Announcement

I have sold my furniture and undertaking business to Beck & Boyer, who have taken charge of the same, and wish to thank the many friends and patrons for their patronage and hope that they will continue to do business with the new firm. After a two weeks absence I will again be in Red Cloud where I request that all owing me will call and settle their account. Again thanking you for past favors I am respectfully yours, ROY SATTLEY.

Farm Bureaus Getting Results

County farm bureaus have saved farmers of the United States millions of dollars, thru cooperative projects to eliminate waste, according to statistics now being gathered. Factors which have been causing millions of dollars in loss, such as hog cholera, grasshoppers, insect pests of all sorts, blackleg, etc., have been successfully fought by cooperative community projects under the leadership of farm bureaus. More than 2,300 counties of the 2,336 counties of the United States now have farm bureaus.

Definitions of a Booster

A booster is a citizen who talks as strong for his town when he is at home as he does when he is 1000 away, and vice versa.

A booster is a man wise enough to know that by helping his community he is helping himself, and then acts on that knowledge.

A booster is a man who contributes to the religious, social, charitable and commercial undertakings of his city in proportion to his means.

A booster is a man who will let the "We spirit" dominate his thoughts and actions and will work in harmony with his fellow citizens for the community betterment.

A booster is a man who helps to keep his city clean morally and physically.

A booster is a man willing to serve.

A booster is cautious in his criticism of those willing to serve.

A booster is the man who believes that his home town is the best place in the whole wide world. That's a loyal booster.

A booster is a man who believes in work, faith, charity; that day follows night; that time heals; that humanity contains more good than bad and that this old world is a mighty good place to live in.—Ex.

Rigorous Mourning.

"Germany's week of mourning over the harshness of our peace terms was rigorously observed—nit," said Major Frederick Palmer, the famous war correspondent.

"There's a story about the week of mourning from Berlin. A Berlinese assistant theater manager said to the manager: "Is our burlesque going to observe the week of mourning, boss?" "Rigorously, sir, rigorously," the boss replied.

"Close down—is that the idea?" said the assistant.

"Close down nothing!" said the boss. "We'll put all the chorus girls in black silk stockings."

To Keep Castaways Dry.

Louis O. Anderson has invented a "storm cover" for boats which, when adjusted, covers both boat and rower so completely that waves and rain will roll off it as water rolls off a duck's back. The suit, which includes a headpiece, is made full at its juncture with the rubberized cover, says the Popular Science Monthly, so that the coxswain may try to paddle with one of the oars while sitting in the stern with the tall spread out behind him. His other oar makes a backbone for the cover.
