Firmness and Earnestness Essential-Ti Bible the Mightiest Weapon of Christlans-Hard Blows Necessary in the

Battle With Sin.

In a late sermon at Brooklyn on the Christian warfare Rev. T. DeWitt Tale took his text from II. Samuel, ii. 10: "And his hand clave unto

sword." The preacher said: Eleazar, the hero of the text. The Philistines opened a battle against him, sinews of his hand had been so long rocks they sang: bent around the hilt of the sword that the hilt was embedded in the flesh, and the gold wire of the hilt had broken through the skin of the palm of the zar's hand clave to the sword.

FARM NOTES.

While turnips and cabbage can be left out until the heavy frosts, yet it is not a good plan to leave out two late. One advantage in winter manuring of wheat is that it note as a mulch to the plants as well as benefits the soil. A good healthy chicken six weeks old

can pick up its own living around almost any farm yard. When it is four or six months old its flesh is worth twice as much per pound as either beef. Put your roast in An exchange remarks: "We know a

the Chicago & Eastern Illinois railroad | great many farmers who own the acres of good land, in good districts, near Leonard Washburne, sporting editor railroads and fine towns, who make butter that is just fit for a very hangry hog to eat. Is that 'business' in this age of progress on the farm?"

J. A. McCafferty, an artist, recently | Of rye Secretary Rusk, of the agricultural department, says: "It is hardy, the straw is valuable and the average yield an acre is enough larger than that of wheat to cover the difference in selling price. I believe it would

be quite as profitable as wheat." The use of wood nabes as a fertilizer should be more generally understood. Hardwood ashes are much richer in notash than softwood ashes and are burne, who was returning to Chicago relatively more valuable. Leached from an Indiana trip, having joined wood ashes are hardly worth more than the labor of spreading on the lands as

The time when corn can be cribbed depends largely upon the season. Some years it can be husked out and cribbed much earlier than others. Generally a short time after there is a killing frost corn will do to crib, especially fodder corn.
