THE WORK Originally published under the title of THE NEW AMERICAN CYCLOPARDIA was completed in 1863, since which time the wide completed in 1863, since which time the wide circulation which it has attained in all parts of the United States, and the signal developments which have taken place in every branch of ecience, literature, and art, have induced the editors and publishers to submit it to an exact and thorough revision, and to issue a new dition entitled, THE AMERICAN CYCLOPAE-

Within the last ton years the progress of dis-covery in every department of knowledge has made a new work of reference an imperative made a new work of reference an imperative want.

The movement of political affairs has kept pace with the discoveries of science, and their fruitful application to the industrial and useful arts and the convenience and refinement of social life. Great wars and consequent revolutions have occured, involving national changes of peculiar moment. The civil war of our own country, which was at its height when the last volume of the old work appeared, has happily been ended, and a new course of commercial and industrial activity has been commenced.

Large accessions to our geographical knowedge have been made by the indebatigable explorers of Africa.

edge have been made by the indefatigable explorers of Africa.

The great political revolutions of the last decade, with the natural result of the lapse of time, have brought into public view a multitude of new men, whose fames are in every one's mouth, and of whose lives every one is curious to know the particulars. Great hattles have been fought and important sieges maintained, of which the details are as yet preserved only in the newspapers or in the transient publications of the day, but which ought now to take their place in permanent and anthentic history. In preparing the present edition for the press, thas accordingly been the aim of the editors to bring down the information to the latest posible dates, and to furnish an accurate account of the most recent discoveries in science, of every fresh preduction in literature, and of the newest invention in the practical arts, as well as to give a succinct and original record of the progress of political and historial event.

The work has been begun alterlong and careful preliminary labor, and with the most ample resources for carrying it on to a successful termination.

None of the original stereotype plates have

None of the original stereotype plates have been used, but every page has been printed on new type, forming in fact a new Cyclopædia, with the same plan and compass as its predecessor, but with a far greater pecuniary expenditure, and with such improvements in its composition as have been saggested by longer experience and enlarged knowledge.

The illustrations which are introduced for the first time in the present edition have been added not for the sake of pictorial effect, but to give greater lucidity and force to the explanations in the text. Taey embrace all branches of science and an ural history, and depict the most famous and remarkable leatures of scenery architecture, and art, as well as the various processes of mechanics and manufactures. Although intended for instruction rather than embeliishment, no pains have been spared to insure their artistic excellence; the cost of their execution is enormous, and it is believed they will find a welcome recoption as an admirable feature of the Cyclopædia, and worthy of its high character. None of the original stereotype plates have

mirable feature of the Cyclopadia, and wordsy
of its high character.
The work is sold to Subscribers only, payable
on delivery of each volume. It will be completed in sixteen large octavo volumes, each
containing about 890 pages fully illustrated with
several housand Wood Engravings, and with
numerous colored Lithographic Maps. PRICE AND STYLE OF BINDING. Three volums now ready. Succeeding vo-lums, until completion, will be issued once in

two months.

• Specimen pages of the AMERICAN CYCLO-PAKDIA, showing type, illustrations. etc., will be sent ratis, on application. FIRST CLASS CANVASSING AGENTS WANTED D. Appleton & Co.,

. .

DOUGLAS COUNTY.

The Town of Waterloc-Manufacturing Facilities.

Social and Personal.

[Correspondence of the BEE.] SARATOGA, June 1. EDITOR OMAHA BEE:

Riding in the commodious cars of the U. P. a few days ago, while just entering the bridge spanning the Elkhorn river, a gentleman in the seat before me turned and asked: "Sir, will you be kind enough to tell me the name of this town which we are just entering?" "Waterloo," was the reply. "Oh, indeed! When I went through here three years ago I remarked to my wife, who was with me, that some day there would be a town here, as I considered it the best town site to be found on the road; now I see my words are verified." Further chat was postponed on account of my being obliged to leave the train at this point, although we fully coincided with the gentleman; and now we will give your readers a brief description of the town which our traveling friend was pleased to speak of so highly. Waterloo is the largest, and commercially the most important of the three towns situate in the western part of county. It occupies a beautiful site on the west bank of the Elkhorn, whose waters bound it also on the north. Though but two years old its growth has been steady, and probably the present season will show a larger pro rata of improvements than the ast. First, as to its water power, ts the boast of the town, the county, and the State, and on very few streams in the west can its equal be found. It is at present only used for the purpose of supplying the the necessary power to one flouring and saw mill, but movements are on foot to utilize it to more advantage, and before many seasons we

hope to see woolen, flax, paper and other mills doing their duty and depending upon it for power. It will not fall them. The flouring mill already located here has been in successful operation for nearly two years, and the "Waterloo" hrand has already achieved for itself a reputation second to none the State. The firm has been hanged materially by the addition of Messrs. Williams and Purchase, both formerly of Omaha, who bring to the enterprise abundant capital, and the necessary brains and western pluck. The firm, consisting of ern pluck. The firm, consisting of shade; or, simple tunies knotted as these gentlemen, and the former a scarf behind. With these tunies, proprietor, Mr. Elias Kelsey, are doing business under the name of the "Waterloo Milling Co." The the faille cuirasse must be of the same color as the jupon. Mohair is not only in vogue for travelling mill, building and machinery, is dresses, but makes a demi-toilette worth fifty thousand dollars. It is supposed to have the best outfit of shades of ecru, gray in all tints, machinery of any mill in the State. olive green, and reseda are the New York. Mr. Chas. Boltrush, the gentlemanly mode. Ecru not being a shade well defined harmonizes with the most been at the Lusiness for twelve years, and thoroughly understands every branch-showed us something new, but of great efficiency in the manufacture of first-class flour, towit: a steamer, a machine which for simple costumes, being neither thoroughly steams the wheat before | too light nor too dark, and not the it reaches the stones. This process renders the bran larger, and pre- street dresses admirably. Many cludes all danger of any future sweating, as it is termed. Mr. B. stated that he considered this steaming one of the essential requisites to the manufacture of a first-class article. The mill is capable of shipping a car load of flour and feed daily. Just back of the mill stands what is termed the hog palace—one of the completest arrangements for the housing of hogs, we ever saw. Several hundred of these animals are raised by the proprietors of the mill. Walking into the saw mill, we there noticed everything complete and unique. A large circular five-and-ahalf foot saw, is kept continually busy, besides a small one for lighter work. Rafting has been going on all spring. They can and have been sawing, we understand, about 3,000 feet daily, and it is estimated that there are at least 200,000 more waiting in the pond. Leaving the mill, and walking toward the main part of the town, we pass a very handsome residence, belonging to Mr. Elias Kelsey, situated about 200 yards from the mill, and just at the commencement of the town site

> ened, and other improvements made where practicable. lately, Mr. Silvas, the U. P. Photographer, whom we spoke of in our last letter, having purchased some fifty acres of fine land adjoining the town, has also laid out a new park. These will make the town in a few years, a splendid place for comfort and ease, as the river affords the best of fishing, and the prairies and woods afford excellent hunting.

By the way we would mention

the great number of pleasure seek-ers whom we find going to Water-

proper. This site has been re-sur-

loo to spend a day or two, and some a week, in fishing. Ample accom-modations can be afforded them at the hotel, the Waterloo House, and they will be hospitably received and generous entertained by the obliging host, Mr. Logan, to whom we are under many obligations for information relative to the town and its prospects. Or if they are of the sort who love solitude, they can do as many others are doing, pitch their tent beneath the broad spreading and shade yielding cottonwood and maple which line the banks of this beautiful stream for miles. We find the streets lined on either side with thrifty young maples which in a few years will add immensely to the looks of the town. We had the pleasure while in town of meeting with Mat Hanson, one of the best blacksmiths in the West. He makes a specialty of doing that most difficult of all smith work, sharpening mill points. Picks are shipped to him per express from all parts of the State, and from Iowa. We find the general merchandise trade well represented here by the Waterloo Milling Company, who have a very large stock on hand, while next door to them are still located the old reliable—the Donahoo Bros. Across the track we stepped into the store of L. L.

Iowa, is about opening a drug store, and will also practice medicine. Mr. Straight, a carpenter and build-er of Omaha, is about locating, and is at present busy on the house which Mr. Purchase is erecting. A large lumber yard is located here and doing a fine business. Many houses will be erected during the summer. Mr. Trimble, formerly of the furniture house of Omaha, has

handle show evi-

engaged laying out the yard for the manufacturing of brick, and as they seem to be men who go ahead with the business, and do not stop to talk much about it, we predict for them abundant success. The cattle raising interests are well represented. Messrs. Gardner, Stephens, and Williams owning and feeding near town several thousand head. Some of the finest pasture that can be found in the State is here.

In conclusion, we would say that we consider Waterloo to be one of the finest points on the road, and know of no better investment than putting money in it; to-day it is the attraction of all of our live business men in Omaha, and many are interesting themselves in it. All it lacks o make it immediately the equal of Fremont is the want of bridge comnunication with Saunders and Butler counties, across the Platte. Let the people of Douglas County this fall make this a point; it will be one of the grandest things for Omaha that ever was done. Thousands and hundreds of thousands will flow in yearly to its coffers which now enich Fremont, Ashland, Lincoln and Chicago. Put in your stock yards, put up your packing houses, bridge the Elkhorn and the Platte, and Omaha leaps in a month from almost abject poverty to wealth. Try it! It wont cost her fifty thousand dollars—if you can't get a State bridge, put in a toll bridge; any-

thing for a bridge. The result will be the entire trade of Saunders, Butler and adjoining counties will come to us, and many times repay the trouble we may undergo to get it. W. W.

## THE LATEST FASHIONS.

PARIS, May 18. [Correspondence of THE BEE.] FASHIONS.

The variety of new tissues to be met with in the shops is astonishing; they have the merit of being handsome and cheap. There are materials in wool, silk and wool, and cotton and wool. The latter looks very fresh and pretty, makes up well for country dresses, and can be simple or elegant, according to the trimming. All these tissues are generally in light shades; and whether the material be precale, linen, batiste, mohair or sultane, it is ornamented with English embroidery, Russian guipure or cheny. Stripes, to every one's surprise, have become fashionable again; some toilettes in white and marom faille, or white and black, looked charming at the late races. Long polonaises are to be met with, ornamented in front with bows of ribbon matching the stripe, upon fulard jupons, or stugs of the same diverse colors; the same remark perhaps applies to the grass, but the atter have most distinction when light, upon a darker color. "Delfblue" has just now a great success least of it advantages, it suits costumes are to be met in black faille, ornamented with jet, com-pleted by a pelerin loaded with fringe and jet lace. Steel-blue produces an excellent effect upon pale blue faille or marine blue. For full dress, pearls and embroidery are still essential; a new silk gauze, something resembling the fror-fror, strong and in all the prevailing shades, is much patronized for rich toilettes. The cuirasse will be worn as far into the summer as the heat will permit; it displays the gracefulness of the figure too well to be quickly set aside. Ladies not tall and slender, should avoid the cuirasse; with the latter and a China grape scarf carelessly tied before

or behind, one can do without a confection. A graceful and economical toilette can be made of Valencia-a cheap material in silk and wool-by trimming it with a small flounce of light colored taffeta; a colored flounce around a polonaise, the sleeves, and the pockets, or around the tunic, imparts elegance to the most modes tissue in the world. Outside of diadems, no two hats assemble each other; those in straw are trimmed

veyed, the streets have been widfoularde -1-14 China crape, and bouquets of flowers. The Leopold-Robert form, appears to reign in great favor. Co lars in the finest linen or battite, are worn with street costumes; they are worn with street costumes: they are worn high behind, sometimes plaited, very open before, and fold-ing down. Colored collars are suit-able for travelling, morning wear and ple-nies. Young ladies even copy the children's sailor collar.

ALL ABOUT THE WATER WORKS

MONACO.

The central city of the West
Quite proud of late has grown,
And feels it can no longer wait
A good sized pond to own.
The greatest cities of the world
Who wish to cut a swell, At once erect a reserve ir Upon their hignest hill. We read in the days of Noah That water wo ks were tried; The trouble was trey had no sewers, And so the people died. Let us then remember If water works we try, To put in sewers good and strong, And make our streets quite dry And when the thing is done
We'll celebrate at once,
Then everybody in the town
Will bey their hats of Bunce.
For all new styles that row are out,
Some fifty kinds or more,
You'll find them cheap at Bunce's
Famous New York store. Th Champlen Hatter of the West, 250 Doug meh26tf GREBE & KARBACH, 15th st, tetween Fartham and arney sta OMAHA, - - NEB. - MANUFACTURER OF-Spring and Farm Wagons, BUGGIES AND CARRINGES. Dealers in and manufacturers of AGRICULTURAL IMPLEMENTS!

leasant urgative PELLETS.

ellets Or Sugar-Conted, Concentrated, Root and Herbal Juice, Anti-Billous Granules. THE "LITTLE GIANT" CATHARTIC, or Multum in Parvo Physic.

The novelty of modern Medica, Chemical and Pharmaceutical Science No use of any longer taking the large repulsive and nauscous pills, composed of chem, crade, and bulky ingredients, when we can by a careful application of chemical science, extract all the cathartic and other medical properties from the most valuable roots and herbs, and concentrate them into a minute Gran. herbs, and concentrate them into a minute Gran-nie, scarcely larger than a mustard seed, but an be readily swallowed by those of the most-ensury stomachs and fastidious tastes. Exchinic Purgative Polici represents in a most concentrated form, as much cathartic power as is embodied in any of the large pills found for sale in the dry shops. From their wonderful ca-thartic power in proportion to their size, people thartic power, in proportion to their size, people who have not tried them are apt to suppose that they are have no characte in effect, but such is not tried them are apt to suppose that at all the case, she different active medicinal principles of which they are composed being so harmonized and modified, one by the ohers, as to produce a most scarching and thorough, velocity and brindly operating enthantic. entharti:

\$500 P eward is hereby offered by the proprising of these Peliets, to any chemist who,
upon anniysia, will find in them any Calometor
other forms of mercury or any other museral Being entirely vegetable, no particular

care in required wants using mem. They operate without dismrbance to the constitution, diet, or eccupation. For Jannalice, Headache, Constipation, Impure Blood, Pain in the Shoulders, Tightiness of the Chest, Bizziness, Sour Eructations of the Stomach, Bad taste in acouth, Billious attacks, Pain in region of Kidneys, Internal Fever, Bloomed feeling about Stomach, Bush of Ridod to Head, High Colored Urine, Unsociability and Gloomy Forebodings, take Br. Pierce's Pleasant Purgative Pellets. In explantion of the ranchish power of my furgative Fellets over so great a valety of diseases, I wish to say that their action upon the animal economy is universal, not a giand or tissue escaping their samafive impress. As does not impair them; brides preserve their virtues unimpaired for any ways from and reliable, which is not the case with the pals found in the drug stores, put up in charp word or paste board boxes. Recollect that for all discusses where a Luxantive, Alternity of Purgative is indicated, these little Pentes will give the most perfect satisfaction to all who use them.

They are sold by all enterprising Do not allow any draggist to induce you to cold as my Pellero because he makes rollt on that which he recommends. drugslet cannot supply them, enclose 25 conts and receive them by return mail from E. V. PIERGE, M. J., Prop'r,
