THE WORK ORIGINALLY Published under the title of THE NEW AMERICAN CYCLOPAEDIA was completed in 1863, since which time the wide circulation which it has attained in all parts of the United States, and the signal developments which have taken place in every branch of ecience, literature, and art, have induced the editors and publishers to submit it to an exact and thorough revision, and to issue a new dition entitled, THE AMERICAN CYCLOPAE-DIA.

Within the last ten years the progress of dis-covery in every department of knowledge has made a new work of reference an imperative

made a new work of reference means.

Want.

The movement of political affairs has kept pace with the discoveries of science, and their truitful application to the industrial and useful rats and the convenience and refinement of social life. Great wars and consequent revolutions have occured, involving national changes of peculiar moment. The civil war of our own country, which was at its height when the last volume of the old work appeared, has happily been ended, and a new course of commercial and industrial activity has been commenced.

Large accessions to our geographical knowedge have been made by the industrigable explorers of Africa. large accessions to our geometricipal explorers of Africa.

The great political revolutions of the last decade, with the natural result of the lapse of time, have brought into public view a multitude of new men, whose names are in every one's mouth, and of whose lives every one is curious to know the particulars. Great battics have been longht and important sieges maintained, of which the derails are as yet preserved only in the newspapers or in the transient publications of the day, bu which ought now to take their place in permanent and authentic history. In preparing the present edition for the press, thas accordingly been the aim of the editors to bring down the information to the latest posible dates, and to farnish an accurate account of the most recent discoveries in science, of every fresh preduction in literature, and of the newest invention in the practical arts, as well as to give a succinct and original record of the progress of politica and historial event.

The work has been begun after long and careful preliminary inbor, and with the most ample resources for carrying it on to a successful termination.

News of the original stereotype plates have

full preliminary many it on to a successful resources for carrying it on to a successful termination.

None of the original stereotype plates have been used, but every page has been printed on new type, forming in fact a new Cyclopadia, with the same plan and compass as its predecessor, but with a far greater pecuniary expenditure, and with such improvements in its composition as have been suggested by longer experience and enlarged knowledge.

The illustrations which are introduced for the first time in the present edition have been added not for the sake of pictorial effect, but to give greater lucidity and force to the explanations in the text. Taey embrace all branches of science and na ural history, and depict the most famous and remarkable features of scenery architecture, and art, as well as the various processes of mechanics and manufactures. Although intended for instruction rather than embellishment, no pains have been spared to insure their artistic excellence: the cost of their execution is enormous, and it is believed they will find a welcome reception as an admirable feature of the Cyclopadia, and worthy of its high character.

The work is sold to Subscribers only, payable on delivery of each volume. It will be comcontaining about 800 pages fully illustrated with several thousand Wood Engravings, and with numerous colored Lithographic Maps.

ALL ABOUT A DEAD-BEAT.

American How Hall Made a Haul Out of Waterloo, Iowa-A Bit of Unwritten History.

(From the Waterloo, Is., Courier.) It was announced several weeks since by the newspapers of this city that one J. H. Hall, of Des Moines, had purchased \$30,000 worth stock of the Waterloo Agricultural Works, and he was to be a grand ecession to the town. He came representing himself as part owner of the school-desk factory at Des Moines, and proposed to purchase a \$30,000 interest in our agricultural works, to pay one-half in hand, in urniture, stock, etc., at Des Moines, and the balance to be paid in cash yearly payments as the stock was aid up, according to the rules of association. The company ent one of its members, Mr. Pond. Des Moines, to take an inventory the stock. He went to Des Moines, made the invoice, and reported everything satisfactory. Mr. Hall came to Waterloo, inspected the works, sent out men to buy lumber, was made president of the company; had his boots blackened twice a day, patronized the most fashionable barber, took rooms at Swift's Hotel, rented an elegant residence, bought the furniture and piano (and gave his note for it!), talked glibly of his interest in the that enterprise, and everything looked lovely for a time; but in the meanthe goods from Des Moines

through all right, but the balance did not appear. Letters of inquiry brought the news from Des Moines that the reason Mr. Hall did not forward the goods he had sold was because he did not own them! Well, that was an eye opener. That fact leaked out, and about the same time (that was over a fortnight ago) it sems that Hall had gone over Chicago on business and had forgotten to return, and he isn't here yet, and what's more, he is not likely to be here for some days to come, though several gentlemen Waterloo would like to see him. Indeed, they would give something for the privilege of an interview. But Hall is a forgetful cuss. He is ungrateful, too. Not a man bere has his photograph-nay, not even a lock of his blonde hair remains as a sweet memento of his presence. Nothing is left of Hall but his signature to certain drafts and notes, and they do not afford that degree of sunshine consolation the true lover finds in scanning the lines raced by the dear departed.

failed to arrive, and somebody

thought they smelt a very large

mouse. A sample of his desks and

Hall is a dead-beat. There is a ourning here over his departure. He has passed to that bourne from whence the dead-beat never returns. In the classic language of Jim Fisk, "He's gone where the woodbine twineth." To make a long story short, Hall saw Waterloo, liked the town, and concluded he'd buy it. He did buy a small slice, but has "sold" the whole city at a small margin. He borrowed \$6,000 of the First National Bank, giving a note with a good indorser, and turning out his stock in the agricultural works to the indorser, for the use of his name. Thus the bank is secure, but the indorser is out, and 1 all is

ahead \$3,000 on that transaction. He swindled a firm well known iere out of \$75, by a dishonored draft on a Des Moines bank. He rented I. M. Hay's residence, and bought the furniture in the house for which he gave his note-(Hay will sell it at a discount); he omitted to pay his last week's board bill, and now "where is Hall?" is just what several of our people would like to know. Hall won't tell where he is, and no one knows his whereabouts. The agricultural works are about \$100 ahead, for his \$30,000 in stock is not good unless the other half is paid up. Hall made over \$3,000 by his Waterloo trip, and has probably gone to greater fields of labor, if there are any such. He is a success as a promoter of manufacturing dead-beat enterorises. This is not his first effort. About a year ago he operated in Morris, Ill., where the people gave him a bonus of \$6,000 to start a

school-desk factory. He did so, and "done" the town, too. He purchased the machinery on time, set the works to moving, and then slipped out of Morris, owing his bankers, his landlord, the merchants and his workmen. He was formerly in company with a man by the name of Barns, in Chicago, in the school-desk business, from there to Morris, from thence to Des Moines, from the latter place to Waterloo, and all this within twelve months. Where the fellow will turn up next, the ancient Harry only knows. Probably some fine morning some Pond or Lake or Ocean, it may be, will turn up here from Michigan, Indiana, or Kentucky, and demand an invoice of Mr. Hall's interest in the Waterloo Agricultural Works. and if as shrewd as the man sent from Waterloo to take an invoice at D:s Moines, our people must take warning or the whole concern will be shipped away from them before they know it. Take it all around, this Hall affair is a bold, unblushing fraud, and the people of Water-loo are beginning to be a little shy of making investments with strangers. Hall is a sandy-whiskered, full-faced Englishman, fat and chubby, polite as a candidate for constable, smooth-tongued as a rural actioneer, cool as a cucumber, self-possessed as a rat in a meal-tub, and owns an interest in three school

"She was Young, She was Fair, and she Scrambled her hair."

desk factories. It recognized by

this description, box him up tight,

direct him to the "Agricultural Implement Works," Waterloo, Iowa, C. O, D., and no questions asked.

(J. Bateman Smith, in a Nashville Paper.) He was young, he was fair, and he parted his hair, like the average beau, in the middle; he was proud. but the truth must be told, he played like a fiend on the fiddle. But aside from this vice, he was everything nice, and his heart was so loving and tender, that he always

one girl had said, while she dropped her proud head, that 'twould kill her to see the thing perish. On a Sunday he'd search the straight road to church, unheeding the voice of the scorner; and demure he sat, like a young tabby cat, with the saints in the fair armen corner. He sang like a bird, and his sweet voice was heard fairly tugging

erage belle of the city; she was proud, but not bold, yet the truth must be told that the way she chewed wax was a pity. But aside from this vice, she was everything nice, and the world much applauded her bustle; and the Fayetteville boys, being charmed by the noise, walked miles just to hear the thing rustle. She cut quite a swell, did this wax-chewing belle, and the men flocked in armies to meet her; but she gave them the shirk, for she loved the young clerk, who sang like a hungry musquiter. She hemmed and she hawed, and she sighed and she chawed until her heart and jaws were both broken; then she walked by his store, while he stood at the door awaiting some amative token. She raised up her eyes with a pretty surprise and tried to enact the proud corner; but to tell the plain truth she just grinned at the youth who loved the devout amen corner.

## The Immigration from Russia to America.

The Eastern Budget of May says: Gen. Totleben, the defender of Sebastopol, has been sent by the Em-peror of Russia on a mission to the Mennonites with the object of deterring them from emigrating to America. It appears that the Emperor intended from the first to grant special privileges to the members of this sect with regard to the new military service law; but his intentions misunderstood by the officials, and that the Mennonites consequently determined to emigrate. The concessions now offered them are more extensive than those made by Prussia under the similar cirumstances. The Mennonites in about \$100 worth of patterns came Prussia were simply drafted in the sanitary branches of the army, while in Russia they are to be employed exclusively in military hospitals, specially set apart for the members of their sect.

A farmer was walking with friend through a beautiful meadow. when he chanced to observe a thistle growing thriftly on the opposite side of the fence. Immediately he sprang over and cut it off close to he ground. "Is that your field," asked the other. "Oh, no, but bad weeds don't care much for fences. If I should leave that thistle blossom in my neighbor's field I should soon have plenty of my own." His answer may serve as a hint to fathers and mothers. It is of importance to them how their neighbor's children turn out. Heart weeds care less than thistles for boundary fences. Boys and girls who go the same schools, or who live in the same neighborhood, catch many a trait from each other. It is our duty, as well as our interest, to do what we can for the

benefit of our neighbor's children. MONTANA, following in the wake of California and Colorado, has also its gold fever stage. A year ago discoveries of gold in paying quantities, on the Yellowstone and its tributaries, were made, and from time to time since then reports have reached us of new prospects. At last accounts the excitement seems to have centered in the Tongue River Valley, and thither several expeditions have started armed with needle-guns and other artillery, and abundance of grape and shell. The first discoverer took \$5.60 of coarse gold from eleven pans of dirt. Some two or three hundred fortune hunters are either at, or on their way to Tongue

Or Sugar-Coaled, Concentrated, Root and Herbal Juice, Anti-Billous Granules. THE "LITTLE GIANT" CATHARTIC, or Multum

Exhittle Purgative Pellet represents, in a most concentrated form, as much cathartic power as is embodied in any of the large pills found for sale in the drog shops. From their wonderful cathartic power, in proportion to their size, people who have not tried them are apt to suppose that they are harsn or drastic in effect, but such is not at all the case, the different active medicinal principles of which they are composed being so harmonized and modified, one by the others, as to produce a most searching and thorough, vet gently and kindly operating catharti:

other forms of mercury or any Being entirely vegetable, no particular care is .equired while using them. They operate without disturbance to the constitution, duct, or occupation. For Jaundice, Headache, Constipation, Impure Blood, Pain in the Shoulders, Tightness of the Chest, Dizziness, Sour Eructations of the Stomach, Bad taste in anouth, Bilious attacks, Pain in region of Kidneys, Internal Fever, Bloated feeling about Stomach, Rush of Blood to Head, High Colored Urine, Unsociability and Gloomy Forebodings, take Dr. Pierce's Pleasant Purgative Pellets. In explanation of the remedial power of my Purgative Pellets over so great a variety of diseases, I wish to say that their action upon the animal economy is universal, not a gland or tissue escaping their samative impress. Age does not impair them; their sugar-coating and being enclosed in glass battles preserve their virtues unimpaired for any leigth of time, in any cimate, so that they are always fresh and reliable, which is not the case with the pulse found in the drug stores, put up in cheap wood or paste-board boxes. Recollect that for all diseases where a Laxative, Alterative or Purgative is Indicated, the little Pelets wile give the most perfect satisfaction to all who use them.

They are sold by all enterprising Deputyless at 25 cents a bottle.

all who use them.

They are sold by all enterprising Druggists at 25 cents a bottle.
