Advice of the largest coffee dealers in the world is always to buy the old-fashioned Arbuckles' ARIOSA Coffee in the sealed packages. Don't ask for a pound of Mocha and Java, or buy by the price, for Coffee fluctuates and you cannot get the same coffee for the same price all the time unless you pay too much for it. Most of the so-called Mocha and Java Coffee is simply masquerading, and is not nearly as good coffee for you as Arbuckles' ARIOSA, the blend of the Brazilian Coffees most suitable to the taste and health of American people. By the looks there is no difference between roasted Java and Brazilian Coffees; many people drink Brazilian but pay for Java. The principal difference is that Arbuckles' costs you less. It is a mistake to believe that a high price guarantees quality. When you buy Arbuckles' ARIOSA Coffee, you get a full one pound package of the leading Coffee of the world. Its sales for 37 years are greater than the combined sales of all the other packaged coffees. By giving better Coffee for the money, we have built up a business exceeding the combined businesses of the four next largest coffee firms in the whole world. If your dealer will not supply the genuine, write to ARBUCKLE BROS., New York City
