Catarrhal Deafness Cannot Be Cured by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure Catarrhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the Blood on the Mucous Surfaces of the System. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces. ONE HUNDRED DOLLARS for any case of Catarrhal Deafness that cannot be cured by HALL'S CATARRH MEDICINE. All Druggists 75c. Circulars free. F. J. Cheney & Co., Toledo, Ohio.

"Female" Destroyers the Deadlier. Strangely enough, although the American destroyers carried greater fuel supplies than the British, they were rather more dainty and graceful in their lines—a fact that inspired a famous retort which rapidly passed through the ranks of both navies. "You know," remarked a British officer to an American, "I like the British destroyers better than the American. They look so much sturdier. Yours seem to me rather feminine in appearance."
 "Yes," replied the American, "that's so, but you must remember what Kipling says. 'The female of the species is more deadly than the male.'"

Using Up Cooks. "What! back again?" exclaimed the proprietor of the employment agency. "Yes; I want to get another cook," said the red-faced man, calling. "But you've had four cooks within two weeks!"
 "I know it; but, you see, we have to leave our flyer out in the back yard, and we can't afford a garage, and every one of the cooks you've sent us has tried to run it. I reckon they'll have to enlarge the local hospitals if your supply of cooks holds out!"
 He Knew. "Don't you realize how much your life means to me?"
 "Sure; if I die you get my insurance."
 He Was One. "You ought to have married a fool."
 "I'm glad you think I did the correct thing."

BOSCHEE'S SYRUP.
 A cold is probably the most common of all disorders and when neglected is apt to be most dangerous. Statistics show that more than three times as many people died from influenza last year, as were killed in the greatest war the world has ever known. For the last fifty-three years Boschee's Syrup has been used for coughs, bronchitis, colds, throat irritation and especially lung troubles. It gives the patient a good night's rest, free from coughing, with easy expectoration in the morning. Made in America and used in the homes of thousands of families all over the civilized world. Sold everywhere.—Adv.

Put It On His Own Hand.
 Patience—You're engaged to Fred, aren't you?
 Patrice—Yes; but I'm not happy.
 "What's wrong?"
 "I'm afraid he's selfish."
 "Why so?"
 "He asked me for my hand and I gave it to him."
 "Of course."
 "Well, it wasn't until I had given my hand to him that he put a diamond ring on my finger."
 "Of course not. But how does that show selfishness?"
 "Why, it was his hand, wasn't it?"

Waterproofing.
 To make cloth waterproof dissolve ten pounds of resin in four gallons of hot linseed oil. Pour into a tub to which a wringer has been attached. Fold cloth evenly lengthwise, making a strip 9 inches wide. Pass this through the hot oil. As soon as well soaked, run through the wringer, setting it as tight as possible. Spread on grass immediately and do not fold or leave indoors until thoroughly dry. Drying may take a week or more. This solution will treat about fifty yards of cloth.

One Problem Solved.
 Under some shady trees sheep gates make a rude enclosure and a woman too old to work sits knitting on a rustic bench. About her are dozens of the happiest, healthiest children and babies that heart could desire. This scene shows how one farmer in Cheshire solved the day nursery problem and cared for the children of six new help.
 Help he had to have; men could not be found, and the women would not come unless their children could be cared for. He served milk and biscuits to the children in their paddock, and they grew happy and strong in the fresh country air. The farmer says his small outlay has been more than made up to him in the increased output of the women, and many other farmers are planning to follow his example.—London Mail.

Eight Pictures on a Film.
 As many as eight photographs may be taken on the same film by the aid of a special camera-back invented recently. When the film is loaded there are two masks in front of it, each of which may be adjusted so that certain portions of the film were exposed. The photograph is then taken in the ordinary way, but that part of the film which was covered by the mask remains unexposed, and another photograph may be taken, without spoiling the one already taken. One, two, four or eight photographs may thus be taken on the same film.
 Bobby's View.

TO HER OLD GLORY

Greece Arises to Take Her Place Among Nations.

City of Athens, Well Called the Paris of the Levant, Has Made Wonderful Strides, During the Last Century

"Greece, whose classic ideals still constitute one of the most potent forces of world culture, is about to emerge to a more influential place among modern nations as the result of peace adjustments," says a bulletin from the National Geographic Society. "The established religion of the land is, of course, orthodox Greek. The clergy, headed by the metropolitan of Cetinje, are a splendid lot of men in physique and character. The Catholics, numbering some 13,000, have their own archbishop at Antivari, and the few Mohammedans possess a grand mufti.

"In many ways Greek life remains unchanged from its classic aspects. Modern Athens, before the war, was a brilliant capital well worthy its title, 'The Paris of the Levant.' Less than a century ago it passed finally from Turkish possession, and it was then a small collection of mere hovels huddled beneath the Acropolis.
 "In 1914 it was a city of wide and gay streets, dotted with small parks and adorned with many handsome public buildings, most of them the gifts of rich Greeks who have delighted to spend in the mother country the fortunes which they have earned abroad.
 "To such generosity Athens owes the noble group of buildings which comprise the university, the National library, and the fine classic reproduction which houses the Academy of Science, and above all and to my mind the most interesting, the noble stadium, built upon the old foundations and along the old lines and ingeniously carrying in its fabric every fragment of the old structure which could be found.

"In the midst of all this modernity stand the remnants of the golden days of Athens nobly preserved, and open to inspection and study with a freedom nowhere equaled. The focus, of course, is the Acropolis—incomparable even in its ruins—its cliffs and grottoes still the home of legend and fable.
 "As of old, the Greeks swarm the seas. Before the war the Piræus was one of the busiest of Mediterranean ports—indeed, it was the center of transshipment for all the east—while the Corinthian canal, after many financial vicissitudes, now seems to be in the way of becoming each year a more and more useful route between the Ionian and the Aegean seas.
 "The Greeks are a town people. One-tenth of the population is to be found in Athens and the Piræus. The drain of emigration from the rural districts is enormous. In the words of a cabinet minister, it constitutes 'a grave national hemorrhage.' Indeed, in some villages in the Peloponnesus there remain scarcely enough men to fill the offices.

"In a land of much sunshine, as Greece is, life is followed much in the open. The oven is almost invariably to be found in the courtyard, and it is heated with dried twigs, almost the only fuel of the country, which are brought in huge piles upon the backs of the patient little donkeys, who vie with the goats in being the most useful members of the household.
 "At Megara the native costume appears at its best. It is rarely seen anywhere nowadays, and has almost wholly disappeared from the cities."
