Nervous Prostration

Cured by Dr. Miles' Nervine.

Prolonged derangement of the nervous

system not only affects the brain and men-

tal powers, but develops disease in some of

the vital organs. The most dangerous of these indirect results is when the heart is

affected. This was the case of the Rev. N.

F. Surface, Fawn River, Mich., who writes

under date of Feb. 14, 1895:

The doctor may be a good old man, but even so, medical examinations and the "local-application" treatment are abhorrent to every modest woman. They are embarrassing-often useless. They should not be submitted to until everything else has been tried. In nine cases out of ten, there is no reason for them. In nine cases out af ten, the doctor in general practice isn't competent to treat female diseases. They make a branch of medicine by themselves. They are distinct from other ailments. They can be properly understood and treated only by one who has had years of actual practice and experience in this particular line. This is true of Dr. R. V. Pierce, chief) consulting physician of the Invalid-Hotel and Surgical Institute, at Buffalo, N. Y. Dr. Pierce's Favorite Prescription, a remedy for all derangements of the reproductive organs of women, has been in actual use for more than thirty years. It cares every form
