A FIGHT FOR LIFE.

Shall we Drive Slow Poison From Our Breakfast Table? Alum and Ammonia in our Bread.

A nuisance that troubled England fifty years ago is now rapidly spreading in this country, that is putting Alum in the bread we eat. This question is causing a great deal of discussion at the present moment, as it is revealed that alum is being used as a substitute for cream of tartar in baking powders. A story is told that a very large percentage of the baking powders sold on the market contain either alum or ammonia, and many of them contain both these pernicious drugs. Much timely alarm is felt at the wholesale use of alum in bread, biscuit and pastry. To young children, growing girls, persons of weakly frame, alum bread eaten morning, noon and evening is the most harmful. It is the small quantities taken at every meal that do the mischief. Alum is cheap, costing but two or three cents a pound while cream of tartar costs 30 cts., and the high price of cream of tartar has led cheap baking powder to be made of alum. If the reader wants to know something of the corrosive qualities of alum let him touch a piece to his tongue then reflect how it acts on the tender delicate coats of the stomach.

Following is a list compiled by the Scientific American, of the alum and ammonia baking powders that have already been tested.

Died.

At the home of his son Mr. T. F. Jones, in Walnut Creek township, on Sunday, the 1st day of November, 1891, at 10 o'clock, a. m., of Bright's disease. Mr. Thomas Jones, aged 83 years. Funeral services were held Monday, and the remains were consigned to the Walnut Creek cemetery. Mr. William Hooper, preaching the funeral sermon.

Thomas Jones was born in Glamorgan Shire, South Wales, and had spent the last twenty years of his life in Webster county, Nebraska. A large circle of relatives and friends remain to mourn his departure.

The deceased had received the peace that passeth understanding and expressed the same to the sorrowing relatives by his bedside.

T. F. Jones and family, and other relatives unite in expressing their thanks to the many friends who assisted so generously in the sick-bed of a beloved parent.

THE REPUBLICANS

HAVE MUCH TO BE THANKFUL FOR.

Three Officers Elected And 400 Majority Overcome.

IN THE WAY IT STANDS IN WEBSTER COUNTY.

Independents In The Soup.

Last Wednesday was a hard fought battle, yet had the republicans ALL turned out, there is no telling what might have been accomplished. As it was we have overcome 400 majority and elected D. M. Hunter, C. B. Crone and H. D. Ranney. The balance of the ticket was elected by the independents. Henry Scott, Geo. Hummel, W. E. Thorne, D. F. Trunkley and Dr. Schenck, were defeated by small majorities. The victory is certainly one that republicans can rejoice over, even if they did lose a few of the candidates, who are as jubilant over the victory as if they had been elected. In Red Cloud township Joe Garber, and the republican ticket knocked the independents clear out of the box, the same in Line, Walnut creek, and several other townships. The independents by next fall will go marching

ON TO DEFEAT

The state ticket is safe, McKinley is elected in Ohio, Pennsylvania went republican, and Kansas, the hot bed of independents, went republican. The facts are that the independents are "Going South" fast.

LET 'EM GO!

The following are the candidates who carried Webster county last Tuesday with their total vote and majorities over opposing candidates for same office:

FIRST NATIONAL BANK

Order Reopening the Institution Issued by the Comptroller.

WASHINGTON, D. C., Nov. 4.—Special Telegram to The Bee—The comptroller of the currency has ordered the reopening of the First National Bank of Red Cloud, Neb. The stockholders are to comply with the requirements made.

Great interest has been taken in the efforts to reopen this bank. Citizens from all over the state, having brought pressure to bear upon the comptroller of the currency and a number of influential eastern men having made requests for a reopening. The impairment of capital has been made whole.

From a telegram received from Comptroller Lacy, we learn that the stockholders have been given permission to reopen the bank, which will be done in a few days. We are pleased to note the fact as Red Cloud is entitled to two good banks and with the opening of the First National bank there will be restored confidence in our city.

How Baking Powders Are Made.

While rival companies are disputing as to what ingredients are to be found in the "best baking powder," the public will be interested in the following definition of these now indispensable articles as given by Appleton's Cyclopedia, the acknowledged American authority.

"The best baking powders are composed of bitartrate of potash (cream of tartar), tartaric acid, carbonate of ammonia, and soda bicarbonate, bound together by a little starch.

Royal Baking Powder Has no Equal.

The Royal Baking Powder will make sweeter, lighter, finer-flavored and more wholesome bread, biscuit and cake than any other leavening agent. It is of higher strength, and therefore goes further in work and is more economical. All government and scientific tests go to show this. Royal Baking Powder as a leavening agent is absolutely without an equal.

RUSH MEDICAL COLLEGE, CHICAGO.

"As the result of my tests I find the Royal Baking Powder superior to all the others in every respect. It is entirely free from all adulteration and unwholesome impurity, and in baking it gives off a greater volume of leavening gas than any other powder. It is therefore not only the purest but also the strongest powder with which I am acquainted."

"WALTER S. HAINES, M. D." Prof. of Chemistry.

CHICAGO COLLEGE OF PHARMACY.

"The Royal Baking Powder, which tests the highest in strength, is free from lime, alum, lime phosphates or other adulterations. Its superlative purity, the entire wholesomeness of its ingredients, the scientific manner in which they are combined, together with its much greater strength, make the Royal unquestionably superior to any other baking powder."

"H. D. GARRISON," Prof. of Chemistry.
