

# Hartford Bicycles

\$80  
\$60

Elegant in Design

Superior in Workmanship

Strong and Easy Running

Hartfords are the sort of bicycle most makers charge \$100 for.

Columbias are far superior to so-called "specials," for which \$125 or even \$150 is asked. It is well to be posted upon the bicycle price situation.

The great Columbia plant is working for the rider's benefit, as usual.

## Columbias—\$100

POPE MFG. CO.

General Offices and Factories,

### A DREAM.

Oh, it was but a dream I had  
While the musician played—  
And here the sky and here the glad  
Old ocean kissed the glads,  
And here the laughing ripples ran,  
And here the roses grew,  
That threw a kiss to every man  
That voyaged with the crew.

Our silken sails in lazy folds  
Drooped in the breathless breeze,  
As o'er a field of marigolds  
Our eyes swam o'er the seas,  
While here the eddies lapped and purled  
Around the island's rim,  
And up from out the underwood  
We saw the mermen swim.

And it was dawn and middle day  
And midnight—for the moon  
On silver rounds across the bay  
Had climbed the skies of June,  
And here the glowing, glorious king  
Of day ruled o'er the realm,  
With stars of midnight glittering  
About his diadem.

The seagull roared on languid wing  
In circles round the mast;  
We heard the songs the sirens sing  
As we went sailing past,  
And up and down the golden sands  
A thousand fairy throngs  
Flung at us from their flashing hands  
The echoes of their songs.  
—James Whitcomb Riley.

### PRINTING BY TELEGRAPH.

An Electrical Typewriter That Transmits

Printed Characters.

The printing telegraph, though a device of comparatively recent development, has been the subject of ceaseless investigation, and practical workers in electricity have directed their whole attention in some instances to the transmission of messages and the recording of them in plain Roman characters.

Its advantages are simply those of an electrical typewriter, by means of which the message is printed in page form, and a duplicate of the same printed at all the receiving stations on the line, whether it be a long or short circuit. A single transmission prints it simultaneously in page form ready for the compositor's case in all the newspaper offices of many cities.

It is said to differ materially from all other known means of telegraphy in one essential particular. In it the impulses move the instruments, whereas in other systems the instruments move the impulse—that is to say, the transmitter of the message is caused to run by a separate power. No combination of electrical impulse or currents is employed. An even succession of dots or impulses, which operate the polarized relay armature at the receiving station, places the revolving type wheel in the required position, when the local mechanism causes the letter to be printed.

The apparent impossibility of transmitting printed characters 300 or 1,000 miles over a single wire at once presents itself to the mind, and it is overcome in this system, it is asserted, in a very simple way. Each letter of the alphabet is represented by a certain number of impulses, which revolve the type wheel to the required position, when the letters are struck by the local mallet.

Fourteen impulses represent the entire alphabet, making a complete revolution of the type wheel, which may be turned 200 revolutions per minute, thus securing very rapid printing. Its advantage also is that of absolute secrecy as a means of communication. The advantage of the printing telegraph for the transmission of news to the newspaper offices is unquestionably a subject commanding attention on the part of progressive proprietors.—Paper and Press.

Too Much Machinery.  
"Do you know the curse of modern journalism?" asked an old journalist the other day.

"It's the typewriter. It destroys originality. It gives to everything that it is written a mechanical touch. There's no style or individuality about anything composed on a typewriter.

"You will find that the newspaper writers in all the larger offices use typewriters. The use of them has extended in many other directions. Mr. Satolli has one. But wherever you find a man writing on one and composing as he writes you will find that his work is stamped, mechanical, unimaginative, without the slightest touch of fancy or vitality.

"Go into the offices of the big dailies and you will find the young men who make the papers seated at a typewriter, grinding out columns of colorless, unreadable stuff for the paper. You can't turn out thought by machinery, and the young men who write their matter for the press on typewriters never rise above the level of mediocrity. Go into the composing rooms of the big dailies, too, and you will find the printers setting type by machinery. No style about that. It's straight, stiff, formal, unattractive, without any individuality. It takes the human touch to give the proper life and color to anything. There's too much machinery."—Atlanta Constitution.

Geodes.  
Did you ever see a geode, the ugly, creamy, yellow, rounded rock, which, upon being broken open, presents a perfect wilderness of diamondlike crystals? They are oddities of the oddest kind, and are not too plentiful anywhere. The word "geode" means "earthform" and is applied to all hollow stones which are filled with crystallized matter. When broken open, some are found to be full of pure looking, clear water. Others appear to be full of yellow or brown paint, while a third class are filled with what appears to be a very fair quality of tar. No odds what the filling of the cavity may be composed of, the sides are always studded with crystals. Should the filling be yellow the crystals are likely to be of the same color, but by far the greater portion of them are as clear as ice or diamonds.—St. Louis Republic.

The New York town of Bolivar has streets lighted free of expense by a company which furnishes the illumination as a payment for the privilege of doing business in the corporation.

A lie is often told without saying a word, by putting the rotten apples in the bottom of the basket.—Sam's Horn.

This Looks Funny at First,—  
But it's only the Hostler taking a chew of Climax Plug.

Every thoroughbred chewer enjoys a chew of this delicious tobacco. It does not burn the tongue. It possesses a pleasing flavor and a substance unequaled by any tobacco in the world. When you want a good chew, get

# LORILLARD'S Climax Plug

## DIVIDED AT LAST.

THE BOARD OF SUPERVISORS, UNDER THE NEW LAW, HAVE ORGANIZED, AND THE COUNTY HAS BEEN DIVIDED AS FOLLOWS:

Harmony.	Glenwood.	Potadam.	Oak Creek.
		Dist. 3.	
		Albert Kort, Sup.	
Catherton.	Bella.		Stillwater.
Dist. 7.	Dist. 6	Elm Creek.	Dist. 2.
J. Broomfield, Sup.	Wm. Cabill, Sup.		A. H. Spracher, Sup.
	Red Cloud.	Pleasant Hill.	
Inavale.		Dist. 4.	Beaver Creek.
		Wm. Hurd, Sup.	
Walnut Creek.	Line.	Garfield.	Guide Rock.
			Dist. 1.
			J. F. Watt, Sup.

The heavy lines show the boundaries of the new supervisor districts as they are now, the bright lines merely showing the township lines as heretofore. Under the old law each township was a district, under the new law there are as high as four townships in one district. For instance, Pleasant Hill, Garfield, Line and Walnut Creek are merged in one district by itself. The new districts are based on population.

### The Same Thing.

Major John writes in The United Service Magazine that while he was employed between Port Said and Kantara he saw the waters of the Lake Menzaleh "driven beyond the horizon" by a violent wind, so that the natives walked about where the day before they were fishing. This convinced him that he had seen exactly what happened when the Israelites passed dry shod through the Red sea.

### Trying It On.

Tom (disappointed in love)—Well, this settles it. For the remainder of my days I shall live the life of a hermit. Jack—Don't say that, old man. Why not compromise on moving over to Brooklyn?—New York Herald.

### Notice.

All persons are hereby warned not to buy nor negotiate three promissory notes, given by the undersigned to Warner, Bushnell, Glesener Co., for Champion blinder. One due October 1st, 1895, for \$35.00; one due October 1st, 1896, for \$35.00; one due October 1st, 1897, for \$30.00, for I will not pay the same for cause.  
J. M. BARNER.

## ECZEMA

From early childhood until I was grown my family was trying to cure me of this disease. I visited Hot Springs, and was treated by the best medical men, but was not benefited. FROM When all things had failed I determined to try S. S. S., and in four months was entirely cured. The terrible Eczema was gone, not a sign of it left; my general health built up, and I have never had any return of the disease. I have since recommended S. S. S. to a number of friends for skin diseases, and have never yet known a failure to cure. GEO. W. IRWIN, Irwin, Pa.

Never fails to cure, even after all other remedies have. Our Treatise on Blood and Skin Diseases mailed free to any address.

SWIFT SPECIFIC CO., Atlanta, Ga.

The Sweetest Music requires a...  
Quitar, Mandolin, Banjo or Zither.

They are the product of the Largest Musical Factories in the world and are unequalled for tone or finish. Send to the makers.

Lyon & Healy, Chicago, for a Beautiful Catalogue (FREE) containing portraits of ninety artists. Washburns are sold by all first-class Music Dealers.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

## WHY ARE WHEELER & WILSON'S No. 9 SEWING MACHINES POPULAR? BECAUSE LADIES BUY THEM LIKE THEM AND TELL THEIR FRIENDS.

Many ladies have used our machines twenty to thirty years in their family work, and are still using the original machines we furnished them a generation ago. Many of our machines have run more than twenty years without repair, other than needles. With proper care they never wear out, and seldom need repair. We have built sewing machines for more than forty years and have constantly improved them. We build our machines on honor, and they are recognized everywhere as the most accurately fitted and finely finished sewing machines in the world. Our latest, the "No. 9" is the result of our long experience. In competition with the leading machines of the world, it received the Grand Prize at the Paris Exposition of 1889, as the best other machines receiving only complimentary medals of gold, silver and bronze. The Grand Prize was what all sought for, and our machine was awarded it.

Send for our illustrated catalogue. We want dealers in all unoccupied territory.
