead.

While still unable to walk a Chinese child has placed before him on a table sundry objects, including a sword, a bow, a pen, some pearl powder, rouge, hair-pins and other miscellaneous articles. He is then allowed to crawl towards them, and by a judicious selection of the character of his future career. Should he bow before the sword or the bow he will become a great warrior. If for the pen, his fame as a scholar will come.

Away with the wash-board Use Pearline. As long as you use the old wash-board there'll be hard work and what goes with it, and can't be taken from it. That's what it was made for. It's the rub, rub, rub, on the clothes. It's the wash-board that wears you out. You don't need it. You don't set apart a day for washing the dishes. Wash the clothes in the same way, with no more work, a few at a time. But you'll have to use Pearline to do it. Pearline only can rid you of wash-board and hard work; with it you can do your washing when you like. And you can do it safely, too. Directions on every package.

"IGNORANCE" of the law excuses no man, and ignorance is no excuse for a dirty house or greasy kitchen. Better clean them in the old way than not at all; but the modern and sensible way is to use SAPOLIO on paint, on floors, on windows, on pots and pans, and even on statuary. To be ignorant of the uses of SAPOLIO is to be behind the age.
