A light that is brilliant and steady, gives little heat, no smoke and no odor,
and that costs but little to burn and needs but slight attention.

THE ANGLE LAMP

has these good points and besides these throws the light just where it wanted—
downward and outward. As to the cost to burn
One Quart of Ordinary Kerosene or Coal Oil Lasts Sixteen Hours.
Of course it costs a little more than poor, old fashioned lamps, but it saves its
cost many times over in a year. All styles from one burner up.

IVORY SOAP PASTE.

In fifteen minutes, with only a cake of Ivory Soap and water,
you can make a better cleansing paste than you can buy.

Ivory Soap Paste will take spots from clothing; and will clean
carpets, rugs, kid gloves, slippers, patent, enamel, russet leather and
canvas shoes, leather belts, painted wood-work and furniture. The
special value of Ivory Soap in this form arises from the fact that it
can be used with a damp sponge or cloth to cleanse many articles
that cannot be washed because they will not stand the free applica-
tion of water.

DIRECTIONS FOR MAKING.—To one pint of boiling water add one and one-half ounces
(one-quarter of the small size cake) of Ivory Soap cut into shavings, boil five minutes after the soap is
thoroughly dissolved. Remove from the fire and cool in convenient dishes (not tin). It will keep well
in an air-tight glass jar. COPYRIGHT 1898 BY THE PROCTOR & GAMBLE CO. CINCINNATI
