

(Continued from Page Three.)

while the Lizard is invisible. The oil has more penetrative power. Its chemical combination is nearer the mean of nature's resources."

At the proper time he banished them to the kitchen to prepare dinner, a feast diverted from the hour of noon by the chances of the day. He adopted every expedient to keep them busy, to tire them physically and mentally, to render them so exhausted that they would sleep in blissful calm through the ordeal to come.

As he could not leave the lamp, and they refused to eat apart from him, the dinner, in three courses, was a breathless affair. Going up and down five flights of stairs with soup, joint and pudding, while one carried the tray and the other swung a hand lantern in front, required time and exertion. They were cheerful as grigs over it.

Enid, whose turn it was to bring up the plates of tapioca, pleaded guilty to a slight sensation of nervousness.

"I could not help remembering," she said, "what an awful lot of dark iron steps there were beneath me. I felt as if something were creeping up quickly behind to grab me by the ankles."

"You should go up and down three times in the dark," was Brand's recipe. "When you quitted the door level for the third ascent you would cease to worry about impossible grigs."

Constance looked at her watch. "Only 8 o'clock! What a long day it has been!" she commented.

"You must go to bed early. Sleep in my room. You will soon forget where you are. Each of the bunks is comfortable. Now I will leave you in charge of the lamp while I go and lock up."

They laughed. It sounded so homelike.

"Any fear of burglars?" cried Enid. "Yes; most expert cracksmen—wind and rain and—sleet," he added quietly.

"I must fasten all the storm shutters and make everything snug. Don't stir until I wake you in the morning."

"Poor old dad!" sighed Constance. "What a vigil!"

He was making new entries in the weather report when she remarked thoughtfully:

They were cheerful as grigs over it.

"It is high water about half past 1, I think?"

He nodded, pretending to treat the question as of no special import.

"From all appearances there will be a heavy sea," she went on.

"Just an ordinary bad night," he said coolly.

"Do the waves reach far up the lighthouse in a gale?" she persisted.

Then Brand grasped the situation firmly.

"So that your slumbers may be peaceful," he said, "I will call your kind attention to the fact that the Gulf Rock light has appeared every night during the past twenty-five years, or since a date some four years before you were born, Constance. It contains 4,000 tons of granite and is practically monolithic, as if it were carved out of a quarry. Indeed, I think its builder went one better than nature. Here are no cracks or fissures or undetected flaws. The lowest course is bolted to the rock with wrought iron clamps. Every stone is dovetailed to its neighbors and clasped to them with iron, above, below and at the sides. If you understand conic sections I could make clearer the scientific aspect of the structure, but you can take it from me you are far safer here than on a natural rock many times the dimensions of this column."

"That sounds very satisfactory," murmured Enid, sleepily.

"I am overwhelmed," said Constance, who grasped the essential fact that he had not answered her question.

Soon after 9 o'clock he kissed them good night. They promised not to sit up talking. As a guarantee of good behavior, Enid said she would ring the electric bell just before she climbed into her bunk.

The signal came soon and he was glad. He trusted to the fatigue, the fresh air, the confidence of the knowledge that he was on guard, to lull them into the security of unconsciousness.

The behavior of the mercury puzzled him. In the barometer it fell, in the thermometer it rose. Increasing temperature combined with low pressure

was not a healthy weather combination in January. Looking back through the records of several years, he discovered a similar set of conditions one day in March, 1891. He was stationed then on the northeast coast and failed to remember any remarkable circumstance connected with the date, so he consulted the lighthouse diary for that year. Ah! Here was a possible explanation. The chief keeper, a stranger to him, was something of a meteorologist.

He had written: "At 4:15 p. m. the barometer stood at 27.16 degrees and the thermometer at 45.80 degrees. There was a heavy sea and a No. 7 gale blowing from the S. S. W. About 5 o'clock the wind increased to a hurricane and the sea became more violent than I have seen it during five years' experience of this station. Judging solely by the clouds and the flight of birds, I should imagine that the cyclonic center passed over the Scilly Isles and the Land's End."

Then next day:

"A steady northeast wind stilled the sea most effectually. Within twenty-four hours of the first signs of the hurricane the channel was practicable for small craft. A fisherman reports that the coast is strewn with wreckage."

Brand mused over the entries for awhile. With his night glasses he peered long into the teeth of the growing storm to see if he could find the double flash of the magnificent light on the Bishop Rock, one of the Atlantic breakwaters of the Scilly Isles. It was fully thirty-five miles distant, but it flung its radiance over the waters from a height of 143 feet, and the Gulf Rock lamp stood 130 feet above high water mark. A landsman would not have distinguished even the nearer revolutions of the St. Agnes light, especially in the prevalent gloom, and wisps of spindrift were already striking the lantern and blurring the glass.

Nevertheless he caught the quick flashes reflected from clouds low, but unbroken. As yet there was a chance of the incoming tide bringing better weather, and he bent again over the record of the equinoctial gale in 1891. Soon he abandoned this hope. The growing thunder of the reef as the tide advanced gave the first unmistakable warning of what was to come. As a mere matter of noise the reef roared its loudest at half tide. He understood now that a gale had swept across the Atlantic in an irregular track. However the winds may rage the tides remain steadfast, and the great waves now rushing up from the west were actually harbingers of the fierce blast which had created them.

Of course the threatened turmoil in no wise disconcerted him. It might be that the rock would remain inaccessible during many days. In that event the girls would take the watch after the lamp was extinguished, and they must learn to endure the monotony and discomforts of existence in a storm bound lighthouse. They would be nervous unquestionably—perhaps he had forgotten how nervous—but Brand was a philosopher, and at present he was most taken up with wonderment at the curious blend of circumstances which resulted in their presence on the rock that night.

Ha! A tremor shook the great pillar. He heard without the frenzied shriek of the first repulsed roller which flung itself on the sleek and rounded wall. Would the girls sleep through the next few hours? Possibly, if awake, they would attribute the vibration of the column to the wind. He trusted it might be so. Shut in as they were, they could not distinguish sounds. Everything to them would be a confused hum, with an occasional shiver as the granite braced its mighty heart to resist the enemy.

But what new note was this in the outer chaos? An ordinary gale shuddered and whistled and chanted its way past the lantern in varying tones. It sang, it piped, it bellowed, it played on giant reeds and crashed with cymbals. Now—he looked at the clock, after midnight—there was a sustained screech in the voice of the tempest which he did not remember having heard before. At last the explanation dawned on him. The hurricane was there, a few feet away, shut off from him by mere sheets of glass. The lighthouse thrust its tall shaft into this merciless tornado with grim steadfastness, and around its smooth contours poured a volume of unearthly melody which seemed to surge up from the broad base and was flung off into the darkness by the outer sweep of the cornice.

The wind was traveling seventy, eighty, maybe a hundred miles an hour. Not during all his service nor in earlier travels through distant lands had he ever witnessed a storm of such fury. He thought he heard something crack overhead. He looked aloft, but all seemed well. Not until next day did he discover that the wind vane had been carried away, a wrought iron shank nearly two inches thick having snapped like a piece of worsted at the place where the tempest had found a fault.

He tried to look out into the heart of the gale. The air was full of flying foam, but the sea was beaten flat. If the growling monster beneath tried to fling a defiant crest at the tornado the whole mass of water, many tons in weight, was instantly torn from the surface and flung into nothingness.

Some of these adventurers, forced up by the reef, hit the lighthouse with greater force than many a cannon ball fired in battles which have made history. Time after time the splendid structure winced beneath the blow.

If Stephen Brand were ever fated to know fear he was fated to face with the ugly phantom then. The granite column would not yield, but it was quite within the bounds of possibility that the entire lantern might be carried away and he with it.

He thought, with a catching of his breath, of the two girls in the tiny room beneath. For one fleeting instant his mortal eyes gazed into the unseen. But the call of duty restored him. The excessive draft affected the lamp. Its arbor must be checked. With a steady hand he readjusted the little brass screws—they were so superbly indifferent to all this pandemonium—just little brass screws, doing their work and heeding naught beside. Suddenly there came to him the triumphant knowledge that the pure white beam of the light was hewing its path through the savage assailant without as calmly and fearlessly as it lit up the ocean wilds on a midsummer night of moonlight and soft zephyrs.

"Thank God for that!" he murmured aloud. "How can a man die better than at his post?"

The ring of iron beneath caught his ears. He turned from the lamp. Constance appeared, pale, with shining eyes. She carried the lantern. Behind her crept Enid, who had been crying. She strove now to check her tears.

"Is this sort of thing normal, or a special performance arranged for our benefit?" said his daughter, with a fine attempt at a smile.

"Oh, dad, I am so frightened!" cried Enid. "Why does it howl so?"

CHAPTER VI.

IT says a good deal for Stephen Brand's courage that he was able to laugh just then, but it is a fine thing for a man in a moment of supremest danger to be called on to comfort a weeping woman.

The next minute might be their last. Of that he was fully conscious. Even before the girls reached his side he felt a curious lifting movement of the whole frame of the lantern. Steel and glass alike were yielding to the sustained violence of the wind pressure. Well were they molded, by men whose conscience need harbor no reproach of dishonest craftsmanship. They were being tested now almost beyond endurance.

Some natures would have found relief in prayer. Gladly would Constance and Enid have sunk on their knees and besought the Master of the winds to spare them and those at sea. But Brand, believing that a catastrophe was imminent, decided that in order to save the girls' lives he must neither alarm them nor lose an unnecessary instant.

To desert the light—that was impossible personally. If given the least warning he would spring toward the iron rail that curved by the side of the stairs to the service room and take his chance; otherwise he would go with the lamp. There was no other alternative; the girls must leave him at once.

The laugh with which he greeted their appearance gave him time to scheme.

"I ought to scold you, but I won't," he cried. "Are you plucky enough to descend to the kitchen and make three nice cups of cocoa?"

Just think what it cost him to speak in this bantering way, careless of words, though each additional syllable might mean death to all three.

His request had the exact effect he calculated. For once Constance was deceived and looked her surprise. Enid, more volatile, smiled through her tears. So it was not quite as bad as they imagined, this gale. Their father could never be so matter of fact in the face of real peril to all of them. Cocoa! Fancy a man giving his thoughts to cocoa while they were expecting the lighthouse to be hurled into the English channel!

He turned again to manipulate the brass screws.

"Now, do not stand there shivering," he said, "but harden your hearts and go. Use the oil stove. By the time it is ready—"

"Shivering, indeed!"

Constance, of the viking breed, would let him see that he had no monopoly of the family motto, "Audeo." She, too, could dare.

"Down you go, Enid!" she cried. "He shall have his cocoa, poor man!"

He looked over his shoulder and caught his daughter glancing at him from the well of the stairs.

"Bad night!" he shouted cheerfully, and he cheated her quick intelligence a second time.

They were gone. Perchance it was his last sight of them in this life. Three times the stalwart framework creaked. Once it moved so perceptibly that the curtain rings jingled. Then he remem-

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of *Chas. H. Fletcher* and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS Bears the Signature of

Chas. H. Fletcher

The Kind You Have Always Bought In Use For Over 30 Years.

THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY.

CATARRH

ELY'S CREAM BALM
This Remedy is a Specific, Sure to Give Satisfaction. GIVES RELIEF AT ONCE
It cleanses, soothes, heals, and protects the diseased membrane. It cures Catarrh and drives away a Cold in the Head quickly. Restores the Senses of Taste and Smell. Easy to use. Contains no injurious drugs. Applied into the nostrils and absorbed. Large Size, 50 cents at Druggists or by mail; Trial Size, 10 cents by mail. ELY BROTHERS, 56 Warren St., New York.

FEELING LIVER-ISH This Morning? TAKE

THE FORD'S Black-Draught
Stops Indigestion and Constipation 25¢ AT ALL DRUGGISTS
A Gentle Laxative And Appetizer
HOLLISTER'S Rocky Mountain Tea Nuggets
A Busy Medicine for Busy People. Brings Golden Health and Renewed Vigor. A Specific for Constipation, Indigestion, Liver and Kidney Troubles, Pimples, Eczema, Impure Blood, Bad Breath, Sluggish Bowels, Headache and Backache. It's Rocky Mountain Tea in tablet form, 35 cents a box. Genuine made by HOLLISTER DRUG COMPANY, Madison, Wis. GOLDEN NUGGETS FOR SALLOW PEOPLE

PARKER'S HAIR BALSAM
Cleanses and beautifies the hair. Promotes a luxuriant growth. Never Fails to Restore Gray Hair to its Youthful Color. Cures scalp diseases, hair falling, etc., and gives a soft, glossy finish.

To Cure a Cold in One Day Cures Grip in Two Days.
Take Laxative Bromo Quinine Tablets. *E. J. Grove* on every box. 25c.
Seven Million boxes sold in past 12 months. This signature, *E. J. Grove*
