Names of Dances. The position taken by the dancers gives the name to the "quadrille"dteral English for "a little square" in the French tongue. From the French we get also "country dance," which, as a matter of fact, has no reference to rural frolies, "Contredanse," which has reference to the position of the couples, opposite each other, is readily corrupted into "country dance." The "polka" is a Polish dance, the name being derived from the Bohemian word "pulka," meaning half, and refers to the half step which occurs in this measure. The "waltz" is Germanwaltzen, meaning to revolve-the circular motion of the couples easily explaining the connection. The "reel" is suggestively obvious. "Jig" is of course from the French gigue.-Harper's Weekly.

Inside Light. A number of butchers were conversing on what they had found in the stomachs of animals they had killed. After parrating several stories which could only be accepted by the credulous an old farmer sitting by declared that he had something to beat anything that had yet been told. The company asked for it. "Well," said the farmer. 'I had a cow once, and I went out luto the yard with a lantern to feed her. and I left the lantern in the yard and did not see it after that until the next day. When we killed the cow there was the lantern in her stomach and the light still burning."

Passed the Limit.

"I purchased these shoes here last month, and I want to get them exchanged," began the man in the department store. "You'll notice that the patent leather has cracked.'

"Oh, yes," exclaimed the clerk when he had examined the shoes. "They are old stock. The patent has probably expired,"- Harper's Weekly.
