

Flies are More Dangerous Than You Think

Flies breed so fast it is difficult to stamp them out. But, at least, we can keep them out of our houses.

And we ought to keep them out—not only for our comfort, but for our health. Many people don't realize what great disease-carriers flies are. They often come laden with disease germs directly to our food.

Screen the house and porches well and you prevent disease. Also you add to your comfort and peace of mind.

It does not cost much to screen a house. Let us screen your house.

Keep Business Going!

This is the most patriotic answer to the universal American question, "What can I do for my country?" It applies to us all alike—men, women and children. It is universal, therefore democratic; and this war is for democracy.

A prosperous country can pay for a war, an unprosperous country can't. A prosperous country can help the Allies, an unprosperous can't effectively help herself.

Keep Business Going

forward so that the country can effectively go forward. Keep money circulating, keep people employed, keep wages good, keep making money so that we may have it to use and sacrifice in the common cause. Be economical, which means be NOT wasteful. Practice

Patriotic Economy

by buying carefully and using efficiently. Spend money, don't hoard it; thus, your neighbor will spend money and not hoard it, for hoarding stops the well-spring of wealth, lessening the need for employment—possibly in time your own employment. It is hoarding, not war; that makes panic and disaster. Keep

The Nation Progressing

while the nation helps to keep the world progressing. Civic improvement must be carried forward; railroads must renew their equipment; factories must be kept going; labor must be employed, merchandise must be produced, distributed and used; homes must be kept up. The more we do, the more we can do.

The keynote is clearly sounded for us when

President Wilson Says:

It is evident to every thinking man that our industries, on the farm, in the shipyards, in the mines, in the factories, must be made prolific and more efficient.

Our industries are prolific only when patronage makes them so. Business slackens when buying slackens. And slackened business cannot grow efficient, any more than stagnant water can grow pure.

Idle Business Invites Competition

If American business grows inefficient through idleness, foreign business will make inroads upon it after the war. This is a thought for every patriotic American to consider now. It is for us—all of us—to keep our industries mobile and active so that they may have the force and momentum to compete when the smoke of battle clears.

Keep Business Going

for our country's sake. War must be waged on the sinews of war.
