

Stock Raising in WESTERN CANADA

Is as profitable as grain growing. Successes as wonderful as those from growing wheat, oats, barley, and flax have been made in raising Horses, Cattle, Sheep and Pigs. Bright, sunny climate, nutritious grasses, good water, enormous fodder crops—these spell success to the farmer and stock raiser. And remember, you can buy on easy terms.

Farm Land at \$15 to \$30 An Acre

—land equal to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—grazing land convenient to good grain farms at proportionately low prices. These lands have every rural convenience: good schools, churches, roads, telephones, etc., close to live towns and good markets.

If you want to get back to the farm, or to farm on a larger scale than is possible under your present conditions, investigate what Western Canada has to offer you.

For illustrated literature with maps and particulars regarding reduced railway rates, location of land, etc., apply to Department of Immigration, Ottawa, Canada, or

FOUND NEW DISEASE GERMS

Annoying "Deer-Fly Fever," It is Announced, is Caused by Bacterium Tularensis.

Announcement has been made by the United States public health service of the discovery by its investigators of a new germ foe to man, which causes a disease which has resulted in fatal cases in Utah, the New York Times says.

An investigation has been completed by Surgeon Edward Francis. The germ, which bears the name of bacterium tularensis, was first located by Doctors McCoy and Chapin of the health service, as the causative agent in a plague-like disease of rodents. It was not then known that the same germ also infects man.

Doctor Francis now finds that bacterium tularensis is the cause of "deer-fly fever," a disease occurring among the rural population of Utah, and indicated, according to popular belief, by a fly bite on some exposed surface of the body. The site of the bite and the neighboring lymph glands become tender and inflamed and commonly suppurate. A fever like that in ordinary blood poison develops and lasts from three to six weeks.

After a girl gets to be about so old she tries to forget that she once wanted to marry a poet.

The best way to make your future successful is to be happy and useful in the present.

Disturbing Medley.

"Miss Pounders," said the head of the firm, not crossly, but with the evident purpose of administering a mild rebuke, "I believe you enjoyed the performance of 'The Jazz Girl' last night."

"Why—er—so I did, Mr. Frisher," answered the stenographer, in some confusion. "How did you know I was at the theater?"

"I was there myself, and—ahem—you've been humming all the song bits of that piece ever since you came down this morning."—Birmingham Age-Herald.

Just Grievance.

"Somebody else has got to wait on that guy in the green suit," said Maggie, the belle of the bannery.

"What's the matter, Mag?" asked her—for that day—dearest friend.

"He said, 'Pull yourself together, my girl, and rush that order of ham and eggs.' Any guy that talks to a lady like she's scattered herself all over the place ain't no gentleman. That's what I say!"—Birmingham Age-Herald.

Force of Practice.

"We have a baseball player in our choir."

"I suppose he always knows how to pitch his voice."

The history of the war waits on the epilogue.

To live within one's income is not an ignoble ambition.

MARKET FOR CHEESE TO GROW AS PEOPLE LEARN ITS EXCELLENT FOOD PROPERTIES

Above—Putting Curd in Hoops for Pressing. These Hoops Are for a Size of Cheese Known as "Young America." Below—Paraffining and Boxing Cheeses.

(Prepared by the United States Department of Agriculture.)

Thanks largely to the traditions of foston and vicinity, the people of the United States have come to know beans—their food value and all that—but there remain other opportunities, notably those to be found in popularizing cheese, to win fame by the food-products route. Attention is called to cheese particularly, because Americans have long neglected it in spite of its excellent food properties, and only recently have signs of growing interest in this product appeared. Dairy interests, as well as dietists, would like to see the day when the United States will be known as one of the greatest cheese-eating nations of the world.

Small Per Capita Consumption.

Visitors at the national dairy show in Chicago were surprised to learn from a government exhibit what a very small amount of cheese (one eighth of an ounce) each person of this country eats daily. Cheese makers, and dealers are just beginning to realize that the cheese demand can be increased tremendously if the merits of this food are properly brought to the attention of the public.

Eight countries have learned to know cheese better than we have. Denmark leads with a per capita consumption of 12.3 pounds; the United Kingdom, according to the latest figures available, comes next with 11.2 pounds per capita. Then France, Netherlands, Norway, Sweden, Italy, and Australia are listed in the order named—all ahead of the United States, which has a per capita consumption of only 3.8 pounds a year. Three-fourths of a century ago the people of this country seemed in a fair way of learning the value of cheese, and by 1850 their per capita consumption had risen to four pounds and 12 ounces, but this figure has never been reached since. The cheese consumed in this country has been principally American Cheddar, although foreign varieties have been increasingly popular, and furnished in 1918 practically one-fifth of the cheese consumed in this country.

Greater Variety of Uses Urged.

Attempts to develop a larger market for cheese should take into account the fact that practically all the cheese now consumed is eaten as purchased. A very large proportion of it is used with bread or as a filling for sandwiches. Cottage cheese in some form is consumed in large quantities. Dietists have no criticism of America's manner of eating cheese, save that they urge its use in a greater variety of ways, and more regularly.

Everyone interested in enlarging the market for cheese should understand clearly its food value. It contains over 25 per cent more protein than the same weight of an average cut of beef as purchased. So far as its composition is concerned cheese is comparable with meat. There are a great variety of ways of using cheese in the same way as meat, and these can usually be readily learned by consulting the average cook book. In planning menus in which cheese is given an important place, the housewife should bear in mind that, being rich in both protein and fat, cheese may replace such foods as fish and eggs, as well as meat, rather than cereal foods characterized by a large amount of starch, or succulent foods such as vegetables and fruits.

How to Increase Demand.

Every interest concerned in enlarging the market for cheese should join in preaching the gospel of "more cheese in the daily menu," say dairy specialists. There are many ways in which this education campaign can be carried on. Advertising is one effective medium. Attractive displays of cheese and cheese dishes, with well-worded placards, in grocery and delicatessen stores help materially.

NEW PARTS FOR IMPLEMENTS

Careful and Systematic Inspection Should Be Made for Purpose of Making Repairs.

(Prepared by the United States Department of Agriculture.)

A careful and systematic inspection of each implement should be made for the purpose of making or ordering repairs. Plows, listers, harrows, rollers, drags, seeders, drills, planters, cultivators, mowers, binders, headers, hay rakes, hay loaders, stackers, rangers, racks, engines and horsepower or belt-driven machines such as separators, silo cutters and feed grinders are the implements in most common use. It is suggested that each implement be inspected for badly worn or broken parts to determine what parts should be repaired and those that must be replaced with new ones.

As a reminder for ordering new parts and in overhauling the machine, make a list for each implement of the parts to be repaired or the new parts to be bought; also any special tools necessary in making these repairs. Put down the name of manufacturer, year bought, and the number of the machine, if it is known. If orders are sent to the factory, be sure to specify the catalogue, pattern, or casting number of the part. Order repair parts early, as the dealer may not have them in stock.

STOCKS OF CORN DECREASED

Estimate of November 1 Placed at 72,203,000 Bu.—is 2.8 Per Cent Less Than in 1918.

(Prepared by the United States Department of Agriculture.)

The stock of old corn on farms November 1 is estimated at 72,203,000 bushels, which is 2.8 per cent of the 1918 crop. The corresponding figure a year ago was 114,078,000 bushels, and the average of the preceding five years was 87,277,000 bushels.

PIT SILOS BECOME POPULAR

Wyoming Farmers Are Constructing Large Number of Contraptions—County Agent Aids.

(Prepared by the United States Department of Agriculture.)

Members of the Niobrara County (Wyo.) Farm Bureau are constructing a large number of pit silos. Several successful demonstrations have been held by the county agent. Previous to one of the demonstrations the collar of one silo had been constructed and the pit dug several feet.

The farmers were shown how to plumb the walls by means of a "reamer," how to mix cement and apply the same to the walls, and how to make a hoist. A second silo was then started, the collar being laid out, the pit dug and the collar poured. In this manner all the steps in putting down a pit silo were demonstrated, much to the satisfaction of the farm bureau members present.

GENERAL FARM NOTES

Time and tide wait for no man, but time and care applied to farm tasks pay any man.

The barns, stalls and sheds should have convenient arrangements for saving the manure.

Alfalfa believes in a square deal. It gives back to the soil in nitrogen more than enough to pay for its keep.

Ensilage is corn-suerkraut, and is the cheapest form in which the corn crop can be placed in the feed manger.

Farming is a business requiring just as careful thought about cost, method and salesmanship as any other business enterprise.

PE-RU-NA

Made Me a Well Man

Mr. Louis Young, 1652 Clifford St., Rochester, N. Y., writes:

"I suffered for thirty years with chronic bowel trouble, stomach trouble and hemorrhages of the bowels. We bought a bottle of Peruna and I took it faithfully, and I began to feel better. My wife persuaded me to continue, and I took it for some time as directed. Now I am a well man."

Suffered thirty years with stomach trouble and hemorrhages of the bowels.

Liquid or Tablet Form

There's a Difference.

"Men are the contraryest things!" exclaimed an Indianapolis housewife. "My husband goes hunting every fall and this year it rained the whole two days he was down in the country. And he hunted through all of it. He came in at noon and at night soaked to the skin, but with a fair bag of game. Then he would sit around the big sheet-iron living room stove and dry his wet clothes. Can you imagine anything so foolish?"

"But if I ask that same husband to go out and shut the garage door or feed the chickens in a little drizzle he says he can't do it, and asks me if I wish him to catch his death of cold!"

HER FADED, SHABBY APPAREL DYED NEW

Adornment.

"Here, this article talks about the ornamental government bureaus. What do they ornament them with?"

"I believe it is generally with big nob's."

The Chinese have obtained water through means of artesian wells for more than 1,000 years.

48,000 Drug Stores Sell It.

Five million people use it to KILL COLDS

HILL'S CASCARA QUININE BROMIDE

Standard cold remedy for 20 years—in tablet form—safe, sure, no opiate—breaks up a cold in 24 hours—relieves grip in 3 days. Money back if it fails. The genuine box has a Red top with Mr. Hill's picture.

At All Drug Stores

"Diamond Dyes" Freshen Up Old, Discarded Garments.

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods,—dresses, blouses, stockings, skirts, children's coats, feathers, draperies, coverings—everything!

The Direction Book with each package tells how to diamond dye over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.—Adv.

BILIOUSNESS Caused by Acid-Stomach

If people who are bilious are treated according to local symptoms they seldom get very much better. Whatever relief is obtained is usually temporary. Trace biliousness to its source and remove the cause and the chances are that the patient will remain strong and healthy.

Doctors say that more than 70 non-organic diseases can be traced to an Acid-Stomach. Biliousness is one of them. Indigestion, heartburn, belching, sour stomach, bloating and gas are other signs of an acid stomach. EATONIC, the marvelous modern stomach remedy, brings quick relief from these stomach miseries which lead to a long train of ailments that make life miserable if not corrected.

EATONIC literally absorbs and carries away the excess acid. Makes the stomach strong, cool and comfortable. Helps digestion; improves the appetite; and you get full strength from your food. Thousands say that EATONIC is the most effective stomach remedy in the world. It is the help YOU need. Try it on our money-back-if-not-satisfied guarantee. At all druggists. Only 50 cents for a big box.

BOSCHEE'S SYRUP.

A cold is probably the most common of all disorders and when neglected is apt to be most dangerous. Statistics show that more than three times as many people died from influenza last year, as were killed in the greatest war the world has ever known. For the last fifty-three years Boschee's Syrup has been used for coughs, bronchitis, colds, throat irritation and especially lung troubles. It gives the patient a good night's rest, free from coughing, with easy expectation in the morning. Made in America and used in the homes of thousands of families all over the civilized world. Sold everywhere.—Adv.

EATONIC (FOR YOUR ACID-STOMACH)

Women Made Young

Bright eyes, a clear skin and a body full of youth and health may be yours if you will keep your system in order by regularly taking

GOLD MEDAL HARLEM OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles, the enemies of life and looks. In use since 1896. All druggists, three sizes. Look for the name Gold Medal on every box and accept no imitation.
