Deafness Cannot be Cured.

by local applications as they cannot reach the disease portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred dollars for any case of deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars; free.

Last Jane Dick Crawford brought his twelve-months-old child, suffering from infantile diarrhoea, to me. It had been weaned at four months old and had always been sickly. I gave it the usual treatment in such cases but without benefit. The child kept growing thinner until it weighed but little more than when born, or perhaps ten pounds. I then started the father to giving Chamberlain's Colic, Cholera and Diarrhoea remedy. Before one bottle of the 25 cent size had been used a marked improvement was seen and its continued use cured the child. Its weakness and puny constitution disappeared and its father and myself believe the child's life was saved by this remedy. J. T. MARLOW, M. D., Tamaqua, Ill. For sale by Deyo & Grice druggists.

Approximation of the Assessed Value of Missouri Railroads.

JEFFERSON CITY, Mo., July 18.—The state board of equalization for the assessment of railroad, bridge and telegraph property has completed its labors, and has adjourned until such time as State Auditor Seibert can have the multitude of intricate calculations made and the values apportioned to the several municipalities in proportion to the number of miles of railroad and the telegraph wire in each. This will occupy the full time of the state auditor's clerical force for something like a month and no absolutely accurate statement of results can be made until it is done. It is estimated, and approximately correct, that the increase in valuation over the assessment of 1894 will be \$4,292,572. The total valuation of railroad, bridge and telegraph property in the state as assessed by the board in 1894 was \$70,293,736, so that the total assessment for this year will be in round numbers \$75,500,000.
