We have been asked to do some advertising for a firm of Chicago brokers, who promise a return of \$10 for every \$1 invested with them. The advertisement "promises" to pay well, and would probably end in promises. Every person who sends them money for investment will lose what is sent. No legitimate business will pay the returns promised. Steer clear of this class of brokers.—Adams County Democrat.

A Good Thing. Two gentlemen, named Cole and Ray of Michigan, have been corresponding with Mayor Bentley in regard to looking after a location for a normal college. The gentlemen make a favorable proposition, and if our people see fit to take them up, there would be a worthy enterprise that would be a credit to the city. All Red Cloud needs is a little new life enthused into her citizens, and then things would hum as never before. The project should be encouraged and given all the support possible, if found to be a worthy enterprise.

Sunday School Rally. Last Sunday at three p. m., a large number of Sunday school workers from Red Cloud, Amboy and Cowles assembled at Wilder's school-house in district — to help the home people of that district in reorganizing their Sunday school which was temporarily closed a short time ago. R. B. Fulton, C. L. Cotting, Mr. Boren of Cowles, Mrs. Brubaker, Mrs. Wilder and Mrs. Lacy gave short talks. Mrs. Wm. West presided at the organ, and Mr. Cotting and Miss Igou sang a beautiful duet. L. P. Albright sang a solo, with all joining in the chorus. The singing was all good, and the crowd the largest that has attended any rally thus far. Before adjourning Uncle Jackson was elected chairman and Miss Edson secretary of the temporary organization, to elect officers for the ensuing year. Mr. Lacy was elected superintendent, Mrs. Harry Brubaker assistant superintendent, Miss Edson secretary, and Miss Bond treasurer. After a few remarks by Supt. Elect, Mr. Lacy, we all joined in singing the doxology and adjourned, to meet next Sunday in Dist. —, known as the Pierce school house, four miles north of Red Cloud.

Surprises are frequent; but it is seldom that one meets with agreeable ones. Not often can a surprise party be planned and arrangements made to give a friend a happy evening but that some one "gives the thing away." If you had noticed the actions of several of our Epworth Leaguers of the M. E. church on last Tuesday, you could have noticed peculiar actions on their part. Cakes and ice cream were gathered in from all sides to the church and, about eight o'clock, young people, with a mysterious expression on the face, were seen to congregate at this place. Then, with silent tread, they marched in double file to the home of Mr. Baum, their president, bursting upon her with a joyous shout. Then the whole thing leaked out that about forty Epworth Leaguers had prepared a surprise reception on their president. And it was a surprise! The guests soon began to make merry, and at 9:30 ice cream and cake were served. This gay young party "broke up" at a very late hour, feeling that they had had a joyous time and a profitable one. Mrs. Baum is very popular among the young people, and is truly a conscientious christian worker.

Mrs. Baum conducts the devotional meeting next Sabbath. Let every Epworthian stand ready to assist and thus make an uplifting service.

ELECTRICITY AT SEA.

Tests Prove That the White Light Is by Far the Most Easily Seen.

Some interesting experiments have been made on the visibility of the electric light at sea by the governments of the United States, Germany and the Netherlands. The word "visible" in the report on the tests means visible on a dark night with a clear atmosphere. The result of the experience of the German committee was that a white light of one candle power was visible 1.4 miles on a dark, clear night and one mile on a rainy night.

The American tests resulted as follows: In very clear weather a light of one candle power was plainly visible at one nautical mile; one of three candle power at two miles; one of ten candle power was seen by the aid of a binocular at four miles; one of 29 candle power faintly at five miles and one of 83 candle power plainly at five miles. On an exceptionally clear night a white light of 3.2 candle power was readily distinguished at three miles; one of 5.6 candle power at four miles and one of 17.3 candle power at five miles.

In the Dutch experiments the results were almost similar, but a 16 candle power light was plainly visible at five miles. For a green light the power required was two for one mile, 15 for two miles, 51 for three miles and 106 for four miles. The results of tests with a red light were almost identical with those with green, but it was conclusively proved that a white light was by far the most easily seen.—Chicago Record.
