WITTEINTERVIEWED

CHIEF RUSSIAN ENVOY NOT FOR PEACE AT ANY PRICE.

Believes Terms of Japan Will Be Such That an Accord Cannot Be Reached Says Position of Russia is Misun derstood-Decision Rests With Czar

St. Petersburg, July 18 .- M. Witte the senior Russian peace plenipotentiary, received the correspondent of the Associated Press at his villa on Yelagin island. After greetings which were cordial, the talk gravitat ed to the high mission with which the Russian statesman is charged and the disposition of the foreign press to interpret his appointment as an indication that Russia had desired to make peace at any price.

"No, no," said he, straightening up in his chair and speaking slowly and distinctly, as if weighing the value of each word. "In the first place, I have been designated by the emperor as his ambassador extraordinary for pourparlers with the Japanese plenipotentiaries to ascertain whether it is possible to conclude a treaty of peace. My personal views are of secondary importance, but my ideas are in entire accord with those of my friend, Count Lamsdorf. In serving my emperor, I have received precise instructions from his majesty and shall follow them. The ultimate decision remains in the hands of the emperor and it is reach an accord.

Gunboat Dubuque Again Afloat. New York, July 18.-The United States gunboat Dubuque went aground in the lower bay. Attempts to work her off under her own steam proved fruitless and in response to wireless messages three tugs were dispatched to the aid of the gunboat from the navy yard and the army steamer Ordnance came from Sandy Hook. With the united efforts of the tugs, the Dubuque was hauled off at high tide. The bottom where she rested is of shifting sand and the gunboat apparently sustained no damage.

Situation at the Front. Gunshu Pass, Manchuria, July 17 .-Reports that the Russian army is in a precarious situation appear to be without foundation. Investigations made by correspondents of the Associated Press show that neither flank has been turned and that, in fact, the Russian wings are more advanced than the center. The Japanese center is strongly fortified. Many siege guns have been emplaced along the Changtufu-Nanchenze line, and there
