WEATHER BULLETIN

PROGNOSTICATIONS OF WEATHER.

Prepared and Furnished for Special Publication in the Red Cloud Chtef by W. T. Foster.

[Copyrighted by W. T. Foster.]

St. Joseph, Mo, April 13th .- My last bulletin gave forecasts of the storm waves to cross the continent from April 16th to 20th and the next will reach the Pacific coast about the 21st, cross the western mountains by the close of the 22d, the great central valleys from 23d to 25th, and the eastern states about the 26th.

force west of the Mississippi river, and will probably develop thunder storms or other electrical disturbances. Rains will not be general, but limited localities will have heavy downpours.

The warm wave will cross the western mountains about 21st, the great net connected with the sun, moon and central valleys about 23d, and the other planets by electric currents, and eastern states about the 25th. The cool wave will cross the western mountains about 24th, the great central valleys about the 26d, and the eastern concerned, this has been so clearly states about the 28th.

ELECTRICITY.

We are eatering the eletrical age, truth. and the subject of electricity attracts e universal interest than any other. cause, the former the effect.

The orthodox scientists will ridicule this idea, but as we can learn but es the geographic equator north-east be exempt) shall establish, a county ment of usual fees. very little from their arbitrary code, of Australia near the Gilbert Islands, high school. the writer long ago rebelled against and on the opposite side of the earth their authority. Their theories are in the Gulf of Guinea, near the west utterly unreliable, and their teachings coast of Africa. It reaches its most may at any time when they think are prenicious errors.

The books deal almost entirely with the effects and of the needle dips toward the earth, have very little to say about the cause. Long chapters are written about mag- north-west of Hudson's Bay, twenty 1ty. The latter exists without the north pole, and the other in Siberia, former, is not dependent upon it, but twenty-five degrees south of the north

The machinery of the universe is opperated by the force of electrical reverse is true. currents. and we are rapidly approach- thus affected by permanent electric ing the time when electricity will be earth currents, and to these we must connected with most of the mechani- look for the immediate causes that cal contrivances of man. Before we affect magnetic needles, produce natcan attain reasonable progress, more attention must be given to the cause the original impulse.

We know that magnetic iron ore, the natural magnet, has lines of force bodies, originate and sustain vegetable connected with it, but why? We dig and animal life. from the earth what are called mag- the immediate sources of all power, of netic ores, and we know that when all life, of all action, but in turn they these ores are brought into contact are the effects of more remote cause, from their own number a secretary with other non-magnetic ores, the and to find their origin we must go latter are transformed into natural deeper into the subject. magnets, and lines of force are set matter till we go to the fountain head up in them.

What is it that sets up these lines will lead us in that direction. of force in the natural magnets? The How a Chicago Man was Cured earth currents, of course. When we place a natural magnet in contact with steel, the latter slowly becomes magnetized and will retain the lines of ferce after it is withdrawn from the natural magnet. The same result is secured when the steel bar is of the joints. Since the application of Chamberlain's Pain Balm, all symptoms this is very strong evidence that in sale by Deyo & Grice. all cases currents of electricity constitute the cause of magnetism.

Throwing off technicalities, dispensing with the hard language used by orthodox scientists, we have the plain naked truth that magnetism is an effeet of electricity, and magnets become such by electric currents circulating through them.

When those currents cease the magnet loses its magnetism.

There are said to be two kinds of magnets, but the only real difference is in the length of time they hold the magnetic forces. Just as well say there are two kinds of life because one man lives a little longer than another. Soft iron magnets are artifical because they have no magnetism except when we cause a current of This storm will be at its greatest electricity through them. Hard iron or steel magnets continue to conduct the electric currents through them after the battery has been withdrawn.

> The sun is a great magnet through which the electric currents constantly circulate. The earth is also a magany electric disturbance on one is immediately transmitted to all the others. So far as the earth and sun are p oven that the slow coached orthodox scientists are compelled to admit its

EDUCATIONAL NEWS

HAPPENINGS IN OUR SCHOOLS

Furnished by County Superintendent D. M. Hunter, -- A Communication from the University of Nebraska,

(Continued from last week.)

A BREAK IN THE STATE SYSTEM. If the children of the rural districts of Nebraska are to depend upon the city schools for their preparation for the University, or for their inducement to strive for higher education, both opportunity and inducement are sadly lacking. There are less than 50 public schools in Nebraska upon the accredited list of the University; and of these not more than a half dozen fully prepare for entrance to the University proper. This sentence needs only to be read to show conclusively that something must be done if opportunities for secondary education, or prepatory work, are to be at all commensurate with the demand.

PROPOSED LEGISLATION.

It may simplify the presentation of this question to suggest here the outlines of such legislation as will be necessary to secure this end.

An act to establish county high schools should contain the following provisions:

of five thousand inhabitants or over equal rank with the county high it can always be depended upon. It shows \$1,000,000 or more in taxable high school; and cannot send students Grice. The earth's magnetic equator cross- property (outside the cities which may to the high school, except on pay-

2-In counties of the third class (as above) the county commissioners southern limit in Brazil, where it is proper, or upon petition of one-third Throw a pebble into the lake, and twelve to fifteen degrees south, and of the electors of the county, present numerous ring waves will spread out its most northern limit in India, where to the electors of the county at a in all directions. The moving pebble it is as far north of the earth's geo- special or general election the quesis analogous to electricity, the waves graphic equator. All along that line tion of the establishment of such

3-If the majority of all the votes cast at such election shall favor establishing such high school, or in counties of the second class (as above) the county commissioners shall ap point six persons, residents and free holders of the county, not more than two of whom shall be residents of the same township or city, who with the county superintendent of instruction. shall constitute a Board of Trustees for the school.

4-At the next general election after such appointment, there shall be elected six high school trustees, who shall be divided into three classes of two each, the term of office of each to be one, two and three years ressnow, organize and protest mineral pectively. Each year thereafter, two shall be elected to fill vacancies.

5-The county superintendent shall be ex-officio president of the board of trustees. The board shall appoint and treasurer.

6-The tax in no one year shall exceed the amount of six mills on the of force, and the study of electricity dollar; and when the tax is levied for the payment of teachers' wages and usual current expenses only, it shall not exceed four mills on the dollar.

> taxes (the county is preactically organized into a school district for the purpose of the high school).

8-Officers of the high school board shall perform the resual duties.

9-The Board of Trustees and the shall select the best cite that can be think of getting a wheel. obtained without expense to the coun

ty. The board shall purchase materials and let contracts for buildings, but not to exceed the amount in hand and to be raised by the taxes of that year. The Board may lease buildings for the use of the high school until new buildings are erected.

10-The board shall have power to issue the bonds of the county for the purpose of erecting a building, or buildings, under the terms and conditions set forth in the act.

11-No bonds shall be issued until the question has been submitted to the qualified electors, and two thirds of all qualified electors present and voting shall have declared in favor of issuing the same.

12-No bonds shall be issued in an aggregate amount to exceed 1 per cent of the last complete assessment of the taxable property of the county for state and county purposes (less the assessment of cities exempt by the

13-In all other respects, bonds shall be issued in manner similar to the issue of bonds of school districts of Nebraska.

14-Any city which shall be certified by the state superintendent of City, New York, public instruction to the county commissioners of the county in which such city is located to have established and to be maintaining at the have ever sold," says S. Keel & Son, of 1-Each county having a population expense of the city a high school of Coal Run' Ky. It is a favorite because

[To be continued.]

Bright Spring Days.

The spring should be pre-eminently a eason of contentment, happiness and hope. In these bright and pleasant months the country should enjoy its highest degree of tranquility and prosperity. But spring, it is well known, is often a period of discomfort and disturbance in the physical system. Important organs of the body become torpid or irregular in their action, and the fact is instantly reflected in the mental condition of the individual. A disordered liver means disordered nerves and a dult and unsteady brain. Anything which will bring the physical system into harmony with budding Nature confers an enormous benefit upon the nation, beside the mere allaying of physical discomfort. Hood's Sarsaparilla does this, as thousands of grateful and happy men and women can testify, and increased use of this standard spring medicine is of more real practical importance in promoting health and quiet in the business world that realms of abstract theorizing.

Valuable Presents Free.

We wish to introduce our System pills into every home. We know that we manufacture the very best remedy on earth for the care of constipation, bil liousness, sick headache, kidney troubles torpid liver, etc.; and that when you have tried these pills you will gladly recomend them to others, or take an agency and in this way we shall have a large, well-paying demand created. As a special inducement for every reader of this paper to try these pills and take an agency at once, we will give to each person who sends 24cents in cash or 30 cents in stamps, for a box of system pills, one of the following presents: A handsome gold watch, a good silver watch, a valuable town lot, a genuine diamond ring 7-Taxes to be levied and collected a easket of silverware or a genuine \$5 in the same manner as other county gold piece. Every purchaser gets one of the above presents. There are no exceptions.-Shaw Remedy Co., Rutherford, N. J.
