Within the last ten years the progress of discovery in every department of knowledge has made a new work of reference an impera ive

covery in every department of knowledge has made a new work of reference an impera ive want.

The movement of political affairs has keptaged with the discoveries of science, and their fruitful application to the industrial and useful arts and the convenience and refinement of social life. Great wars and consequent revolutions have occured, involving national changes of peculiar moment. The civil war of our own country, which was at its height when the last volume of the old work appeared, has happily been ended, and a new course of commercial and industrial activity has been commenced.

Lurge accessions to our geographical knowledge have been made by the intefatigable explorers of Africa.

The great political revelutions of the last decade, with the natural result of the lapse of time, have brought into public view a multitude of new men, whose names are in every one's mouth, and of whose lives every one is curious to know the particulars. Gre t battles have been fought and important sieges maintained, of which the details a e as yet preserved only in the newspapers or in the transient publications of the day, bu which ought now to take their place in permanent and authentic history. In preparing the present edition for the press, has according v been the aim of the editors to bring down the information of the latest postible dates, and to furnish an accurate account of the most recent discoveries in science, of the new string in the practical arts, as well as to give a succinat and original record of the progre was been begun after long and careful preliminar, liabor, and with the usogt ample resources for ca trying it on the accessing termination.

resources for a trying it as to a successful termination.

None of the origital storeotype plates have been used, but every page has been printed on new type, forming in fact a new type, forming in fact a new type, forming in fact a new type, some plan and compass as its predacesor, but with a lar greater pountary expenditure, and with such improvements in its composition as have been suggested by longer experience and entarged knowledge.

The illustrations which are introduced for the first time in the present edition have been added a t for the sake of pictorial effect, but to give greater jucidity and force to the explanations in the text. Tony embrace all branches of science and an ural history, and depict the most famous and remarkable features of scenery architecture, and art, as well as the various processes of mechanics and manufactures. Although intended for instruction rather than embellishment, no pains have the spared to insure their artistic excellence: the cost of their efectution is enormous, and it is believed they will find a welcome reception as an ad-

their execution is enormous, and it is believed
they will find a welcome reception as an admirable feature of the Cyclopædis, and worthy
of its high character.

The work is sid to Subscribers only, payable
on delivery of each volume. It will be completed in sixteen large octavo volumes, each
containing about 800 pages fully illustrated with
several housand Wood Engravings, and with
numerous colored Lithographic Maps.

PRICE AND STYLE OF BINDING.

Three volumes now ready. Succeeding votwo months.

*** Specimen pages of the AMERICAN CYCLOPAEDIA, showing type, illustrations. etc., will
be sent gratis, on application. FIRST CLASS CANVASSING AGENTS WANTED. Address the Publishers,

From Auother Standpoint-Notes

Mr. Sumner's confidence was a sacred trust, but the marble of death opens the lips of silence to the statement of many most interesting facts. Hawthorne remarked of him that "he said more things worth remembering than any man he ever knew; that his memory was an argosie freighted with all sorts of knowledge, that he threw overboard without stint.'

Two o the hotest summers ever known he stayed in Washington as Mr. Lincoln's confidential adviser, and it was during this period that Mr. Seward said "Mr. Lincoln had too many Secretaries of State." His laborious correspondence with the leading men of England, Bright, Cobden, Gladstone, Harcourt, Earl of Carlisle, Duke of Argyll, and a host of others, did much in moulding public opinion in favor of the Union during the most critical period of the war, and timely words of weight and wisdom in English jour-nals owed their inspiration to his

Soon after Chief Justice Taney's death he showed a card from the President, upon which was written:

"Hon. Charles Sumner. The vacant Chief Justiceship is placed at your disposal, A. Lincoln." HE THEN SAID: "There was a time when this office would have been the realized dream of my youth; but now it must not, it cannot be. The breach between Mr. Chaise and the President is growing wider and wider, and this will close it. No personal sacrifice is too great, nor can anything tempt me to desert my post. The Republican party must remain intact until its mission is fulfilled" It is well known that only the great Senator's persistency accomolished the appointment of Mr. Chase, after a tedious delay from October to December. Mr. Chase through life remained unconscious of Mr. Lincoln's offer and Mr. Sumner's refusal. Such was the delicacy of feeling that pre-eminently characterized his acts and efforts for his friends. The simple autographic card alone remains a witness that ambition was not the infirmity of his noble mind. Mr. Lincoln often spoke of htm a the "stand-by," and to him were confided all the doubtful questions of his foreign policy; to N. P. Willis, the poet, and to others he called him "his good genius," and to him, first of all, was told that thrice-drempt dream that preceded Lincoln's assassination. Mr. Sumner has LEFT ON RECORD

his liking for Mr Lincoln, and of his full appreciation of his wonderful character, his patience, and his patriotism in times of trying troubles. sic scholar fraternized, and found a your wife up for the pattern." And Everett, G, G, 13 1-2c; Great Falls, 1 50@3 50; Imperial, plain and stricommon cause in which to labor, to it was by the way of Tom's wife suffer, and to die.

Sometimes he talked of trees as of | was pleased with his shirts. friends, and the old English elms of Boston were his admiration. He told me he thought he could distinguish with closed eyes what tree he was near by the different melody of the winds' vibration through its leaves. This was especially the

HIS GREATEST FAVORITE of all the evergreens, the pine- tree. He watched with a gardiner's interest the acclimatization of the foreign rees planted by Downing in the park in front of his residence-Cedars of Lebanon and Cryptomeria Japonica-saying: "The embassadors of many countries come and go; change waits upon them, but these gentle diplomates from the Orient

nd Occident will stay with us al-I was at his house in Boston when he sold it, and after signing the deed he said thoughtfully: "In this house my dear mother lived and died; in this house I spent my boyhood, and I part with it with a heart full of sorrow, and with eyes full of tears. There are none who can ever love us with a mother's love. No, not one." And for a few moments he was lost in a cloud of memories of other days and other

During the pendency of the

SAN DOMINGO TREATY Mr. Sumner was offered, through the Secretary of State, the mission to England in place of Mr. Motley. Mr. Fish called upon him at his own house and tendered him the appointment. In answer, Mr. Sumner was brief and decisive. He indicated an inflexible determination to remain in the Senate in preference to any appointment in the gift of the President. I believe this was the last friendly interview be-

tween the two. His unostentations benevolence was so quietly bestowed that none but the recipient was aware of it, and when quite ill, so that he disliked to drive alone, he called for me to accompany him to see the Sergeant-at-Arms of the Senate about one of the employes (a poor colored woman) soon, as he thought, to be discharged.

"THEY LOOK TO ME," said he, "and if I do not help them who will?" I expostulated with him. He was so weak I feared the consequences of his climbing up the Senate steps, even with my assist-ance; yet he answered, smiling, in the dying words of an Archbishop of Paris: "Bonus pastor unimam suam dat pro ovibus suis;" ("The good shepherd lays down his life for his sheep.")

In the winter of 1873, after recovering from one of his severe attacks he said: "If my work were only ione-death would come to me, not a skeleton, with terror, but as the Greeks sculptured him-a youth crowned with poppies, bringing rest; yet it will all be well in God's own

time: and when I die I wish my "CARRIED TO THE GRAVE by the race I have served so long,

and to whose elevation my life has been consecrated." His disposition remained under all circumstances to the last unruffled, unsoured, and unembittered. It was the calm tranquility of a for-giving soul, with aims so elevated,

INTEGRITY SO SPOTLESS, seek in vain to find a parallel on the pages of history; and yet so tender was his heart, and so kindly sensitive his feelings, that, upon the personal appeal of a woman, he did not make an already prepared speech, by which a personal matter of justice to himself would have been righted, now left at the discretion of his executors. His faults, if

they can be called such, were his generous sympathy and his child-He was among the public men of his time who could truthfully say, "I never asked a vote from a single human being, nor have I ever solicited an office for myself." He utilized his life, and all its varied activities were employed to restore the equality of races and the free-dom of mankind. If America ever had a statesman he was one in its

largest, broadest, and fullest sense. To the philanthropy of Wilberforce he united the eloquence of Cicero. He urged and saw carried out John Quincy Adams' theory of freeing the slaves as a war measure. He was the foremost to advocate tle amendments to the Constitution and witnessed their triumphant adoption. He originated the idea of consequential damages, and the Geneva Arbitrators based their decision upon his interpretation of international law. With British habits and American ideas, selfsustained, self-determined, and selfassured, he gave confidence to the despairing, courage to the timid, and endurance to the weak during a four years' war: and of him may be truly said, in the words of Edmund Burke, "He never stirred from his ground; no, not an inch; he remained fixed and determined in principle, in measure, and in conduct; he practiced no management; he secured no retreat; he sought no apology." Such was Charles Sumner.

The Shirt That Opened Behind. A man in Greenfield, whom we will call William, got up the other morning and proceeded to put on a shirt which his wife had just made for him after a new pattern. As she stood at the mirror curling her hair, she heard a suppressed sound, half way between a groan and an oath, and turning round said, laughingly, "Why, my dear!" "Shut up!" he ejaculated; "you are a born fool. Never attempt to let a woman attempt to fit a shirt, she can't do it: it is one of the impossibilities."-"But William," depreciatingly, Don't you talk-let me talk. Do you think I'm going down town in this rig? A pretty disposition you've got; just because I happened to find a little fault last week with your ironing, you must go and make me a shirt without a bosom! Such malicious conduct, madame, is unpardonable. Shut up, I say. I won't hear a word. When a starched shirt front is the only finery that a man indulges in, is he not excusable for being particular in regard to that, I should like to know?. And this thing sets like the devil. Look how baggy it is here in front, and it feels behind as if there was a board bound across me;" walking up and looking in the glass, hitching up first one shoulder and then the other, after the indescribable manner of men trying a new garment. His wife room, she held it up behind him for a moment; and perceiving by his chop-fallen expression that he saw the point, and the front, she ran down stairs to settle the coffee and see that Bridget had set the table geometrically. As William walked down to his office that morning, he said to the first friend that he met. mine is a born genius. Look at this shirt now; she cut and made it all herself; no confounded button-The cool flat-boatman and the clas- holes to bother a fellow. Just send

Money and Commerce.

Daily Review. OFFICE OMAHA DAILY BEE,

March 31, 1874. March has played us one of her provential pranks and in spite the fair promises of yesterday morning has assumed one of her fiercest aspects, as if taking a sort of demoniac satisfaction in asserting her warning power over the affairs of men. The effect upon trade is felt more in the retail stores than among the jobbers. Business was quiet, however, in all lines and no change occurred in prices, except iu dressed poultry which is firmer and marks a light advance.

The week opens with milder weather and a buoyant feeling in business circles. Prices remain quiet with very little disposition of the buyers to "cut." Sugars are reported advancing in Chicago and St. Louis, but the advance is not sufficiently positive to cause a change in Omaha quotations.

Business in wholesale lines was fairly active to-day in all branches. The demand for dry goods was larger than usual. Groceries moved in heavy lots and prices were well maintained throughout. Coffees settled at yesterday's quotations and the impression in business circles seems to be that they have touched bottom, for the present at least. The market is well stocked with the better brands of teas and prices are low enough to compete with New York or San Francisco. More than the usual number of

ing rooms are still busy with their OMAHA MARKETS. Carefully Corrected Daily DRY GOODS.

this morning's trains, and the pack-

All these lands are good farming lands. Their surface is, in general, smoothly rolling table or upland, but comprising many thousands of acres of level bottom. Most of the tracts are supplied with living water: some of them with small groves of

wood. The soil of the creek and river bottoms is a deep, black alluvial or vegetable mold, and most of these bottoms are

The soil of the uplands is a lively brown or yellow loam, with a very deep and porous subsoil. The more elevated parts abound with those peculiar soft, brittle, limy lumps, which always denote the best wheat land. One tract in Sarpy County contains an extensive quarry of

stratified limestone. Nearly all these tracts are within the sound of the locomotive whistle, and many of them are close to Railroad Stations. Two or three pieces only are inconvenient to Schools, Mills, Post Office and Stores.

For any tract in WASHINGTON COUNTY, apply to ALEX. REED, in Blair, Neb. For any other tract, to I. N. TAYLOR in Omaha.

pers, etc., their business for years, and they all report that they can make much more money at work for us than at anything else. Our prices are so low that all can affort to purchase, and therefore the pictures cell at sight at almost every house. New beginners do as well as agents who have had hiry experience, for our beautiful subjects and low prices are appreciated by all. To make large subserverywhere all the seat has to do is to show the pictures from house to house. Don't look for work elsewhere until you have seen what great inducements we effer you to make momoney. We have not space to graphain all here, but send us your editess and we will send full particula s, free, by meil Don't celay if you want profitable work for your leisure hours, or for your whole time. Now is the favorable time to engage in this business. Our pictures are the finest and most pleasing in this country, and are endorsed by all the leading papers, including the New York Herals. Those who cannot give the business their entire attention can work up their own localities and make a handsome sum without ever being sway from home over night. Le all who want pleasant, profitable employment, without risking capital, send in their addresse at once and learn all about the business for themselves. Address GEORGE STINSON & CO., Art Publishers, Portland, Maine.

Pleasant urgative ellets

Or Sugar-Coaled, Concentrated, Root and Herbal Jpice, Anti-Billous Granules. THE "LITTLE GIANT" CATHARTIC. or Multum in Parvo Physic.

The novelty of modern Medical, Chemical and Pharmaceutical Science No use of any longer taking the large, repulsive and nauscous pills, composed of cheap, crude, and bulky tagredients, when we can by a careful application of chemical science, extract all the cathartic and other medicinal properties from the most valuable roots and cinal properties from the most valuables roots an herba, and concentrate them into a minute Granule, scarcely larger than a mussian deal, that can be readily swallowed by those of the most sensitive stomachs and fastidious tastes. Each tittle Purgative relief represents, in a most concentrated form, as nucle cathardle power as is embodied in any of the large pills found for sale in the drug shops. From their wonderful cathardle power, in proportion to their size, people who have not tried them are apt to suppose that they are baren or drastic in effect, but such is not at all the case, the different active in echelinal principles of which they are composed being so harmonized and modified, one by the others, as to produce a most scarching and thorough, yet gently and kindly operating eathartil.

2500 Reward is hereby offered by the pro-

\$500 Reward is hereby offered by the pro-prietor of chese Pellets, to any chemist who, upon analysis, will find in them any Calometer other forms of mercury or any other meseral ciher forms of mercury of any other miseral poison.

Being entirely vegetable, no particular care is required while using them. They operate without disurbance to the constitution det, or occupation. For Janualice, theadache, Constipation, Impure Blood, Pain in the Shoulders, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad taste in region of Kidneys, Internat Fever, Bloated feeling about Stomach, Billious attacks, Pain in region of Kidneys, Internat Fever, Bloated feeling about Stomach, Bush of Blood to Head, High Colored Urine, Unsociahility and Gloomy Forebodings, take Br. Plerce's Pleasant Purgutive Pelleta. In explanation of the remedial power of my furgative Pelleta over so great a valety of diseases, I wish to say that their action upon the animal economy is univers i, not a gland or tissue escaping their sametive impress. Age does not impair them; their sugar-coating and being enclosed in glass bottles preserve their virtues unimpaired for any length of time, in any climate, so that they are always fresh and reliable, which is not the case with the pales found in the drug stores, put up in cheap wood or paste-board boxes. Recollect that for all diseases where a Laxative, Alternative or Purgative is Indicated, these little Peilets with give the most perfect satisfaction to all who use them.

They are sold by all enterprising Druggists at 25 cents a bottle.

Do not allow any drugriat to induce you to take anything cler that he may say is just as good as my Peileto because he makes a larger profit on that which he recommends. If your druggist cannot supply them, enclose 25 cents and receive them by return noil from E. V. PIERCE, M. D., Propyr, BUFFALO, N. Y. ASK FOR PYLE'S
