

TO CORRESPONDENTS.
We do not desire any contributions whatever of a literary or political character; and we will not undertake to preserve, or to return to authors, in any case whatever, our staff is sufficiently large to more than supply our limited space in that direction.

On and after October twenty-first, 1872, the circulation of the DAILY BEE is assumed by Mr. Edwin Davis, to whose order all subscriptions not paid at the office will be payable, and by whom all receipts for subscriptions will be sent.

GENERAL BEAUBOURG, is about to emigrate to South America. He has received the appointment of Chief Engineer of the Argentine Republic, with a salary of \$20,000 in gold per annum, and will sail for South America within a few days. He will have charge of the defensive works, and will also superintend the explorations of the Plata river.

THE PROFUNDITY of the financial views of the Omaha Republican is equally equalled by its devotion to the expansive principles of the Ko-op order of industrial bunnies. A few days ago this ponderous Penderlin article argued that times were hard in the west because money was too high and currency too scarce.

THE REPUBLICAN MINORITY. The Republican journal of this city says the Democracy is in a hopeless minority in this State, and that, therefore, the Germans should not join it.

WHEN THE BEE declared that the Democratic party in Nebraska, was in a hopeless minority, it simply stated an incontrovertible fact. At the last general election in November, 1872, the majority for Grant and Wilson was over 10,000.

THE LOCAL ELECTIONS of 1873 and 1874 have demonstrated that more than two-thirds of the voters that have settled in Nebraska since 1872 are in the habit of voting the Republican ticket.

WHEN THE BEE declared that the Democratic party in Nebraska, was in a hopeless minority, it simply stated an incontrovertible fact. At the last general election in November, 1872, the majority for Grant and Wilson was over 10,000.

INDUSTRIAL POINTS.

An effort is being made to establish a silver-plate factory at Peoria, Des Moines is to have a new brewery, 40 by 100 feet, and three stories high.

The new Palace Hotel at San Francisco is to have water-works of its own.

A New York paper enumerates some of the things which the metropolis ought to have, but which it lacks.

A Venetian founder named Giordani has discovered a new process of casting, by the operation of which, at a single flow of the liquid metal, not only large statues, but groups of the most elaborate complexity can at once be produced, and with so fine a finish that no supplementary chiseling is required.

A young lady in Concord, Mass., says there is a great dearth in the poultry business. She commenced with about 60 fowls in the spring.

The Harrisburg Car Manufacturing Company has closed a contract with the New York Central Railroad Company for the manufacture of four hundred cars.

It is gratifying to find copper smelting added to the vast and diversified industries of Pennsylvania. The Schuylkill Works at Phoenixville are, we learn, making satisfactory progress in that line, having already smelted one million and a half of tons of ore, as well as from Texas and New Mexico.

It is not generally known that steel can be made so hard that it will pierce any substance but diamond. Many jewelers and lapidaries experience great difficulty in getting the points of their drills hard enough to pierce an emerald. For their benefit, as well as for that of miners and others using drills requiring a very hard point, the following method of treatment is recommended.

A Hartford letter states that the subscription book business was badly hit by the panic. Of 12,000 or more agents who started out, the majority are out of employment, and instead of an expected sale of 250,000 copies of the new Hartford books, the aggregate sales only reach 60,000 to 70,000 copies.

POLITICAL NOTES.

Col. John B. Mead, of Randolph, Va., is a candidate for Congress against Judge Poland.

Montgomery Blair is said to have a good prospect of being sent to Congress from his district in Maryland.

The Hon. John A. Kasson has arrived home from Des Moines. He stands by his letter and is not a candidate for re-nomination.

Bill Crutchfield, Republican Congressman of Tennessee, says the civil rights bill was not passed, because the country was divided into two camps.

The ranks of the Massachusetts Congressmen are fast thinning out. Besides Dawes, Hooper, and the Brothers Hoar, who have announced their own withdrawal, Mr. Worcester Spay, and some others will be dropped, and it is hoped Butler will be kept.

Candidates for Senator Fenton's seat in the United States Senate are already getting numerous. If the Albany Express is rightly informed, that journal finds on the Democratic side ex-Governor Seymour, Governor Hoffman, and Mr. Tilden, Clark, Sanborn, Potter, and Sanford E. Church; and on the Republican side Governor Dix, Governor Morgan, Judge Robertson, Hon. A. F. Cornell, and the Hon. Lyman Tremain.

The adoption of the new Ohio Constitution will be made a particular question. The Democratic committee of Wayne county has declared against it, and the Cincinnati Enquirer calls upon the Democracy in all of the other counties to follow the example.

Andry Johnson is making such apparently successful strides toward the United States Senate that Henry S. Foote has thrown himself in the way, bound to defeat him at any hazard. Foote's first proclamation to the people of Tennessee has been issued.

England has now 38,000,000 spindles in her cotton mills, with nearly 400,000 looms, and 650,000 workmen. Next comes the United States with 8,000,000 spindles; France, 5,700,000; the German Zollverein, 4,300,000; of which Austria possesses 1,700,000; Russia, 2,000,000; Switzerland, 1,800,000; Austria, 1,400,000; Spain, 1,400,000; Belgium, 600,000; Italy, 500,000; and over 2,000,000 for other countries.
