For Coroner, C. SCHENCK.

### The Situation.

Only a few days more before the people will be called upon to decide who shall be the next officers of Webster county. Our advice would be to vote for the republican ticket as there cannot be a word said against them, and as to competency, there can be no question nor can one be raised, on the other hand there are numerous objections to the independent ticket. The office of county judge and superintendent more especially should be held by men who are fully competent, as the duties devolving upon those officials are such that one should be a thorough student in books while the other should be thoroughly versed in law. Neither man on the independent ticket is qualified, one way or the other to hold these offices, while there is not a candidate on the republican ticket but what could hold any office satisfactorily to the people. If these were the only reasons, they would suffice but there are other valid reasons why the independent movement should be knocked out. 1. The party is the voice of anarchy. 2. It is the breeder of revolution. 3. It has no particular fixed principles by which a voter can tie to and feel safe; and in fact many other cogent reasons can be produced, but the first three ought to decide any man to withdraw from the party who loves his country. Loyalty to the flag should be the watchword of every true American. Many voters went over to the independent ranks last fall in the hope that some necessary reforms might be accomplished. But alas, their hopes were blasted. It seems to be a free for all scramble for office, the reform question being secondary to "give me an office" first, last and all the time. Therefore the men who honestly thought there was a show for reform have become disgusted and returned to the old party where they will get the reforms sooner than through the third party language. To prove our assertion, the last legislature was independent by a large majority, and yet was the most rotten legislature that has ever been elected. The appropriations made by that body were more than \$450,000 over that of any preceding assembly. Out of

that amount can be taken \$200,000 for aid to the sufferers from drought, and the neat little sum of \$250,000 still remains for the reform legislature to explain. Instead of reform, it was extremely the reverse. Half of their time was fooled away in idleness and foolish junketing trips. Then again they were responsible for the eight hour law, which compels a farm hand to work from five in the morning until nine or ten at night, while a city chap can go to work at eight and quit at five. A more unjust or nonsensical law could not have been framed to the farmer. When you ask one what they did they will say: "We passed the Newberry bill, we did, with our little hatchet." The bill was so unjust, and so unqualifiedly unfit to put on the statute books, that even a democrat would not sign it, and then the wideness didn't have the moral courage to pass it over his head. The great hue and cry of the party, that the republicans are tied to corporations is all moonshine. No party since the foundation of the government has done more for the people, and these independents know it. Now friends, do not be hoodwinked any longer, but vote for the republican ticket and thereby give demagogues and anarchy a black eye. If you want the times to continue close keep harping against capital, and vote the independent ticket, and you will be able to gain your wish. On the other hand, try to harmonize labor and capital, and you will find a big change for the better in a very short time. Try it. The independents will not be in it in November. The people are tired of so much foolishness as is incorporated in the great "I want office" party.

**Is not a Candidate.**  
EDITH CHIEF. Please say through your columns that John M. Chaffin, of Guide Rock, has not been, is not now, and will not be an independent candidate for county judge at the ensuing election. JOHN M. CHAFFIN.

The following Red Cloud physicians have received certificates to practice from the state medical board: R. DENNEY, M. D.; I. W. TALLEY, M. D.; G. E. McKEE, M. D.; J. W. MORANVILLE, M. D.; L. D. DENNEY, M. D.

**Qualifications.**  
D. M. Hunter the candidate on the Republican ticket for County Superintendent received his education in the public schools Pennsylvania, at Mercersburg College, Pa., and at the Cumberland valley-state normal school located at Shippensburg, Pa. He attended college and normal school more than four years, graduated at the normal school in 1878 as valedictorian of his class. He passed an examination and received a first grade certificate in Webster county, in 1880. Prof. Picking having charge of the examination for Mr. Springer. His normal diploma is good for life in the state of Pa., and has been endorsed by the State superintendent of Nebraska, so that he can teach anywhere in Pennsylvania, or Nebraska, in the public school without any further examination whatever.

### THE FIGHT FOR PURE FOOD

**Success of the Efforts to Scotch Bad Baking Powders.**

The aggressive war waged by the Royal Powder Company upon the hosts of adulterated and impure baking powders sold throughout the country is having a desirable effect. The scandalous attacks upon the Royal company by the manufacturers of the impure goods (which are made double's both from a spirit of revenge and in the hope of breaking the effect of the damaging exposures) show that they are hit, while the official reports which have come from various public authorities fully corroborating the statements made by the Royal company, have awakened a whole new public sentiment in favor of repressive laws, which means mischief to the illegitimate trade.

The Royal Baking Powder Company set out some time ago to expose the character and to break up the sale of adulterated baking powders. Having found from an examination of many specimens that there was a large number of actual injurious powders in the market, they brought the matter before the public and denounced the makers by name in the press and to the health authorities. The affair was taken up by physicians, Boards of Health, and Legislatures throughout the country, chemists were employed to test the various powders in the market, and the government itself directed analyses to be made before it would purchase the supplies needed for army, navy, and Indian uses.

The result justified the charges made by the Royal company. Not only were the impurities of baking powders in the market found to be largely adulterated, but many of them were ascertained to contain alum and other poisonous ingredients to such an extent as to render them positively unsafe for use in human food.

In making the charges the Royal Baking Powder Company did not hesitate to enter into competition with every other baking powder in the country, and it is a public satisfaction that in the official tests by government and State chemist and by Boards of Health, the Royal Baking Powder has been declared to be the superior of all others in strength, purity and wholesomeness, and absolutely free from all inferior or detrimental substances.

From recent official reports it is evident that the alum and otherwise impure goods have again come upon the market in dangerous quantities and that the old enemy, the Royal, is again up on the warpath. In continuing its warfare against these goods the Royal is meeting with the old-time opposition and abuse. The public, however, will appreciate, as heretofore, both the object of the abuse and the action of the Royal company, and award full justice to the company that so fearlessly stands up for its protection from such adventurers.

### ARSENIC AND AMMONIA

**Remarkable Contrast in the Effect of Two Poisons on the Complexion.**

The slow absorption of many poisons changes in some more or less modified form the complexion, but arsenic and ammonia show their effect about as quickly as any. The popular belief that arsenic clears the complexion has led many silly women to kill themselves with it in small, continued doses.

It produces a way, very like appearance of the skin during a certain stage of the poisoning, but the terrible after effects have become so well known to make it of common use as a cosmetic.

The effects of ammonia upon the complexion are directly the opposite to that of arsenic. The first symptom of ammonia poisoning which appears among those who work in ammonia factories is a discoloration of the skin of the nose and forehead. This gradually extends over the face until the complexion has a stained, blotched and unsightly appearance. With people who take ammonia into their system in smaller doses, as with their water or food, these striking symptoms do not appear so soon. The only effect of the poison that is visible for a time is general unwholesomeness and malice of the complexion.

Many people are slowly absorbing ammonia poison without knowing it. The ammonia in the manufacture of baking powders has greatly increased of late, and is in questionably used as an adulterant in certain food preparations. Official analyses have plainly shown its use even in such cheap brands of every day consumption as baking powders. The continued absorption of ammonia in even minute quantities as an adulterant in food is injurious not merely from its effect upon the complexion, but because it destroys the coating of the stomach and causes dyspepsia and kindred evils.

Dr. Cassin, Lecturer of Chicago, is authority for the statement that, if to fifty million parts of water there is one part of ammonia, the water is dangerous.

**Obituary.**  
On the 31st of October, 1891, Miss Olive Ray Murphy, daughter of Wm. and Lucinda Murphy, died in this city at the residence of her sister, Mrs. Anna Scott, in her 19th year. The deceased was born at Oak Lake, Grant county, Iowa, May 6, 1873, and lived in this county nearly or quite fifteen years. She was a young lady much loved by those who knew her. She was kind, affectionate, bright, pleasant, and modest, ever ready to do a kind act to others. Possessed a loving and sweet disposition. She bore her five weeks of sickness with christian fortitude without complaint or a murmur, and calmly passed away tranquilly in the Lord. She leaves father, mother, three sisters, and a brother, to mourn her loss. The funeral exercises were held at the M. E. Chapel, conducted by the Rev. Geo. O. Yeager, thence her remains were conducted to the Red Cloud cemetery, where they were tenderly laid away till the coming of our Lord Jesus.

## GOOD LUCK.

Dr. Price's Cream Baking Powder is often called the Good-Luck Baking Powder.  
Owing to the fact that good luck always attends the use of Dr. Price's, it is not essential to use it the moment it is mixed nor is it required to have the oven always just so, as in the case with ammonia or alum powders. It is not luck after all, but the exact accuracy and care exercised in the preparation and combination of all the ingredients of Dr. Price's Cream Baking Powder. Competent chemists are employed to test the strength and purity of each ingredient. Nothing is trusted to chance. Hence, it is always uniform in its work.  
House wives never fail to have "good luck" in making most delicious bread, biscuit, pastry and cakes that remain moist and sweet. Only Baking Powder that contains the white of eggs.  
Dr. Price's Cream Baking Powder is reported by all authorities as free from Ammonia, Alum, or any other adulterant. In fact, the purity of this ideal powder has never been questioned.
