We believe that it pays to give our customers service and satisfaction; that is why we want to sell you a

DE LAVAL CREAM SEPARATOR

The concave-bottom, self-centering bowl in the NEW De Laval Cream Separator is the biggest advance in separator construction in 30 years.

It has greater capacity without increasing either the size or the speed, and it is so supported upon the detached spindle that it will run true and do perfect work even after long and hard wear.

Cross-section of new bowl, showing new method of distributing milk between the discs.

It has fewer discs than the old type bowl. All discs are unnumbered and interchangeable. Discs are caulked only on one side. The milk distributing device is removable. It's easier to wash than ever before.

We're here every day to explain the NEW De Laval to you—to go into all the details. You can buy one from us on such easy terms that it will save its cost while you are paying for it. Come in and talk it over.

THE ONLY DEMOCRATIC PAPER IN WEBSTER COUNTY

A Hastings paper reports "geese flying north." The salubrious weather of last month must have got on their nerves.

The big Pillsbury flour mills at Minneapolis, have shut down because of over supply of flour on hand. They claim they have no market for it. As a partial explanation we venture to add "At the price demanded."

Speaking of "reform legislation," during the ten years last past Nebraska has taken the lead in such matters as child labor legislation, protection of female labor, workmen's compensation, regulation of public service corporations, temperance reforms, etc.

General Foch is reported as wishing he could have had a few days more in which to deal the Prussian military system a final blow. At the signing of the armistice he had 500,000 of the enemy soldiers trapped in a pocket where escape seemed impossible. Perhaps this was one reason why Germany capitulated.

All we are asked to do when we are asked to subscribe to the Fifth Liberty Loan is to lend to the United States Government the money that saved the lives of hundreds of thousands of American boys that would have died had the war continued another year. That is all. We are not asked to give; we are asked to lend our money, the money that saved American blood. It seems to me that in that though there is a real appeal to the heart.

The groundhog had no chance to see his shadow and will therefore remain out of doors the rest of the season. Just to start something in the line of argument your attention is called to the fact that Easter does not arrive until April 20th, extremely late, and the end of the lenten period is popularly supposed to be the beginning of spring. This presages a late spring season—the groundhog affair signifies an early one. The question is before the house. Are there any remarks to offer?

It is related that a dispute once arose relative to the proficiency of two noted liars. Some prize money was put up and a contest arranged. The first man started with "There was once a poor Nebraska farmer"—"Give him the money," interrupted number two. "There is no such thing as a poor Nebraska farmer." Which reminds us of the preacher who announced that his subject for the Sunday evening service would be "Liars" and added "We hope there will be a large number present at this service."

Our Right To Be Proud

The Fourth Liberty Loan ended with the largest amount of money ever raised anywhere, ever subscribed at any one time, and with more persons subscribing than to any other loan or project in the history of the world.

Such magnificent achievement could be attributed to nothing else than the loyalty and willing sacrifice of an aroused people, determined to back their Government to the limit of their ability, by lending every dollar needed to win the war for a just and righteous cause.

The unprecedented record of a 200-million dollar war loan quota oversubscribed by nearly 36 million dollars proves there is apparently no limit to the Tenth Federal Reserve District war work. And now that the necessity arises for a Fifth and last Liberty Loan to finish the job, bring the boys home and square accounts, this record should be broken just as the Tenth Federal Reserve District has been breaking records of production of war necessities ever since hostilities began.

Our brave American soldiers "over there" beat back the enemy, smashed military records, and won the right to wear their well-earned laurels. So the people here at home, who backed them to win a victory so glorious, and are going to back them with money until the last man is home, will be entitled to display their patriotic pride.

Nebraska leads all the states in the Union in the per capita production of corn, wheat, alfalfa, pork, beef, butter and eggs.

Special Sale

Beginning Saturday, February 8th, We Are Going to Offer Reductions on the Following Goods:

Victory Liberty Loan

The Fifth Liberty Loan is to be the Victory Liberty Loan. The bonds are to be offered for sale to the American people to provide revenues needed to complete the job. Therefore, it is to be the last of the series of Liberty Loans.

The size of the loan is to be determined by the financial needs of the Government at the time it is offered; but it will not be much smaller, if any, than the Fourth Liberty Loan, which was for \$6,000,000,000.

How long the bonds are to run, the rate of interest they are to bear, just what kind of bonds the Government will put out, are matters to be determined by the Secretary of the United States Treasury.

The date for the opening of the campaign for subscriptions to the Victory Liberty Loan cannot at this time be foretold. It probably will be in April.

Pointers About Nebraska

The largest smelter of fine ores in the United States, or in the world for that matter, is at Omaha. Its output in 1918 was in excess of \$17,000,000.

The spring wheat average in western Nebraska will be tremendously increased this season. Immense areas of virgin prairie sod have been turned by tractor during the past eighteen months, and most of this acreage will be sown to spring wheat. Some, however, will have a first year crop of flax. Cheyenne, Kimball and Banner counties are in the lead in the matter of new acreage brought under cultivation during the last two or three years.

For a five year period extending from 1912 to 1916, statistics compiled by the federal department of agriculture show that Nebraska ranked sixth among the states in the total production of thirteen agricultural products, namely: corn, wheat, oats, rice, potatoes, sweet potatoes, tame hay, tobacco and lint cotton. The states ranked in the following order: Texas, Iowa, Illinois, Kansas, Ohio, Nebraska. But that does not tell the story. Nebraska, the sixth state in total production, was the first state in per capita production. Kansas with 32 per cent more population exceeded Nebraska in total production by less than 3 per cent.

California has a law under which counties or associations of counties may appropriate a certain amount per capita for advertising purposes, usually amounting to from 2 to 5 cents per capita. The result is that California is the best advertised state in the Union and growing in population and wealth at an amazing rate. Yet Nebraska enjoys a climate that is healthful and invigorating, and boasts of some of the finest scenery on the continent. In the production of everything that mankind needs to sustain life and make it enjoyable, Nebraska far excels California. California's annual wheat crop would scarcely provide the seed for one year's sowing in Nebraska. Nebraska's annual corn crop is worth more than California's annual fruit crops. Every forty days Nebraska lays so many eggs that California's annual output of gold and silver would not purchase them. California boasts of great fishing industries, yet a thirty days output of Nebraska butter is worth more than California's annual fisheries output. Farming the fertile soil is Nebraska's chief industry; farming the tourist is California's chief industry.
