COUNTS'.

Not very many years ago in the history of the world, the man that lived in America had to hunt for his food, or go without.

Now he sits down at a table and decides what he wants to eat; or his wife calls up the market and has it sent home for him. And what he gets is incomparably better.

Everyone of us has some part in the vast human machine, called society, that makes all this convenience possible.

The packer's part is to prepare meat and get it to every part of the country sweet and fresh-to obtain it from the stock return, to dress it, cool it, ethp it musiy milles in special refriggarator cars, imp it cool at distribuling points, and get it into the conformer's hands - your have's through rotallors, all within about two weeks.

# For Fourteen Years

By DR. ARTHUR N. DAVIS Dentist to the German Ruler From 1904 to 1918

R. DAVIS, a young American, born at Piqua, O., and graduate of a Chicago dental college, went to Berlin in 1904 to work with a famous dental surgeon who for years had been practitioner to the kaiser and other members of the German court. Within a short time Dr. Davis' associate committed suicide and the young American wasestablished as the court dentist. In that capacity he became intimately acquainted with the kaiser, and the latter, in the course of dozens of friendly talks, revealed himsell and his ambitions as he probably did to no other person outside his immediate circle.

Dr. Davis has written the story of his relations and interviews with the kaiser and we have arranged to print his remarkable narrative in serial form. The first installment will appear in an early issue.

This true narrative lays bare the mind of the despot who has deluged the world with blood. It shows by the emperor's own words how he has approved every act of cruelty and barbarity that the Gersman armies have perpetrated during the war. It shows how the kalser grew to hate and depoise Americans and how he gave warning that the United States should be punished.
