Herbert Cook who has a lucrative position in Omaha spent Sunday here visiting with his parents and other friends here.

Mrs. Lamont M. Holden who has been visiting with friends and relatives in this city for the past week, returned to her home at Minneapolis, Minnesota yesterday.

The fire bell came near taking a tumble from its lofty perch this week. The timber which holds the bell in position had slipped on the cross pieces as a result of the jarring in ringing the alarm, and about a dozen more strokes would have caused it to fall. It has since been repaired and is now safe and sound.

James Burden was painfully but luckily not seriously hurt on Saturday evening last. He was driving from his office through the court house yard and a rope attached to a tree, which had been used as a swing, caught in the buggy and tipped it in such a manner as to throw Mr. Burden out. His hands were badly skinned up and his face bruised.

List of letters remaining uncalled for at the postoffice at Red Cloud, Nebraska, for the week ending Nov. 16th, 1899.

Cobb, M. H. Dine, Ben Smith, Bessie Warren, John These letters will be sent to the dead letter office Nov. 30th, if not called for before. When calling for above please say advertised.—**T. C. HACKER, P. M.**

The residence of John Barkley on south Webster street had a narrow escape from being burned down last Sunday about 6:30 p.m. A lace curtain caught fire from a match which had been thrown down after lighting the lamp. Aside from burning the curtain and scorching the window frame no damage was done. An alarm was rung but before the boys got half way the good news was received that the fire was out.

The dry goods department of Turnure Bros. was the center of attraction for several days this week. The firm had engaged the services of W. H. Wilson, an artist who is an adept with the brush and who turns out oil paintings to order for you while you wait. During the three days of his stay here his studio in the north window of the store was always surrounded by a crowd watching him do his lightning work. Paintings were turned out in from seven to fifteen minutes and were presented to customers purchasing five dollars worth of goods.

Clothing Company.

HEADQUARTERS FOR CHILDREN'S CLOTHING.

Let's Have An Opera House.

Some time ago the Currier advocated the erection of an opera house for the purpose of a place of amusement and for the holding of public meetings, dances or anything else of that nature. At the time the article was printed several favorable comments were made to us regarding the idea and since that time some talk has been had by parties in regard to the project. No one will think for a minute that we can ever expect to have an opera house built by a single individual. A concentration of money by a number of citizens to be used for this purpose will solve the problem. In talking with one of our business men, who is one of the leaders when it comes to helping out any project which would benefit the town, he stated that he would be one of ten to put in \$500 for such a building. This would probably be too much for most of our business men to give but twenty persons could arrive at the same result by putting in \$250 apiece. Or it might be made up in shares of \$10 and let them take stock to suit their finances. There is not one of the large firms of our city but whom could put in \$250 and not miss it. We do not believe at the present time an opera house would pay a dividend to the investors but it would pay ten per cent interest on the investment. Kansas City and other cities have put up large convention halls by the concentration of money which would never have been built by single individuals and Red Cloud could do the same on a lesser scale. The reasons why we should have an opera house are many. Any man who is bringing up children owes it to them to provide a suitable place where they may go occasionally to seek amusement instead of going to places of questionable resort. Those in our city who are musically inclined should be allowed to have their taste gratified. The one big event which transpires once a year is the graduating exercises. Where will these exercises be held next year? The citizens owe our graduating classes a place to hold their commencement. In a business way an opera house means dollars in the pockets of our business men. Provide entertainment for the people and the people will come and they will spend their money while here. We understand that there is now a move on foot to carry out the project. Don't let the interest die out. Stand up for Red Cloud. Build an opera house.

Leggins and driving mitts, just the thing to keep out the cold, full line at Fogel & Hutchison's, Red Cloud and Cowles.

S. B. Lightfoot has registered a kick with the city council against the running of water down the drain in the rear of Jas. Peterson's implement store and at the meeting of the council last Tuesday the council decided that it was in no way responsible for the state of affairs as the water came from water meters, and the parties using motors should take care of the waste water. The city ordinance says that parties using water for motors shall provide means to carry the water off by waste pipes or covered drains connected with the city drains and sewers, and without damage, obstruction or flowage upon any street, avenue or alley in said city. The water commissioner notified parties having drain pipes connected with the city sewer, which is located on Cedar street and which extends as far south as Third avenue that they must take care of their waste water, notwithstanding the fact that they have complied with the ordinance and turned it into the city sewer without damage, obstruction or overflow upon any street, alley or avenue. Does the council think that the parties using motors should finish a sewer system? We pay the city for the use of water to run a motor, and the same ordinance by which the city is enabled to charge for the use of said water provides for the turning of it back into the sewer. If the city sewers create a nuisance because of its inefficiency that is not our fault.

Do you want a heating stove? If you do go to Wright's. He has a large line at the lowest prices.

The Five Senses

The hearing ear ministers largely to the mental nature. Its chief claim is that it waits upon the soul with "a sweet concord of sounds."

The sense of smell stands a step lower, divided about equally, in ministering to the physical and aesthetic, in man.

The sense of feeling is still lower. The nerves of sensation are its fingers; through them is fulfilled its function of handling and fashioning the mere materials of civilization.

Taste is the humblest among the senses. Its ministrations are devoted, primarily, to the body. The fireman that feeds the engine of the physical system.

Vision is the noblest of our senses. It presides over the activities of the lower faculties, and transcends them in the reach of its power.

Yet the most important of all senses is most abused. The teeth, the nose, the ears, all receive due attention upon the slightest note of warning; while shooting pains and dull aches in and around the eyes—nature's warnings—are allowed to go unheeded, when perhaps perfectly fitted glasses would relieve present trouble and save further regret.
