THE EDITOR'S SAY.

EMPEROR WILLIAM and Prince Bismark have kissed and made up, and Germany is now saved.

PRESIDENT DOLE of Hawaii still holds the fort, and is evidently a larger man than Grover Cleveland.

The people over in Kansas seem to have a "New Lease" of life. Lewelling don't seem to appreciate it, however.

FROM the Omaha Bee's figures, that paper certainly is in the lead, and there is more truth than poetry in those figures.

The income tax seems to be a thorn in the side of our democratic brethren. They want to let go of it but do not know how.

One thing is certain, if Russia, India and the Argentine Republic out rival we Nebraskans in the production of wheat, we can expiate matters by falling back on the sugar beet industry.

It would be a shame to dispel prize fighting altogether, and thereby prevent the illustrated periodicals from clothing the leading politicians in pugilistic attire, and making such ludicrous pictures.

JEFF WARD says he can't see why this country needs to be enlarged by the acquisition of more territory, when it is already so large that Uncle Grover can't get around fast enough with the office. He's about right.

THERE seems to be a great deal of useless discussion over the Wilson bill. Why not pass it at once, the industries of the country could not be worse off than they are now, while suspended between failure and the democratic problem of free trade.

The logical conclusion after a careful consideration of Mayor Weir's efforts to enforce the law to exclude the profiteers from Lincoln, would be that Lincoln would be some better off but the women much worse. They have to go but where? God only knows.

If there was an athletic club in the world, who would secure the services of Jim Corbett and some rival, and be so benign as to tender the receipts of the engagement to charity and relief funds for thousands of half starved people, they would certainly be public benefactors.

The Chief predicts that the republican party will have what is known as a walk away next fall in the election of congressmen. The republican party has the reputation of doing something at least. They were never known to leave the country in just such a shape as it is at present.

Our esteemed contemporary across the way seems to have become perturbed in spirit over a little newslet that appeared in our columns last week, and immediately the newspaper fur began assuming a feline attitude. Now, Coxy, old boy, don't call us unkind names, we are not used to it, but come over, and we'll set up the river water.

HENRY LUDLOW the affable editor of the Campbell Press gave the town butcher a good send off, in a recent issue of that paper, and the butcher thrashed Henry. A newspaper man is subject to many of the ills that flesh is heir to, but next time that butcher jumps on to Henry, he will have found out that he jumped on to the wrong animal and we would advise him to "steer" clear of Henry.

THERE is a name suggested for congressman from this district next fall. It is that of the talented Blackstonian Hon. James McNeny. THE CHIEF does not hesitate to express its choice for congressman next fall, and when we suggest the name of Jas. McNeny, there is no doubt but that it meets with universal approval, irrespective of party affiliations. There is a gentleman whose political horn has never yet tooted the petulant notes of the curionic office seeker. Indeed his modesty, one of his most prominent characteristics, forbears. No one doubts his ability, or questions his integrity. For years he has flourished in an extensive law practice here, ever preserving the clean stable character, to which is due much of this high esteem in which he is held, and much of the prosperity he now enjoys. He is young in years, yet not too young. He is the typical description of physical and intellectual perfection. Yet that is not all. Should our Jim be elected to congress, the fifth congressional district of Nebraska, would be assured of an administration which would prove profitable, and we would have a staunch representative of which we could feel proud. His prominence in the front ranks of the Nebraska bar, his tireless efforts to serve his trusts judiciously, his intellectual attainments and stability of character would assure us this, and after the most thorough consideration there is not a man in the district, whom we consider his equal for that exalted position.

our hopes were fast falling. My aged mother advised a trial of Hood's Sarsaparilla. He commenced taking the medicine, and to our

Considering the cry of a general depression throughout the country, it behooves us to see, that the business of the past month has greatly exceeded our expectations. Our merchants are enjoying a good trade as also our stock and grain men are paying the highest market price and making frequent shipments.

Considerable sickness is reported in the surrounding country, but fortunately our little city is blessed with an over production of those elements of superior excellence in the medical profession, enabling a majority of our energetic neighbors to be on the move.

Sprinkle, which Mrs. Sprinkle says was eluded by some of the doctors of Red Cloud and Hastings as being a very doubtful undertaking. Mrs. Ed. Reed of Chicago arrived last week in response to a telegram that her father, G. W. Francis was dangerously ill. At the present writing he is convalescing and considered out of danger.

Upon glancing over the placid columns of the up stairs Golden contemporary, we find the old familiar name of "Dennis" subscribed to quite a lengthy sic semper tyrannis. Now is it possible that our dearly beloved and old time tried democrat, Walnut creek Keeleyite, has forsaken his first love? We cannot believe that such is the case. Our opinion is that Dennis is just trying to gratify the whims of some political mugwump that has or may give him a passing smile, or it may be that he is growing into a state innocuous desuetude.
