"The Foot of a Fly"

says an eminent English doctor, "will carry enough poison to infect a household." In summer-time, more especially, disease germs fill the air, multitudes are infected, fall ill, die; multitudes escape. These messengers of mischief do not exist for millions. Why not? Because they are healthy and strong—protected as a crocodile is against gunshot. It is the weak, the wasted, the thin-blooded who fall; those who have no resistive power so that a sudden cough or cold develops into grave disease. We hear of catching disease! Why not catch health? We can do it by always maintaining our healthy weight.

Scott's Emulsion

of Cod-liver Oil, is condensed nourishment; food for the building up of the system to resist the attacks of disease. It should be taken in reasonable doses all summer long by all those whose weight is below the standard of health. If you are losing ground, try a bottle now.
