

ODDS AND ENDS

But the eastern half from Mexico eastward is level, and crops were drowned during the wet weather. Some corn was just coming up as he passed through.

In order to fully understand the questions of vital importance to the producer and laboring man that will come up during this campaign, every voter should hear both sides. The Bee proposes to discuss all questions thoroughly and intelligently. You cannot afford to allow this opportunity to pass. Address.

He who Wants Health Wants Everything!

There are millions of persons in this country who suffer from chronic diseases or an affliction which incapacitates them from business, and frequently makes life a burden. Many of whom would place themselves under different treatment if they were acquainted with the fact that a new treatment was in reach of them. Remedial agents for many of those ills we have endeavored to secure. Of such we offer to the afflicted one, on a business like basis, the management of which we trust will be tempered by a moral and philanthropic principle.

We practice the Brinkerhoff treatment of all forms of RECTAL DISEASES. We personally owe a debt of gratitude to the father and founder of this system and not to publish to the world such knowledge, would be to do mankind an injustice. This is the remedy that thousands bless, and one that I have secured at great expense, tried and tested before offering it to you for your consideration and investigation. Descriptive pamphlets sent free on application. Office consultation free. Names of parties who have been cured cheerfully given on application.

FARMERS ATTENTION.

All who are contemplating getting a harvester should see the Davis Platform Binder before purchasing, as it is the leading harvester of the day, the following points of excellence will show its superior qualities over all other binders. The chief point is there is no elevation of the grain at all, it simply binds the grain at an elevation of not over nine inches above the stubble. Thus saving the power necessary to elevate the grain, making a saving of from one to one and a half horses in the draft of the machine.

There is a complete separation between the bundle being bound and the rest of the grain of nearly three feet, thus doing away with the tangle and hanging together of bundles so common with many binders. No other binder has this quality. A most wonderful feature of the Davis Binder, the only one ever put on a grain binder, is the reel rake, which enables the driver to handle down and tangled grain with ease and make the bundles smooth and straight. We challenge any man to produce a field of grain that the Davis Binder cannot harvest better and make every sheaf straighter and more symmetrical than can be done by any other binder.

We don't thresh out and waste grain as other binders do, as we don't have the friction necessary to elevate the grain, and thus save enough grain to the farmer to pay for the entire cost of harvesting and also pay for the cost of seeding the next crop.

The Davis uses no canvas aprons at all, instead uses studded belts, that can be loosened at night or tightened in the morning, or after a rain, in just one second, thus saving much valuable time used in tightening the canvas of the other binders. The driver can raise or lower the cutter bar without leaving his seat, so as to cut the longest or shortest grain, and at the same time keep the platform in proper position to handle the grain.

There is no weight on the horses necks from the tongue, as it is perfectly loose, there is absolutely no side draft at all. Will bind tighter and with less end than any other binder. The binder is a steel binder.

The Davis needs no folding apparatus for transportation about the farms as it will pass through any eleven foot gate. The Davis binder is fully warranted. Before purchasing a binder, call and see the Davis at Gulwitz' blacksmith shop in Red Cloud on North Webster street, at Hammel's old stand.
