Territory Taken From Spain.
At the close of the war with Spain the American government obtained possession of Porto Rico, Guam and the Philippines, agreeing to pay Spain \$20,000,000 and give Spanish ships special trading privileges in the Philippines for ten years. Neither statehood nor citizenship was promised to any of the islands taken over and they are governed as territorial possessions.
When Legislators "Pair."
When a legislator wishes to be absent at the time when an important vote is to be taken, he finds some member who intends to vote on the other side of the question and arranges a "pair" with him. That is, the second legislator agrees to refrain from voting, as an accommodation to the first. The net result when neither vote is cast is the same as if both had voted on opposite sides. Both legislators can then be absent if they wish without loss or gain to either side.

Selden, Kansas, Lands

Below we give a brief description of a few of our choice bargains in farms and ranches. All these farms are underlaid with an abundance of sheet water, which is of the best quality, pure, clear and free from alkali. The soil is a rich black loam, as productive as the Nile Valley. We have no hardpan, no rocks nor stamps to harass the farmer in tilling the soil. Our climate is healthful. The air is pure, the nights are cool in summer, most of the winters are open and mild, we have more days of sunshine in this section than in any other spot in the United States.
The wheat sown on many of these farms will, if the yield is good, and the prospects never looked better, pay for the land.
If in the market for land you can't afford to neglect to investigate the propositions we have to offer. We have resided in this territory for over twenty years and when you deal with us you deal with an old reliable firm. Agents will find us on the square and willing to cooperate in helping them sell to their clients and will find our commissions and our business methods satisfactory. We solicit their business.

IS 700 Bushels of Corn Worth Saving?

Wouldn't you like to save 700 bushels of corn each time you fill your silo? In filling a 100-ton silo you put in about 700 bushels of corn when the ears are run in with the stalks.

With a JENNEY SILO-FILLER-HUSKER you can take the ears off, put them in the crib and still have silage with just as much food value and give you just as good feeding results. Figure out how much 700 bushels of ear corn is worth at present market price—that's your saving.

Let us tell you all about this money-saving, money-making way of making silage. It is opening the eyes of farmers, Experiment Stations and stockmen everywhere.

You don't have to fill your silo at just a certain time—you can fill it and re-fill it from fall to spring. The saving pays for the JENNEY SILO-FILLER-HUSKER in a short time.

Now is the time to look into this money-saving, corn-saving plan. Come in and see us about it.
