**WESTERN NEBRASKA and
COLORADO FARMS**

are fast increasing in value. Their 1915 yield of from 25 to 45 bushels of wheat per acre will exceed the present price of similar and adjoining lands. Indications point to the greatest demand for these desolved Western lands that the West has yet seen. The incoming inquiries show already the movement to get hold of one of these farms before it is too late; if you can buy these lands at from \$15 to \$35 an acre you can make up your mind that they will be 50 per cent higher in the near future. Dairymen are making money. The silo has revolutionized farming on these lands and insures a return value that has never been known. All farm improvements on adjacent lands bear testimony to their worth. Yuma County, Colorado, last year produced \$1,275,000 worth of wheat, \$600,000 worth of corn and \$1,280,000 worth of stock. This was about the production of other counties where these lands lie in Western Nebraska and Eastern Colorado.

Let me send you maps, folders, and place you in touch with land agents and otherwise help you. I am employed by the Burlington to do this.
